"One Year's Seeding, Nine Years' Weeding.

Neglected impurities in your blood will sow seeds of disease of which you may never get rid. If your blood is even the least bit impure, do not delay, but take Hood's Sarsaparilla at once. In so doing there is safety; in delay there is danger. Be sure to get only Hood's, because

Hood's Sarsaparilla

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cury in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional iteratment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The propietors have so much faith in its curative powers that they offer One Handred Dollars for any case that it fails to cire. Send for list of testimonials. Address. F. J. CHINEY & Co., Toledo, O. Sold by Druggiets, 76c.

National Pride

It is now almost two full centuries since England and Scotland were united, in 1707, under the name of Great Britain. Yet up to the present time the world continues to employ the familiar terms English queen, English army, and so on, with no mention of Scotland. This slight has often been commented upon by Scotchmen, but never perhaps more happily than at Trafalgar, Two Scotchmen, messmates and bosom cronles, from the same little clachan, happened to be stationed near each other, when the now celebrated signal was given from the admiral's ship: "England expects every man to do his duty. "No a word o' puir auld Scotland on this occasion!" dolefully remarked Geordie to Jock. Jock cocked his eye a moment, turning to his companion, "Man, Geordie," said he, "Scotland kens weel encuch that mae bairn o' hers needs to be tell't to do his duty-that's just a hint to the Englishers."

Unseen by Telephone.

A business house of Aberdeen, Scotland, recently engaged as office boy a country youth. It was part of his duties to attend to the telephone in his master's absence. When first called upon to answer the bell, in reply to the usual query, "Are you there?" he nodded assent. Again the question came, and still again, and nod. When the question came for the time, however, the how lo his temper, roared through the tele-"Man, a' ye blin'? I've been anddin' me held aff for t' last hauf 'oor!"-New York Tribune.

Pain Conquered; Health Restored by Lydia E. Pinkham's Vegetable Compound.

[LETTER TO MES. PINKHAM NO. 92,649] "I feel it my duty to write and thank you for what your Vegetable Com-pound has done for me. It is the only medicine I have found that has done me any good. Before taking your mediwas all run down, tired all the time, no appetite, pains in my back and bearing down pains and a great suf-ferer during menstruation. After taking two bottles of Lydia E. Pinkham's Vegetable Compound I felt like a new woman. I am now on my fourth bottle and all my pains have left me. I feel better than I have felt for three years and would recommend your Compound to every suffering woman. I hope this letter will help others to find for their troubles." - Mrs. DELLA REMICKER, RENSSELAER, IND.

The serious ills of women develop from neglect of early symptoms. Every pain and sche has a cause, and the warning they give should not be disre-

Mrs. Pinkham understands these troubles better than any local phydcian and will give every woman free advice who is puzzled about her health. Mrs. Pink am's address is health. Lynn, Mass. Don't put off writing until ith is completely broken down Write at the first indication of trouble.

FARM TOPICS

ŏ000000000000000000000000 Location of the Permanent Pasture. The location of the permanent pas-ture has much to do with its value, If possible it should join the lots surrounding the barns on the farm. It comes into use more constantly than any other field on the farm, as there is hardly a day in the year, unless it is under snow, that it may not be convenient to use it. The land most difficult to cultivate, as a rule, should be used for the permanent pasture. Much land would return more to the owners if put into such a pasture, and allowed to remain as such.

REC. II How Salt Helps Pertility. While the soda and chlorine of salt have no manural properties, there is often a decided effect from using salt as topdressing for land that has or-Only very small amounts are used per acre, and thus used the salt hastens decomposition, and this sets free whatever carbonic acid gas or ammonia the organic matter contains. Salt is usually thought of as a preservative. It is so when in amounts large enough to pickle what it is applied to. When carbonic acid gas is liberated, that acts as a solvent on the inert potash and phosphate that the soil contains, thus often serving in place of those minerals at much less cost than if they were bought

Pigpen Floors.

and applied.

It is my experience that the only floor that will last in the pigpen and which is practical, is one made of brick. Concrete and cement, and also wood, excepting pitch pine, will wear through in spots in an incredi-bly short time. The pig's hoof is very sharp, and exposed places, as near doorways and about the trough, soon give way to constant treading. Old outside brick that have been used for building purposes are best, be-cause hard and very much cheaper to buy and sometimes no expense only the hauling.

The foundation for the brick floor can be of coarse gravel, with an inch of sharp sand on top, upon which the brick can be placed. Let the portion of the floor where the pig's bed will be remain some three inches higher than the remainder of the floor, and let the slant be toward the door, for convenience in washing. When the grade is just right, place the brick flatwise on the sand, and when the whole surface is covered it can be made perfectly smooth and even with a piece of plank and tamper. Pour on grouting, sweeping it with a common broom in all directions until every crack is well filled, then leave a days until dry, when it can be Pitch pine, so far as I have seen it used, is good material for pens and horse stalls, because this class of animals will then not ordinarily bite it through, although there may be inveterate wood eaters that will attack any material .- A. A. Southwick, in New England Homestead.

A Derrick Por Hay.

The hay derrick for field stacking, which is illustrated below, is reported by a correspondent of the National Stockman as having worked satisfactorily. The frame can be bolted to-gether if the maker wishes to take it down and put under shelter for use in after years or spiked together if he wishes to let it stand in the field. A each time the boy gave an answering pulley is used at each end of the long arm across the top. The pulleys can be best attached to the arm by clevises ply appears to be at least equal to the demand, although new demands for the week have covered 2,100 tons for new buildings at Chicago, with much for bridges, and 4,000 tons for eastern buildings at Pittsburg. In bars both East and West the mills are unable to take all orders offered, nor in plates can they take all orders anywhere, while in sheets the western mills are overcrowded, though the eastern demand is lighter. of suitable size. A third pulley is attached to one of the lower corners of the frame as most convenient when the derrick is in position for stacking. The base of the frame illustrated is ten feet square, ten feet high and ten feet square at the top. Three sides are cross-braced. The fourth side is

A FIELD HAY DERRICK.

not, as it makes it more convenient to take the pole down. The pole is twenty-five feet long. It should be seven inches in diameter at base and five inches at top. Across the runners at center use a piece of timber two inches by twelve inches, ten feet long, with two-inch hole-or larger in center for tenon, cut at end of pole to rest in, the shoulder around the tenon resting on the timber. The long arm is fifteen feet long, and the correspondent thinks it should be two feet longer. Short end is five and a half feet long, long end, eleven and a half feet.

exports being 457,288 bushels.

Corn exports were in two weeks 7,975,599 bushels, against 4,743,766 last
year, but receipts continue enormous,
in two weeks 8,839,911 bushels, against
6,479,176 bushels last year. Contradictory stories about foreign crops weigh
but little compared with the actual
buying of grain and movement from
the farms. The truth seems to be that
the supply of wheat in the spring
wheat region is larger than anybody
has supposed.

Fallures for the week have been 136 About three feet from the base of the pole will be noticed a projecting This is one-inch iron about four feet long, fitting in an auger hole in the pole. This is used as a lever to turn the arm around over the stock when loaded. The high end of the long arm as shown in the illustration is about twenty-eight feet from the ground. The frame must set close to the butt of stack or rick, the bulge of the stack coming out against the

REVIEW OF TRADE.

The Supply of Iron Now Near Equalling the

Demand - A Rise in Cotton.

R. G. Dun & Co.'s Weekly Review of

Trade reports as follows: After great

expansion business hesitates. This

year It is astonishing that the hesita-

tion has been so slight. In one branch

after another buying has halted, only

The output of iron surnaces in blast August 1, was 269,032 tons weekly, 60.8 per cent more than in 1832 and 27 per cent more than last year. With a decrease of 27,367 tons in unsoid stocks, nearly half in charcoal iron,

stocks, hearly haif in charcoal iron, the apparent consumption and exports do not exceed 1,216,744 tons, which barely equals the lowest report of production August 1, and other fur-naces have started since that date.

overcrowded, though the eastern te-mand is lighter.

The Connellsville coke output is again 192,556 tons for the week, with only 550 ovens idle, and prices are un-

Cotton has risen three-eighths owing to crop reports, but nobody believes that the year's production, with the heavy stocks carried over, will fall be-low the requirements for consumption. The demand for goods is enough to

The demand for goods is enough to cover a heavy consumption of cotton, but does not now appear to be gaining. Wool is a little less active after its great rise and inside quotations are sometimes accepted, but sales at the three chief markets have been 20, 206,699 pounds in two weeks, against 23,499,800 in the same weeks of 1897, and 16,436,300 in the same weeks of 1892.

Wheat receipts at the West have been 8,652,579 bushels in two weeks, against 5,645,960 bushels last year, making it hard to believe the unfavorable crop estimates which still come forward from unofficial and official sources. The exports have slackened, amounting to only 6,269,133 bushels, flour included, from Atlantic ports, against 5,945,311 bushels last year, and from Pacific ports, 400,060 bushels, against 924,155 bushels last year, other exports being 457,288 bushels.

Corn exports were in two weeks 7,-

with several more to follow.

very great in Australia. In Wes Australia there were only 54,000 wom en in a population of 168,000.

severe test of soap quality. The pores of the skin need opening, the oily exudations from them demand instant removal, for health and cleanliness. Ivory Soap meets the severest tests squarely, does what you expect. It floats, produces a copious lather, white and pure. Loosens the dirt and grease, rinses thoroughly and leaves the skin soft and clean. Economical because best.

IT FLOATS.

NIAGARA'S VOICES.

Are Not Rumbling or Rapid. but Plangent and Silvery.

Niagara has many voices, and some of them are thus described by Mrs. van Rensselaer in the Century: the noise of Niagara? Alarming things have been said about it, but they are not true. It is a great and mighty noise, but it is not, as Hennepin thought, an 'outrageous noise.' It is not a roar. It does not drown the voice or stun the ears. Even at the actual foot of the falls it is not pressive. It is much less rough than the sound of heavy surf-steadier, more homogeneous, less metallic, very deep and strong, yet mellow and soft; soft, I mean, in its quality. As to the noise of the rapids, there is none more musical. It is neither rumbling nor sharp. It is clear, plangent, silvery. It is so like the voice of a steep brookmuch magnified, but not made coarser or more harsh-that, after we have known it, each liquid call from a forest hillside will seem, like the odor of grapevine, a greeting from Niagara. It is an inspiriting, an exhibarating at the foot of East Ninety-fifth street ound, like freshness, coolness, vitality itself made audible. And yet it is a lulling sound. When we have looked out upon the American rapids for

many days, it is hard to remember contented life amid motionless surroundings; and so, when we have slept beside them for many nights, it is hard to think of happy sleep in an empty silence. Still another kind of music is audible at Niagara. It must be listened for on quiet nights, but then it will be heard. It is like the voice of an orchestra so very far away that its notes are attenuated to an incredible delicacy and are intermittently perceived, as though wafted upon variable zephyrs. It is the most subtile, the most mysterious music in the world. What is its origin? Why should we ask? Such fairy-like sounds ought not to be explained. Their appeal is to the imagination only. They are so faint, so far away, that they almost escape the ear, as the lunar bow and the fluted tints of the American falls almost escape the eye. And yet we need not fear to lose them, for they are as real as the deep bass of the cataracts.

Woman Finds Wealth.

The disproportion of the sexes is still

New York's Highest Point.

Perhaps the highest point in the borough of Manhattan is at Ninety-sixth street and Madison avenue. where the New York Central Railroad tunnel begins, and from this elevation a fine view is obtained of Harlem to the north and the East river and Long island to the east. One can look over the roofs of the five-story housen of Harlem clear to Washington Heights and distinguish many points in the borough of the Bronx.

From here there is a sharp decline to the East river, and the tall chimney does not look so very high from this altitude. It is altogether a sight well worth seeing.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, Syaur or Figs, manufactured by the SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP Co. illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headnednes and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal irritating them, make it the ideal

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the California Fig Syrup Co. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package
