Public School Savings Bank.

A public school savings bank will be started in the schools of this borough next Monday, March 5th, and we publish a few facts concerning the system, as follows:

A great majority of the children in every community know nothing of handling money except to spend it for the sake of gratifying the caprices of the moment. Improvidence is one of the greatest evils of the present day and hence whatever tends to the habit of earning and saving money will be of incalculable benefit. Furthermore, as the parent and teacher work together in the education of the child, the conclusion is reasonable that both can best encourage the habits of frugality.

It is generally admitted that the money accumulated through industry and self denial is of more account to a person than that easily obtained. If this is true of the adult it is surely the case with the child.

The system will give to the pupil an idea of his own importance and capacities, and make him a party to his own improvement in this as in other lines of education. It will inspire and develop habits of thrift and frugality, which contribute largely to a successful life.

It is not the purpose of the system to induce large individual deposits, but rather to encourage the largest number to become depositors in some amount; and the deposits are made in such a manner as to preclude a disclosure to the pupils of the amount deposited individually. The experience of the schools in which the system has been tried shows no tendency towards injurious rivalries among the pupils.

No serious interruption of the ordinary work of the school will result, inasmuch as ten minutes on each Monday morning of the school term will be sufficient time for receiving the deposits from the pupils. The details of the work will be as follows, viz:

Every Monday morning deposits will be received from the pupils by the teacher, each depositor receiving credit upon a weekly card with which he is furnished. This card is always presented when a deposit is made.

The whole amount received by the teacher is given monthly to the person authorized to receive it.

Any amount from one cent upward will be received by the teacher and when a pupil has a deposit of one dollar or more, he will be provided with a bank book, by the bank, free of charge.

On the last Monday of each month of the school term, the teacher through the person authorized to receive the deposits, will furnish the Bank with a list of their respective schools, showing the amount deposited by each pupil, which will thereupon be placed to their credit on the books of the Bank.

No money can be withdrawn from the Bank except upon a check duly signed by the pupil, and having the approval by signature, of the parent or guardian, and the teacher.

Deposits of \$1.00 and upwards will bear interest from the Bank at the rate of 4 per cent. per annum.

The adoption of a system of savings by public schools has been urged for some time by prominent educators, philanthropists and others, who take an intelligent view of the tendencies of our times.

As we go to press this morning we learn that the employes of the North-western Mining & Exchange Co. at Brockwayville, Crenshaw and Dagus Mines are to be given an advance that will equal 20 per cent. on next Thursday, March 1st. This is good news to not only the miners, but the people in general, and the employes will certainly appreciate this act on the part of the company.—Brockwayville Record.
