

ting forth your triumphs, Easter bells, Till earth shall learn the story; Iweet is the news your music tells, He lives, the King of Giory! The Lamb, who was for sinners slain, Domes forth from death in might to reign.

He lives the race of man to bless, To banish care and sadness, All griofs to heal, all wrongs redress, To fill the earth with gladness. The Lamb, who was for sinners slain, Doth now for man's redemption reign!

A Child's Easter Story.

tell you an Easter tale. There wa: once a woman who had an only daugh ter that was very small and pale and altogether som e what different from other children. When she took the little one out for a

walk the people stood and looked at the child and whispered among them-selves. When the little girl asked her mother why the people looked at her so strangely the mother always re-plied, "It is because you have on such a beautiful new dress." Thereupon the little one was contented. As soon, however, as they returned home the mother would elasp her little daughter in her arms, kiss her again and again and say: "You sweet little angel, what would become of you if I were to die? No one, not even your father, knows what a dear little angel you are!"

Some time afterward the mother be came suddenly sick and she died on the ninth day. Thereupon the father of the little girl threw himself in de-spair on the deathbed and asked to be buried with his wife. His friends, however, spoke to him and comforted him, and so he left his wife's body, and a year later he took unto himself another wife, who was lovelier, younger and richer than his first wife, but

by no means as good. And from the day that her mother died the little girl spent her whole time from morning till evening seated at the window sill in the sitting room, since there was no one who would take her out for a walk. She had be-come even paler than before and she had not grown at all during the latter years.

When her new mother came to th house she said to herself: "Now I will go out walking again in the city and on the beautiful promenades where on the beautiful promenades where the sun shines so brightly, where there are so many lovely shrubs and flowers and where there is such a prowd of handsomely dressed people." For she lived in a narrow little alley, in which the sun seldom shone, and when she sat on the window sill she nor only a little bit of the blue shr. aw only a little bit of the blue sky-a bit not larger than a pocket hand-kerchief. Her new mother went out nearly every day in the forenoon and afternoon, and each time she wore a very beautiful dress, much more beautiful than any dress the first mother had ever owned. But she

EASTER MONDAY EGG-ROLLING.

Thousands of Children Spend a Joyou Day in the White House Grounds.

Clifford Howard, in writing of the annual Easter Monday egg-rolling in the White House grounds at Washingthe White House grounds at the spot ton, gives a fine glimpse of the spot in the Ladies' Home Journal. "The chief points of attraction," he says, "are the mounds of hillocks that rise in gentle slope from the lawn in vari-ous parts of the grounds. Their sides are richly carpeted with soft, thick grass, and here it is that little children roll their eggs. They clamber up the hillside with their baskets, the little tots crawling up on hands and knees, and then turn and roll their eggs one by one down the green slope. But the children do not confine them-selves to rolling eggs. Many of them take more pleasure in sitting about in Oh, if she were only like other groups and picking eggs with one an-children! Was there one of them who loved the sunshine and the flow-eggs together on their points. The ers better than she, and yet among them all was there one who saw so little of the sunshine and the flowers as she did? From her seat by the

HOSE of us who know Easter only in our cold and prosaic North can ave little concep tion of the signifi-cance and solemn-

in countries where a hotter sun has infused intenser warmth into the blood. Thomas H. Graham gives an interesting description of Easter as observed in Santiago and other Cuban citie

Keeping Easter in Cuba.

REPART AND A CONTRACT AND A CONTRACT

"During the entire week," he says, "all social gaiety is suspended; even business assumen a quieter aspect, but the distinctive celebrations do not begin until Holy Thursday. On that day high mass is broken off in the day high mass is broken off in the middle, and a procession of priests carries an image of the Christ-the 'Ecce Homo'--- to the cathedral. In towns where there is no cathedral some church is selected, and there the image, life size and robed in white, is carried in solemn state, the entire populace joining the procession. This ceremony commemorates the journey to Pilate's judgment hall. The image is left in the church and the people disperse fit silence. Then the devout begin the ceremony of the pilgrimage. That is, they visit fourteen churches, indicative of the fourteen stations of the cross, saying prayers at every station.

station. "Good Friday is something to be remembered. The sun rises on a city plunged in absolute stillness-still-ness of the grave. The very air is funeral. In the afternoon the pro-cession of the Holy Virgin takes place. This is really the most striking of all This is really the most striking of all the ceremonials. The sacred image, robed in black, is carried by priests and is followed by the eighteen canons of the church in singular costume, all black. On their heads they wear canonical black caps fully two and a half feet in height, and their robes have trains sixteen or eighteen feet long. Every canon is followed by an acolyte, who carries his train. Then comes the populace, men and women, still in black, all carrying lighted candles. The scene is curiously medieval and impressive.

"Through the entire day no bells have been rung. Then comes the 'Saturday of glory,' with its wonder-ful and dramatic change. At 10 c'clock in the morning all the church bells ing out joyfully, and the 'vigil' is ended. Everywhere rejoicing takes the place of mourning. Easter Sun-day is a day of music and gladness."

Origin of Easter Rabbits.

One of the quaint and interesting features of our modern Easter carniva is the appearance in shop windows, side by side with the emblematic colored egg, of a pert tall-eared rabbit, and those who cannot understand why bunny should have a place in our Easter decorations shrug their shoul-ders and think it a trick to please the children. But the legend of the Easter rabbit is one of the oldest in mythology, and is mentioned in the early folklore of South Germany. Originally, it appears, the rabbit was a bird, which the ancient Teutonio goddess Ostara—goddess of the east or of spring—transformed into a quadruped. For this reason the rabbit or hare is grateful, and in remem-brance of its former condition as a bird and as a swift messenger of spring, and of the goddess whom it served, is able to lay colored Easter eggs on her festival in the spring time, the colors illustrating the theory that when it was a bird the rabbit laid colored eggs, and an egg has always been a symbol of the resurrection, and, therefore, used as an illustration at Easter.

REVIEW OF TRAD	E.	
Business Volume Larger—Large Exports—Activity in Stocks—I uation More Hopeful.	Increa	

R. G. Dun Co.'s "Weekly Review of Trade" says: "Quarterly reviews show that, outside the immediate efshow that, outside the immediate effects of stock speculation and industrial consolidations, the volume of business has been larger this year than a year ago. Many of the usual spring demands for higher wages have been granted, or in part granted by compromise, so that no more than the usual hindrance from that source now seems probable. But some of the disputes threaten to last for some months. A little increase in foreign exports of wheat from Atlantic ports, flour included, 2,268,622 bushels, against 2,074,769 last year, served as oc-casion for a little rise, but the gain was lost later, and the week closes unchang-ed. Business in woolens is also some-what unsatisfactory, with cancellations comparatively numerous, and orders comparatively numerous, and orders smaller than were expected. The steel sheet consolidation, with President Mc-Murtry, of the Apollo works, at the Murtry, of the Apollo works, at the head, promises great importance. If this, the tin plate, hoop and national steel works make alliance with the Car-negie Company, as is reported, the whole industry will sooner or later be affected. For the present, no change appears in prices of pig, and only slight-ly more yielding in plates and bars to secure more business. But many new secure more business. But many new contracts are reported including one purchase of rails for export, and the situation is generally more hopeful. Changes in minor metals are not important, though copper grows steadily stronger, with exports of 17,010 tons stronger, with exports of 17,010 tons from only 3 ports this month. Fail-ures for the week are 150 in the Unit-ed States and 20 in Canada." Bradstreet's "Financial Review" says: Reactionary features were more promi-nent in this week's market, although bullish sentiment still seems to prevail in sneedlative quarters and nothing of in speculative quarters and nothing of In speculative quarters and nothing of a general character occurred to depress values. It is noted that bonds are in good demand and that the buying has been largely displayed in securities of good quality, which, until now, had been quoted at comparatively low values.

pover took the little girl with her.

Finally the child took heart, and one day she earnestly begged her new mother to take her out with her. The mother, however, refused bluntly, saying: "You are not smart enough. What would the people think if they were to see me with you? You are little humpback. Humpbacked chil-dren never go walking, but always stay at home."

Therenpou the little girl became very quiet, and as soon as her new mother had left the house she got on a chair and looked in a mirror and saw that indeed she was humpbacked, badly humpbacked. Then she sat again on the window sill and looked out into the street and thought of her good old mother, who, in spite of her humpback, had taken her out walking every day. The she thought again of her

"What is inside of it. I wonder!" she said to herself. "There must be something inside of such a hump as this is."

Hot Cross Buns.

Hot cross buns, so generally eaten on Good Friday, have many supersti-tions connected with them. They are kept by the English peasantry from one year to the next, being partaken of whenever sickness afflicts the fam-ily or the herds and being considered a sovereign remedy. Another legend says that if friends or lovers stand in-side the church doors before matins on Good Friday and break a hot cross

bun, and each take a half as long as they keep the pledge no enemy can come between them and their love will increase.
