A Clearfield county woman was put in the lock-up Monday for drunkenness. She was so drunk that she fell off the sidewalk. It is certainly a pitiable sight to see a woman reeling drunk on the streets.

There have been some complaints about saw edges on stand-up collars and cuffs of the Reynoldsville Steam Laundry. They are now prepared to obviate this fault, having placed one of Carr's edge-dampeners and ironers in their establishment, which irons the edges and corners of standing, wing points and lay-down collars and cuffs, making them smooth as ivory.

The trouble with a great many people who preach "patronize home industries" is that they don't practice what they preach, but seem to intend it to apply only to other people than themselves. No matter how good the goods or fair the prices of home merchants; no matter how honest and reasonable in price the work of home industries, there are always plenty of people who are ready to spend their money with some outside concern or patronize some traveling fakir to the detriment of the legitimate

Miners' Mass Meeting.

A miners' mass meeting was held near Prescottville Sunday afternoon. There is a dissatisfaction among the pick men, at least, on account of the machine men getting more work than the pick men do. The men claim that the company is not sticking to the agreement entered into at close of recent strike, as it was agreed that the pick men would get their turn with the machine men. There were several other grievances considered at the mass meeting. A committee was appointed to see Mr. Bell about the pick men getting their turn with machine men. This committee reported last night to the executive committee of the U. M. W. of A., but we have not learned what action, if any, will be taken in the matter.

The play is a riproaring farce comedy and keeps the audience in good humor from start to finish. Miss Chaplin is a clever singing and dancing soubrette and in the part of "Patsie" she has made quite a hit. She is the life of the play and her singing is a feature. The "Corner Grocery" was written for laughing purposes. Its plot is a more thread on which are strung a lot of side splitting situations and funny sayings. The supporting company includes James Nesbitt as Daddy Nolan, Billy Bowers (who will be remembered as the funny Dutchman in Side Tracked) as Henry Budweiser, the Dutch grocer whom "Patsie" keeps in hot water from morning till night. Geo. Mellinger Now a Member of a Coal

George Mellinger, of this place, and Captain John M. Brinker, of Buffalo, N. Y., with several other parties, have purchased the plant of the Church Hill Coal Co., which is located at what is called Dutch Hill, near Parker, on the main line of the A. V. R'y. Mr. Mollinger has severed his connection with the Jefferson & Clearfield Coal and Iron Company at this place and will give his entire attention to the new company's works, of which he will be general manager. The company will be known as the Brinker Coal and Iron Company. The plant is now being equipped with electrical mining machinery, rope haulage and all the modern improvements, and a large amount of coal will be produced from the mines daily. The company has bought 500 acres of coal land. with an additional large body that can be secured when needed. The coal will be dumped into the car as it comes from the mine and no tipple or scales will be equired.

Mr. Mellinger, who has been superinendent of several of the largest coal plants in this section of the state, has worked hard and faithfully for the financial interests of other men, and THE STAR is glad to learn that he has gone into business for himself, and we wish him success. It has been rumored that Mr. Mellinger would move away from this place, but he informed ye editor Monday that he had no intention of moving away.

Bituminous Coal in Demand.

Upon the state of the trade in coal circles, the Coal Trade Journal remarks: Bituminous coal seemed to be about the last thing to catch on with the improved condition of affairs, but now it can fairly be said to be having its inning, for there is a demand for all that can be had in all directions. The industrial situation has been such for some time past that there was no great increase in the rolling stock of the coal roads. and now that the change for the better has come, these lines are in no shape to handle the traffic that is offered them. We have for months contended that soft coal would sell for more money this year, and it is keeping up to most sanguine expectations. There are people who were not of this way of thinking, and they are loaded up with a lot of business at low prices, and have no opportunity for even a little of the good things that are going: they will probably know more next year.

Never in the history of the trade in Buffalo, has there been such a scarcity of soft coal. The condition is such that the situation practically amounts to a famine. Something will have to be done to relieve this situation, as, with the present lack of cars, it will be utterly impossible for the shippers to supply the general trade. The prices continue strong, and the dealers are almost able to get their own figures for whatever they have on hand.

First Round of Quarterly Meetings.

R. C. Smith, presiding elder of Clarion district, has fixed the following dates for the first round of quarterly meetings for the present conference year.
