# THE GAME OF QUOITS.

CAN BE PLAYED ANY PLACE AND IS SPLENDID EXERCISE.

#### It Is a Very Ancient English Pastime, and its Beginnings Are Lost In the Mist of Ages-Fine Training For the Eye and Arm.

There are some games which have never had their boom, and quoits is one of them. Still, as nothing happens but the unexpected, it may be that the time is nearly ripe for quoits to be taken out of its undeserved obscurity, to be exalted to the status of a national game, to have weekly papers named after it and to have columns in the sporting press devoted to the doings of its champions. Stranger things have happened. Who, for instance, would have said when at the end of the sixties a few energetic sportsmen went wobbling about on bone shaking bicycles which it would have been far easier to push than to ride that at the end of the century considerably more than 100,000 bicycles would manufactured annually in Great Britain alone and that a great part of the population would adopt this means locomotion 7 One cannot imagine that quoits will ever attain such popularity as the bicycle, but the unprejudiced person can see no reason why it should not become as favorite a pastime as golf, which a very few years ago was almost unheard of south of the Tweed.

Quoits is a very fine game, especially in the winter time. It is splendid exercise and trains the eye and the hand to act together in a way that few other sports can do, for the very essence of it is accuracy of aim at a mark placed below the level of the hand. It has been objected that throwing quoits makes the player lopsided, but, after all, that is easily remedied. for there is nothing to prevent the player throwing the quoit with his left hand if he so pleases, and such a change would make a variation in the game and also afford an excellent method of handicapping the men of unequal skill. Quoits strengthens the arms and shoulders, but it is not a pastime which primarily demands strength.

A great advantage of the game is that it can be played in any small space and that the ground need not be particularly level. Any rough field or waste bit of ground is good enough for a quoits pitch, and no rolling or cutting is required to satisfy the demands of the most exigent. For cricket you need a carefully prepared wicket, for lawn tennis and croquet a piece of turf like a billiard table and for golf the best part of a country all to yourself, but for quoits you only need a few yards of rough ground, and you have as good a place for throwing as any one can pos sibly require.

People certainly might play quoits more than they do, but the taking up of a game is usually a matter of fancy, and perhaps two things stand in the way of quoits. First, there is an idea that it is a "rustic" sport and can only be played by the rough country lads, and, second, there is the legend that the game is derived from the classical discus throwing, a suspicion which it must be confessed is enough to throw a slur on any well regulated game.

No treatise on quoits can begin without the time honored pedigree of the quoit from the discus. Strutt, who lived at the end of the last century, of course dealt with it, and equally of course he dragged in the discus even if he did not invent the descent of quoits from the sports of ancient Greece. The thing, of course, is absurd. To make a discus, the artisan did not, in the words of the immortal Irishman, take a hole and put some iron around it. The discus was more like a flattened Dutch cheese and was a solid missile. Moreover, it was not held in the same manner as a quoit, but was bowled underhand, in which indeed it alone differs from putting the weight. That quoits is now played chiefly in the country is the fault of those who do not play it and bring it into fashion. It is no doubt a very ancient English game, and its beginnings are lost in the mist of ages. Hakluyt mentions it in his book of "Voyages," so it was well known in Queen Elizabeth's time, when it probably was one of the favorite sports of Merrie England. In some parts of the country the rustics used to employ horseshoes for want of properly made quoits, and there are districts in which the quoit is called a "shoe" even to this day. This gives us the clew to the most probable origin of the sport and hints that the first game of quoits was started by throwing old horseshoes at the hob or mark, and from this gradually grew up the practice of having quoits specially made for throwing. So much for the discus legend. As for the word "quoit" itself, its etymology is more than doubtful, and it gives us no clew whatever to the origin of the game Shakespeare, who mentions everything except tobacco, of course has a reference to the sport, and as Hakluyt was a contemporary of his it may be held to show that the spacious times of Great Elizabeth were the palmy period of quoits. It is true that he does not speak of the sport in very reputable connection, for the only mention of it occurs in the scene in which Prince Henry, Falstaff, Poins and the rest were in the Boar's Head tavern, in Eastchape. Falstaff, in giving a char-acter sketch of the young prince, observes that he plays quoits well, but the context very clearly shows that in Queen Elizabeth's time at any rate quoit playing was looked down upon as the idle man's recreation, much as skit-tiles is with us. That fat Jack Falstaff, disreputable old fellow as he was, meant to imply no good of the prince meant to imply no good of the prince by his reference to quoits is very evi-dent. This is the only reference to quoits in Shakespeare, and it is a libel, though the sting is taken out of it by the fact that it is put into the mouth of Falstaff ---Physical Culture.

## FIRST TO GROW ORANGES. Jesuits Introduced Them Into the

Pellean State.

The orange of Louisiana is an exceptionally fine variety of that fruit, and commands a good price in the market. The orange was first introduced into colonial Louisiana by the Jesuits, hav-ing been first grown by the members of the society on their grounds, which formerly comprised that part of the city of New Orleans which constitutes the lower part of the first district, down to Common street.

While St. Bernard and Plaquemines parishes are the chief centers of the orange culture of Louisiana, the fruit also grows well in the parishes of Orleans, Jefferson, St. James, St. John Baptist, St. Charles, Assumption, St. Mary, Terrebonne, Lafourche, Vermilion, Cameron, Iberia and Sabine. The orange tree begins to bear at about the seventh year, although it is not reck-oned to have reached its full growth until its twelfth or fifteenth year.

The orange culture in Louisiana is probably the most profitable industry of the state under favorable conditions. a full grown tree producing from 3,000 to 5,000 oranges, the fruit on the tree generally selling for \$10 a thousand. and as some of the largest orchards in the state yield as many as 3,000,000 oranges their market value gives a princely income to the owners of the Comparatively a very small acreage of the state is devoted to the growth of oranges-possibly not more than 2,000 acres.

The sweetness, delicacy and juiciness of the Louisiana orange, the best of which are regarded in the markets outside of Louisiana as superior to even the oranges of Cuba, to which island the fruit is indigenous, render the Louisiana oranges highly prized in the north and west of the United States, so much so that the supply is not by any means equal to the demand -- New Orleans Picayune.

#### He Could Get Them.

When he was a Harvard student, the late Sherman Hoar became famous as a maker of epigrams. One evening he had been indulting in his usual style of conversation in the rooms of Professor D., a man after his own heart, but too apt to interlard his lectures with apparently original witticisms taken, after the manner of Moliere, wherever he found them. When Hoar and a fellow student had left the academic presence. the latter enthusiastically cried: "By Jove, Sherman, how do you manage it? I wish I could remember all the

bright things you said just now." "Go to D.'s lecture tomorrow and take notes," said Hoar. "You'll get them then."-Exchange.

#### Polson Parts of Snakes.

All poisonous serpents have movable fangs, which are found in the upper faw, and when not in use close up like the blade of a penknife.

At the base of every poison fang there are numerous germs of others, and the fang, if broken or lost, is replaced in a few

In China the faith in heredity is so strong that when a "habitual criminal" is captured they not only cut him into small pieces, but put all his sons and grandsons to death. The Celestials evidently believe that faith without works is dead.-Boston Globe.

#### Some Clerical Jokes.

"Do you have mating in your church?" "No, we prefer linoleum." Another clerk gave out in church, "Let us sing to the praise and glory of God a hymn of my own composure." A lady asked the dean to read at her bed side "that leantiful lesson \* \* \* there was summat about greaves in it." The dean read her I Samuel, xvii. "She listened with arms outstretched and made no comment until I came to the verse, 'He had greaves of brass upon his legs.' At this she raised has bends in At this she raised her hands in legs. ecstasy and said, 'Ab, them greaves, them beautiful greaves!' "-" "Phases of My Life," by Dean Pigon.

#### A Rhodes' Anecdote.

Here is a new anecdote about Cecll Rhodes: In 1884 he was severely attacked in the press, and notably by one journalist to whom he had given very considerable assistance.

"I do call that man a hound," said one of Mr. Rhodes' friends, "after all you have done for him."

Mr. Rhodes flushed up, and with one of his sudden though rare explosions burst out with, "Hound yourself! Do you think I wanted to bribe the man?"

### An Eye to Business.

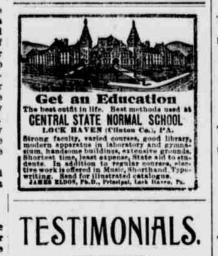

Optician-My dear sir, your case is peless.

Customer-And am I doomed to blind uess?

Optician-It is inevitable. I think you'd better look at my beautiful line of prtificial eyes at once. --Jewelers' Week-
