

All the Boston and New York electric cars are to be equipped with electric heaters.

O-I-C
When a preparation has an advertised reputation that is world-wide, it means that preparation is meritorious. If you go into a store to buy an article that has achieved universal popularity like Cascares Candy Cathartic for example, you feel it has the endorsement of the world. The judgment of the people is infallible because it is impersonal. The retailer who wants to sell you "something else" in place of the article you ask for has an axe to grind. Don't stand to reason? He's trying to sell something that is not what he represents it to be. Why? Because he expects to derive an extra profit out of your credulity. Are you easy? Don't you see through his little game? The man who will try and sell you a substitute for Cascares is a fraud. Beware of him! He is trying to steal the honestly earned benefits of a reputation which another business man has paid for, and if his conscience will allow him to go so far, he will go farther. If he cheats his customer in one way, he will in another and it is not safe to do business with him. Beware of the Cascares substitute! Remember Cascares are never sold in bulk but in metal boxes with the long-tailed "W" on every box and each tablet stamped C, C, C.

The first thimbles were made in Holland. They were brought to England in 1653.

Jell-O, the New Dessert.
Pleases all the family. Four flavors:—Lemon, Orange, Raspberry and Strawberry. At your grocers. 10 cts.

Only one-fifth of the boys of India go to school, and only one-fifteenth of the girls.

A new ring for clerks will cut twice or erase pencil marks.

Lydia E. Pinkham's

Vegetable Compound cures the ills peculiar to women. It tones up their general health, eases down overwrought nerves, cures those awful backaches and regulates menstruation.

It does this because it acts directly on the female organism and makes it healthy, relieving and curing all inflammation and displacements.

Nothing else is just as good and many things that may be suggested are dangerous. This great medicine has a constant record of cure. Thousands of women testify to it. Read their letters constantly appearing in this paper.

REV. A. MORRISSEY, C. S. C., Pres.

FARM TOPICS

The Demand for Horses.
Horses are becoming higher in price every year. Six years ago the horse market was more than supplied and good horses could be had at half price. The demand for horses in the armies of the world and the improvement of the public roads in many States may be given as among the reasons for the change. The demand is mostly for good horses, and at prices which give a large profit.

Systematic Work in the Dairy.
System saves labor and reduces the cost. It is not difficult to find dairy farms with a dozen or more cows that keep the owners busy, and on which extra help is required, while other farms, containing no larger number of cattle, are operated at half the expense of the former, simply because everything has a price and each person understands and performs his duties in a systematic manner.

Profitable Poultry Raising.
Poultry raising should be profitable on farms, even if not sent to market. With beef high in price, the farmer can supply himself with fresh meat at all seasons. The difficulty is that a great many farmers do not give their fowls proper care. It is possible that over fifty per cent. of the chicks hatched on farms perish without the farmer knowing the cause or being aware of the loss until the chicks are called up and counted. Dogs, cats, rats, hawks, crows and other enemies tax the farmers severely on young chicks, and much of the loss could be avoided with more attention given to the poultry.

Sunflower Seed for Poultry.
One of the best and cheapest foods for poultry is sunflower seed. It should be cracked or partly broken, whole seeds being too large for fowls easily to swallow. These seeds are rich in flesh-forming ingredients and possess bone-making material in sufficient percentage to give fowls practically a balanced ration, so far as it goes. Of course, in itself, the seed is deficient in several essential elements, but chickens fed sunflower seed in connection with plenty of vegetable matter, having access to forage or succulent food, will thrive splendidly. Sunflowers are easily grown, yield abundantly, and while in fresh bloom are very ornamental, the large golden-crested blackheads hanging from bending branches in attractive profusion.

Location of Watercress Beds.
Watercress farmers ought to keep their beds of cress utterly free from all taint or possibility of drainage: the farther from human habitations and farmyards the better. In the clean and hospitable old country inn you often get capital watercress, and they tell you that the dark-colored leaves are better and more pungent than the light ones. Sometimes they came from neighboring watercress beds, and sometimes the children pick them where they grow wild in the water courses. Watercresses are really wholesome, and have a medicinal value. They contain a good deal of sulphur and chloride of potassium. One of the chief merits of uncooked vegetables and fruits is the presence in them of various properties, such as potash, etc., which are health preservatives. These properties are sometimes lost in the cooking of the herb or plant.—Philadelphia Record.

Obtaining a Good Field of Corn.
The yield of corn will depend largely upon the cultivation given. The roots of corn feed near the surface, and if the cultivation is shallow the roots will come as close to the surface as possible. Cultivation should be kept deep as long as rain is abundant, but when the season is dry the surface should simply be stirred in order to retain the moisture already existing. If the weeds and grass are not kept out of the rows they will rob the corn plants of both moisture and food. It is customary to give corn a certain number of "workings," irrespective of any results that may follow, but the number of times a field of corn should be worked depends upon the rainfall and the condition of the land. It may require considerable work to destroy weeds during rainy spells, but it pays to do so. Corn should never be "hald by" as long as a horse hoe can be used between the rows, as it is often after the corn is laid by that the weeds get ahead. A good yield can be obtained only by clean cultivation.

Water for Bees.
Bees need water more when rearing brood than at any other time. They rear most brood at the time of the heaviest honey flow, but also much in the early spring. If they have to go far for it much time is lost from honey gathering, and in the spring, if they fly away, they may become chilled; thus they are led to seek it at some place near by, perhaps in the puddle in the barnyard or some other filthy place. Then, too, they may seek such a place in preference to running water, because the foul water has a flavor of salt. All this may be prevented by having a barrel with water in it placed near the hives, and a leak through which the water may run out slowly and trickle down over a piece of corrugated board like a washboard, which last may be used. Put in fresh water every day, about as much as would run out in twenty-four hours, and add about one tablespoonful of fine salt for each pair. Keep the barrel covered that they may not drown themselves in it. Many bees are lost by drowning, if they have no suitable place to go for water, but have to visit a brook or pond.

REVIEW OF TRADE.

Lower Prices in Business—Consumers and Producers are Arriving at Satisfactory Understandings.
R. G. Dun & Co.'s "Weekly Review of Trade" says: Producers and consumers are getting together in more than one direction, although midsummer inactivity is emphasized by disturbed foreign relations and hesitation about attending a National political campaign. False starts are to be feared, but the dangerous optimism of last autumn is lacking, and new business is at lower prices. In iron, the depression in which has resulted in hesitation and fear in other industries, the tone is better; and in the Pittsburgh district the mills have booked a line of fair orders in bars and plates. Structural and bridge materials are better taken. The refusal of the Amalgamated Association to allow a change in the wage scale adopted in May has led to strikes at numerous bar mills and the Republic company is to dismantle some plants to secure concentration, but the non-union capacity will prevent serious scarcity. Further business in bars shows that agricultural implement makers are more active. Grey forge has fallen to \$15 at Pittsburgh, and Bessemer steel billets sold at \$19. With the uncertainty of the conference of steel companies at Chicago removed, buyers may proceed with less anxiety. Export orders advanced electrolytic copper from 10 1/2 to 10 3/4 in large lots. It is not surprising that wheat declined still further this week, for the price had been held far above the quotation ruling at this date in 1899, and crop conditions are so generally satisfactory as to assure an abundance for all home requirements and the usual amount for export. High prices have curtailed foreign buying to some extent and in four weeks Atlantic exports of wheat, including flour, have been only 7,266,436 bushels, against 8,430,431 last year. The shipments of corn make a more satisfactory comparison, in four weeks amounting to 12,700,435 bushels against 11,881,479 a year ago. Failures for the week were 231 in the United States, against 151 last year, and 28 in Canada, against 20 last year.

Killed His Fleeing Wife.
At Kamloops, B. C., a sensational murder occurred Monday. About 9 o'clock in the afternoon two Indian women were seen riding up Fourth avenue at full gallop. They were closely pursued by a mounted Indian, who was armed with a Winchester. On nearing them he raised his rifle and shot one dead. She dropped from her horse and the murderer made off toward the reservation. He was arrested and proved to be George St. Paul. The victim was his young wife. Jealousy caused the crime.

CARE OF A GUN.

Some Practical Advice From an Old Hunter.
A veteran hunter lays this down as a point which must be carefully attended to: Never under any circumstances lay away your gun at night without cleaning it. Never mind how tired you are, attend to it at once. There should be no "next day" about it. Not a few of the older hunters would profit by accepting this advice. The veteran quoted above says he got this idea from his father, who loved his guns and dogs almost as well as he loved his children. The old man gave his boy a single barreled muzzle loader, which was for many a day the youngster's treasure of treasures, and was never allowed to get rusty. Before being put away for the winter it was carefully cleaned and oiled and was once in a while taken down and examined. If a speck of rust appeared anywhere it was at once removed. After an outing among wild pigeons, squirrel or grouse he removed the barrel from the stock, swabbed it out with hot water and wiped it out with a clean rag. Then he fired a little powder, just to be sure that no moisture was left, after which an oil rag was used assiduously. Then stock and barrel were rejoined and the weapon was put away for the night. The breech-loader is much less troublesome, but the same principle obtains in both cases. By using care such as is indicated this hunter has for fourteen years kept a gun in first class condition, though it has done a great deal of work.

Spectre of the Broken.
The summit of the Broken, or Blocksberg, the highest of the Harz mountains in Prussian Saxony, presents a singular optical phenomenon eight or nine times during the year. It is usually seen at sunrise or sunset and consists of a gigantic projection of the observer, or observers, upon misty clouds, which rise out of the valley on the side of the mountain opposite to the sun. Sir Walter Scott wrote of it: "Among the various legends current in that wild country there is a favorite one, which supposes the Harz to be haunted with a kind of tutelary demon, in the shape of a wild man of huge stature, his head wreathed with oak leaves, and his middle cinched with the same, wearing in his hand a pine torn up by the roots. It is certain that many profess to have seen such a form, traversing with huge strides, in a line parallel to their own course, the opposite ridge of a mountain when divided from it by a narrow glen; and, indeed the fact of the apparition is so generally admitted that modern skepticism has only found refuge by ascribing it to optical deception."

Lobster Salad.
Pick the meat from a can of lobster or from a two-pound boiled lobster into fine flakes; pile onto a dish and cover with this dressing: Beat three egg yolks, add one teaspoon salt, pepper, cayenne pepper, one tablespoon melted butter, two-thirds cup hot vinegar; then add one teaspoon mustard mixed with a little milk; when boiling stir in one cup milk; beat to smooth paste; pour over meat and let become cold before garnishing with parsley, lemon quarters and lobster claws.

Costly Wheels.
It is said that Queen Margherita has the most beautiful bicycle in the world. The wheels are of gold, and the frame is richly inlaid with jewels and mother-of-pearl. Lady Dudley, one of the famous beauties of England, has a white enameled wheel, whose handles are of ivory.

All things die not; while the soul lives, love lives; the song may be now gay, now plaintive, but it is deathless.—Mary Johnston.

Don't, Don't

keep forever taking harsh cathartics, as salts, laxative mineral waters, and unknown mixtures. The way to cure constipation, biliousness, sick headache, dyspepsia, and other liver troubles is to take laxative doses of the best liver pill you can buy, and that's Ayer's. Ayer's Pills will never

Abuse Your Liver.

They are laxative pills, purely vegetable; they act gently and promptly on the liver, producing a natural, daily movement.

25 cents a box. All druggists.

*For ten years I suffered terribly with stomach trouble. I never could retain all my food and had many hard hemorrhages from the stomach. I then began taking Ayer's Pills. They promptly cured me, and I feel extremely grateful to you."—JOHN GOOT, Proprietor Washington House, Washington, Ia., March 11, 1900.

TIMELY FALL
Of Feathers Aided Thieves in Escaping From the Police.
New York Cor. Chicago Inter Ocean: A friendly cloud of goose and rooster feathers that settled down over Delancy street yesterday afternoon, enabled three thieves to escape from a pair of confused detectives. The thieves had been ransacking the rooms of a burning tenement house at No. 217 Delancy street, from which the tenants had fled, panicstricken. In the opinion of the police there is no meaner thief than the one who will rob a family turned out by fire, and the police, who figured in this case did what they could to relieve their feelings by kicking the thieves half way down the flight of stairs to the street, intending to grab them again on the steps. But as the thieves reached the steps a score of feather beds that had been thrown out of the Hebrew tenements upstairs by the firemen plunged down on the sidewalk and burst. Feathers rose up and swirled about in eddies. Fire department wagons and horses were covered with them, and so were hundreds of Hebrews who were in the streets, enjoying the last hour of a forty-eight hour holiday. The thieves jumped into the cloud of feathers and escaped. After the cloud had cleared away the detectives yanked Morris Rosenstein and leader Goodman out of the crowd and locked them up on suspicion that they were pickpockets.

Pilgrims Visit Holy Places.
A band of pilgrims left Scotland a few days ago for Rome. At London they were met by Bishop Chisholm of Aberdeen, who used to be their leader, in the absence of Archbishop Eyre of Glasgow and Archbishop Macdonald of Edinburgh, who are both in ill health. The pilgrimage is in accordance with a decree of the pope to the effect that the holy year should be celebrated by the visit of pilgrims to various holy places.

A new delicacy is promised for the British breakfast table in the shape of American tea.

BILE IN THE BLOOD

No matter how pleasant your surroundings, health, good health, is the foundation for enjoyment. Bowel trouble causes more aches and pains than all other diseases together, and when you get a good dose of bilious bile coursing through the blood life's a hell on earth. Millions of people are doctoring for chronic ailments that started with bad bowels, and they will never get better till the bowels are right. You know how it is—you neglect—get irregular—first suffer with a slight headache—bad taste in the mouth mornings, and general "all gone" feeling during the day—keep on going from bad to worse until the suffering becomes awful, life loses its charms, and there is many a one that has been driven to suicidal relief. Educate your bowels with CASCARETS. Don't neglect the slightest irregularity. See that you have one natural, easy movement each day. CASCARETS tone the bowels—make them strong—and after you have used them once you will wonder why it is that you have ever been without them. You will find all your other disorders commence to get better at once, and soon you will be well by taking—

THE IDEAL LAXATIVE

Cascarets

CANDY CATHARTIC
