REVIEW OF TRADE.

No Centation in the Demand for Iron-Combina tions Have Not Affected Enginess.

R. G. Dun & Co.'s weekly review of trade reports as follows for last week: Business is not frightened, either by the great capitalization of new comthe great capitalization of new com-panies or by the wild fluctuations in Wall street. No matter how much the stock operations in New York may count, business elsewhere is large enough to warrant a wonderful ex-pansion of industries, and that is the bing weat important to observe. In thing most important to observe. In no considerable branch has production diminished, but in practically all it has been increasing during the past week

week. In iron and steel a little lower price for Bessemer pig appears at Pittsburg, but with gray forge 75 cents higher there, and southern iron at Chicago 50 cents to \$1 higher. There is no mar-ket for billets, as no works east or west can furnish them at present, but quotations range in price from 355 at Pittsburg to 327, at Philadelphia. In finished products there is the same trouble. Rails can be bought at \$23 st Pittsburg and \$24 at Chicago, if \$26 at New York. Chicago is taking many contracts for building in Boston, New York and Washington, amounting to 4,000 tons, but makers elsewhere are overcrowded with work. No market can deliver plates within any reason-able time and Pittsburg works are sold to July on sheets, though instead of \$240 there, \$2 65 at Chicago and \$3 at Philadelphia is paid. Plate mills are all full and there is heavy demand at Chicago for bars, with one car maker's contract for 5,000 tons, prices steadily growing stronger. in iron and steel a little lower pric contract for 5,000 tons, prices steadily growing stronger. The minor metals are all weaker, with the reaction of London specula-tion, though copper has declined to 17 cents and is yet so much above Lon-don that exports have been stopped for the week. The February output, both here and in other countries was greater than last year's monthly aver-age although Faber or is a short although February is a short age, wool is at the doubting point, with

DOCTOR TOO LATE. Mosquito Had Saved the Saske

The

hitten Man-An Agus Curs. New York Press: "Talkin' about rattlesnakes," said an Erie railroad brakeman, "did you ever hear how the mosquitoes saved a man's life up near Gulf Summit last summer? Well, while getting out railroad ties in a slashin' over back of the Summit, Abe Morehouse was bitten in the leg by a rattlesnake. A Susquehanna doctor was at once sent for and the leg was bandaged tightly above the wound. It was expected that Morehouse would die before the doctor could come up the pike on his bike. Just as soon as the leg was bared to put on the bandage it was attacked by a swarm of mosquitoes, and when the doctor arrived he found the man as lively as a cricket and in no need of a doctor, but the ground was covered with dead and dying mosquitoes. They had sucked the poison from the wound and saved Morehouse's life. The mosquitoes presented their bills and died. The doctor presented his bill and got his money. This was hard on the mosquitoes, but I presume Morehouse's life was worth savin'. There was Sol Timson, another brakeman. Sol used to brake on the Delaware division. from Susquehanna to Port Jervis. He had the ague awfully. Had it so bad that some of his teeth shook out, and he shook the buttons off his coat. A lot of his friends had sure cures for the ague, and each gave him the prescription. At last when he had 13 prescriptions, he took them all to a Port Jervis drug store and had them put up. He took them home and put them all into one jug. Then he shook the jug, mixed the 13 prescriptions thoroughly, and took three doses. He never shook again until the hearse

TOTHERHOOD is woman's natural destiny.

Many women are denied the happiness of children through some derangement of the generative organs. Actual barrenness is rare.

Among the many triumphs of Lydia E. Pinkham's Vegetable Compound is the overcoming of cases

of supposed barrenness. This great medicine is so well calculated to regulate every function of the generative organs that its efficiency is vouched for by multitudes of women.

MRS. ED. WOLFORD, of Lone Tree, Iowa, writes:

"DEAR MRS. PINKHAM-Before taking Lydia E. Pinkham's Vegetable Compound I had one child which lived only six hours. The doctor said it did not have the proper nourishment while I was carrying it. I did not feel at all well during preg-

nancy. In time I conceived again, and thought I would write to you for advice. Words cannot express the gratitude I feel towards you for the help that your medicine was to me during this time. I felt like a new person; did my work up to the last, and was sick only a short time. My baby weighed ten pounds. He is a fine boy, the joy of our home. Court Proceedings by Telephone.

A litigation was up in a magistrate's court at Castalian Springs, eight miles from Gallatin. It was uring the cold weather, and J. Tom Durham, of Gallatin, was counsel for one of the litigants. The trial was held in a country store in which there was a telephone. Eight miles' ride through the cold was too much for the constitution of the lawyer. A appy thought suggested itself to the torney-he would use the telephone, anduct the suit and remain in his Mee by the fireside.

The case was called, all the wit-nearses were present and the suit be-gan. Attorney Durham arranged for an assistant, who was to stand at the telephone and act as interlocutor, while he did the rest. The attorney carried on a careful and rigid ex-amination of the witnesses, even cross-examining the opposing sides. At the conclusion of the evidence Lawyer

month. Wool is at the doubting point, with large sales ordered from the interior by tired holders and some concessions made to secure transactions at Phila-delphia and Boston, though quotations show only moderate decline and sales at the three chief markets are almost as large as in 1892. Manufacturers make many inquiries, but the prospect of combinations is po-tent to hinder transactions. The goods are in rather better demand than a year ago, but no large class of mills can claim to be fully employed. The wheat market is just now some-what stronger, for although western receipts for the week are 3.359.000 bushels, against 2.557,666 bushels last year, and for three weeks 2.900,000 bushels larger, the exports, flour in-cluded, have been for the week from Atlantic ports 254,183 bushels, against 1.824,569 bushels last year, other ex-ports being 550,920 bushels. A physician who makes the test and is honest about it can tell you that, in many cases, the number of red corpuscies in the blood is doubled after a course of treatment with Dr. Williams' Pink Pills for Pale People.

That this means good blood may not be entirely Clear from the doctor's statement, but any girl who has tried the pills can tell you that it means red lips, bright, eyes, good appetite, absence of headache, and that it transforms the pale and sallow girl into a maiden who glows with the beauty which perfect health alone can give. Mothers whose daughters

grow debilitated as they pass from girlhood into womanhood should not neglect the pill best adapted for this particular ill.

Frank B. Trout, of 103 Griswold Ave., Detroit, Mich., says : "At the age of fourteen we had to take our daughter from school on account of ill health." She weighed only so pounds, was pale and sallow and the doctors said she had anæmia. Finally we gave her Dr. Williams' Fink Fills for Pale People. When she had taken two boxes she was strong enough to leave her bed, and in less than six months was something like herself. To-day she is entirely cured, and is a big, strong, healthy girl, weighing 130 pounds, and has never had a sick day since." - Detroit Evening Neuer.

The genuine Dr. Williams' Pink Pills for Pale People are sold only in packages, the wrapper always bearing the full name. At all druggists, or direct from the Dr Williams Medicine Co. Schenectady, NY, 50 per box.
