STAR GLASS PLANT.
Will Not Make Glass Until September—Year's Output Will Be About \$300,000.

The negotiations that have been pending for several weeks for the Star Glass Company plant at this place, have resulted in a change in the management of the plant. We have been informed that all bonds which have been issued are to be retired and all stock certificates which have been given out are to be surrendered. No certificate of stock is to be issued or held unless first paid for in cash at its full par value. The present charter, which was granted in Delaware, is not entirely satisfactory to all stockholders and a new charter will be obtained in Pennsylvania and present one surrendered as soon as necessary compliance with our law will permit. When new charter is granted a re-election of officers under it will be held. There has been a re-organization of the company and four new directors added, making eight in all. The home directors are Henry C. Deble, A. T. McClure, Charles A. Herpel, G. M. McDonald, J. W. Foust, H. Alex Stoke and S. B. Elliott. Mr. Elliott was elected president and J. W. Foust vice-president of the board.

On account of unavoidable delay the plant will not be ready for operation until the 15th of June, therefore, the company decided not to begin making glass until September. The work of completing the plant will be continued.

Although the price of glass is low, the management of the Star Glass Company feel confident of fair profits, owing to the superior advantages at this place. At the present prices of glass the value of one year's output will not be far from \$300,000. Most of the cost of production will be paid out here, and eleven-twelfth of the stock is owned by persons in this vicinity, so the money earned by the plant will be kept in this community.
