Notes From the Paris Exposition. "The Singer Manufacturing Com-pany, of 140 Broadway, New York, show their usual American enterprise by having a very creditable exhibit cated in Group XIII., Class 79, at the Paris International Exposition, where they show to great advantage the cel ebrated Singer Sewing-Machine which is used in every country on the globe. both for family use and for manufac-The writer was turing purposes. highly pleased with this display and observed with much setisfaction that It was favorably commented upon by visitors generally.

The Grand Prize was awarded by the International Jury to Singer Sew-ing-Machines for superior excellence in design, construction, efficiency and for remarkable development and adaption to every stitching process used in either the family or the factory.

Only One Grand Prize for sewing machines was awarded at Paris, and this distinction of absolutely superior merit confirms the previous action of the International Jury at the World's Columbian Exposition, in Chicago, where Singer Machines received fiftyfour distinct awards, being more than were received by all other kinds of

sewing machines combined. Should it be possible that any of our readers are unfamiliar with the celebrated Singer Machine, we would respectfully advise that they call at any of the Singer salesrooms, which can be found in all cities and most towns in the United States."

Every year on June 39 the pensioners of the Civil War are counted. In June, 1808, the number on the lists was 993,714. Last year there were about 2,000 less, and this year also there are fewer than in 1898.

TALES OF PLUCK AND ADVENTURE.

Daronago do Capaciona da

NOTED BEFORE THE PROPERTY OF T Both Prompt and Plucky.

ART of the process of "lumbering," says a Canadian gentleman, consists in floating the timber down the river to the mills. This is called "stream driving," and is a dangerous pursuit, for frequently the logs will get "jammed." and the task of getting them free and starting them on their course again is one occasionally attended with fatal necidents.

When the logs get jammed near a rapid or fall, the task, always a risky one, becomes especially hazardous. On a certain occasion, while with a

party of lumbermen, I witnessed one of the pluckiest rescues it is possible to imagine, performed by a boy of only

The lumbermen were engaged in driving logs down a turbulent river to the mills some forty miles below. On the day I speak of, as they were nearing a series of rapids, a few logs became turned about by the strengt in such a way that they obstructed the pussage of the rest, and the whole

'drive," as it is called, became Jammed. The head lumberman and a boy of fourteen, named George, were the only ersons near at hand at the moment. and the former, being a tall, powerful man, decided that it would be neces sary for him to cut away one of the destructing logs which were just on the edge of the rapids,

So, stepping out on to the floating mass of timber with his axe, he commenced his work, but, alas! before he had out half way through the log the pressure of the rest of the timber broke it and the whole drive shot into the rapids. The lumberman sought to save himself by springing from one loto another towards the shore, but, missing his footing, he slipped through the logs into the water.

The boy saw the accident, and with out stopping to call for assistance leaped nimbly on to the drive, which was now fairly rushing through the water, and bounded from log to log till be had reached the point where the man had disappeared.

He was only just in time, for a proecting limb on one of the logs had caught the lumberman's coat in such a way that the poor fellow was being carried along under the water without being able to extricate himself.

Luckily the boy knew bow to man age a floating piece of timber, and sitting astride of the log he by skilful movements of his feet disengaged the cont of the drowning man and raised his head above the water.

But the danger was not over yet. They were gradually approaching the falls, which meant certain destruction to both, and the boy wrought like a Trojan to work the log out of the

Holding the lumberman by the collar, he paddled with his feet and pushed against the other logs until at last he reached a shallow part of the river where he could touch bottom.

Then the danger was past, and amid the cheers of the other lumbermen who had by this time arrived on the scene, the little hero dragged the half-unconscious man to the bank,

Indians Capture a Safe.

A band of Apache Indians once captured the United States paymaster's safe, and the story is related in the New York Sun by an ex-sergeant of cavalry. At that time the paymaster rode in an ambulance with the safe, and was escorted by a guard of six sion of his next funeral procession mounted men. One night this guard was attacked by a large force of Indlans. Two men were killed, and the ambulance with the safe was captured. The safe contained about seven thousand dollars in greenbacks. It weighed four hundred pounds, and had a combination lock. The Apaches had never seen a safe at close quarters before, but they knew it contained money, and they wanted to get it.

They first pounded off the knob with stones, thinking the door could then be pried open. The attempt was a fallof course, and then they tried their tomahawks on the chilled steel. 600 packages away from St. Joseph and hoping to cut a hole in it. They had Benton Harbor, Mich., daily. een iron softened by fire, and their third move was to give the safe a three-hour roasting. They threw big rocks upon it while it was still hot. and it was dented here and there; but they were as far from the money as ever.

The safe was next dragged up the side of a mountain and tumbled over a precipice two hundred feet high. The Indians expected to see it burst open. but the only damage done was to brenk off one of the wheels. The safe was left soaking in the river for four days, and great was the Indians' disappointment at finding themselves still baffled.

Next they tried gunpowder, but, knowing nothing of blasting, they brought about an explosion which burned half a dozen warriors and left the safe none the worse.

The redskins worked over the safe off and on, for a month or more, but failed to get at the inside. In disgust they finally left it in a deep ra-

Fourteen months later peace came and we accidentally got track of the safe. It was found lying in the bed of a creek with a great pile of driftwood around it. It was a hard-looking safe, and we felt slight hope that the money

had escaped fire and water. When we got it to the fort, however,

dollar. When the Apaches heard of our getting the money one of them who had worked hardest on the safe growled at me:

"White man some fool, Indian more fool, and iron box great big, big fool!"

Adventure With Yaks, While in the highlands of Northern Tibet the Swedish explorer, Sven He din, and his followers, came upon an exceptionally large herd of yaks, grazing in a narrow ravine. Islam, one of the men, rode toward them and fired. Thereupon the herd divided, the greater part fleeing up the mountains, while the rest, fifty or more, in tightly-packed drove, made straight for Hedin and his companions.

We were alone and without weapons says the narrator, and felt that we were in a pretty tight fix, for the animals seemed to be charging directly down upon us. They were enveloped in a perfect cloud of dust. We could hear the eracking of their hoofs, and were blindly conscious that in another second or so we should be crushed under the avalanche of their irresist lble onset.

It turned out, however, that they did the leader become aware of us, which he did at about a hundred paces distant, than he swerved aside, and EGGS. had not yet observed us, for no sooner was instantly followed by the whole

This gave Islam his opportunity. He nstily dismounted and placed himself In ambush, and fired at a venture right into the middle of the troop. The bullet struck a bull in the fore-leg. The animal, mad with fury, charged straight upon the sportsman, Islam flung himself into the saddle and sct off as fast as his enfeebeled horse was able to gallop.

The yak, however, although running on three legs, caught him up after two or three minutes' chase; but just as he was on the point of tessing horse and rider on his horns, Islam, who saw the danger, turned in his saddle and took alm.

Despite his excitement, his nim was good. The bullet penetrated the region of the heart, and thus put an end to the contest. If Islam's last shot had failed, he would infalliably have been lost. The chase of the wild yak is perilous, and does not always have so happy an ending.

The Philadelphia North American contains the following illustration of the resourcefulness and persistence of a nurse, "Miss Rebecca Robinson, who was recently graduated from the Nurses' Training School of the Jewish Hospital, Philadelphia, is the heroine of an interrupted tragedy at Atlantle City. Taking an early morning stroll along the beach Miss Robinson met near Mississippi avenue a party of men carrying between them the limp body of another man. The young nurse hastened toward the group and asked what had happened. 'The man has just been drowned,' replied one of the group, 'and we are taking him to the hotel at which he was staying.' 'Let me see him,' she said. The carriers were disinclined to accede to her request, but after persistent appeals their burden was laid at the feet of the nurse, who at once began scientific methods of artificial respiration. Then hot stimulant and spirits of ammonia were secured at her direction and applied to the blue lips of the patient. After a baif bour of vigorous work the supposed corpse suddenly opened his eyes. In another half-hour he was able to get upon his feet. When the rescuer was looked for she had disappeared. The man who was saved, however, still hopes to meet his preserver, and thank her for his life, with her restorative powers to win him back to life."

Thrilling Experience With a Mad Dog. The recent mad-dog scare in Wheeling, W. Va., and vicinity reached alarming proportions. The Mayor ordered all unmuzzled dogs shot, and any citizen is privileged to act as executioner. Twelve dogs with symptoms of rables were killed, and two men bitten by mad dogs died. Charles Mc-Dade, a baccagemaster on the Raltimore and Ohio acommodation, had a frightful experience. A dog was put into the baggage car at Seventeenth Mile Switch. After a few minutes the dog seized McDade by the band, sinking his teeth clear through the palm. The victim was alone in the car, and the dog held on for twenty minutes till the conductor happened to look into the car. He called for assistance, and the dog was choked off. At Woodlands, when McDade went to put the dog off, it again seized him and tore the flesh from his hands horribly. Even after the dog reached the ground it attempted to get back into the car and followed the train. It finally made off into the woods. McDade's hands swelled to enormous size.

Mrs. Kruger's Wardrobe

Where is the woman to be found in America whose husband is said to be worth \$25,000,000 who will do her own dressmaking? Such a one is "Tanta' Kruger, wife of the President of the South African Republic, who, it is said, never has more than three dresses at any one time, and they are always black. She is satisfied with two hats, which, like the dresses, are made by

The time required for a journey round the earth by a man walking day and night, without resting, would be 428 days; an express train, 40 days; sound, at a medium temperature, 32 1-2 hours; a cannon ball, 21 3-4 and blew off the door, there were the seven thousand dollars as sing as you a second; and electricity, passing over please. The bills were somwhat damaged, but Uncle Sam redesimed every of a second.

TRADE REVIEW.

Fine Outlook for Business During Balance the Year-Prices Generally Steady. Minors' Strike Held Trade Back.

R. G. Dun & Co.'s "Weekly Review of Trade" says: The anthracite coal set tlement has been delayed another week and the effect upon business in the East is more apparent, though distribution in the West and South seems no less active. Prices are slightly lower in iron, wool, coal and sugar, but the produce and textile markets are firm, and in all departments of business an effort by distributors to increase transactions. by distributors to increase transactions would quickly advance prices. There is little ordering ahead in any kind of merchandise, but steel rail makers look for contracts for about 2,000,000 tons after election. Pig iron has declined on small orders, and was also depressed by the cut in Southern freight rates. Fin-ished material and structural lines are steady, and export buying does much to prevent duliness. Contracts for cars, bridges and plates for shipbuilding were signed during the week, and rails were sold at \$25 to domestic roads, while a small amount was taken by Italy. Wheat is steady. For the week Atlantic exports were 3252004 bushele. Atlantic exports were 3,252,004 bushels, flour included, against 3,252,062 in 1899. After the end of September, there was a decline in the price of corn for the current month's delivery, but elevator prices remained firm, and receipts for the week were only 4,840,802 bushels, against 7.679,540 last year, while At lantic exports were 2,144,610 bushels against 2,002,232 a year ago. Failures for the week were 208 in the United States, against 134 last year, and 23 in

Canada, against 20 last year. Bradstreet's says: Despite some ir regularity both as to demand and prices due partly to warm, rainy weather, but likewise a reflection of the hesitancy to embark largely in new business pending political events, the general tone of trade is a favorable one, and confidence as to the outlook for husiness in the remainder of the year. for business in the remainder of the year notable. Wheat, including flour, shipments for

wheat, including flour, shipments for the week aggregate 4,450,167 bushels, against 4,242,810 bushels last week, 5,-183,398 in the corresponding week of 1899; 5,497,224 in 1898; 4,835,641 in 1897, and 4,050,772 bushels in 1896. From July 1 to date this season wheat ex-ports are 47,221,667 bushels, against 55,-600.413 last season, and 52,498,121 in 1808-99. Corn exports for the week aggregate 2,364,240, against 2,156,171 last week, 4,238,740 in this week a year ago. 3,564,710 bushels in 1808, 2,109,510 in 1807, and 2,772,000 in 1806. From July 1 to date this season corn exports are 44,311,661 bushels, against 60,017,366 last season and 30,650,948 in 1808-09.

Fire destroyed the Shamokin (Pa.) Milling Company's four buildings and their contents. Loss, \$50,000, uninsur-ed. The fire was of incendiary origin.

There are more muscles in the tail of a cat than in a human hand.

"I could nt Sew another Stitch to Save my Life."

gorgeous costume flashed beneath the brilliant lights of a ball room. The queen of society is radiant to-night.

The nervous hands of a weak woman have toiled day and night, the weary form and aching head have known no rest, for the dress must be finished in time.

To that queen of society and her dressmaker we would say a word. One through hothouse culture, luxury and social excitement, and the other through the toil of necessity, may some day find their ailments a common cause.

Nervous prostration, excitability, fainting spells, dizziness, sleeplessness, loss of appetite and strength, all indicate serious trouble, which has been promoted by an over-taxed

For the society queen and the dressmaker alike, there is nothing so reliable as Lydia E. Pinkham's Vegetable Compound to restore strength, vigor, and happiness.

Mrs. Lizzie Anderson, 49 Union St., Salem, N. J., writes:

"DEAR MRS. PINKHAN:—I feel it is my duty to write and tell you how grateful I am to you for what your medicine has done for me. At one time I suffered everything a woman could. I had inflammation of the ovaries, falling of the womb, and leucorrhess. At times could not hold a needle to sew. The first dose of your Vegetable Compound helped me so much that I kept on using it. I have now taken six bottles and am well and able to do my work. I also ride a wheel and feel no bad effects from it. I am thankful to the Giver of all good for giving you the wisdom of curing suffering women. I recommend your medicine to every woman troubled with any of these diseases."

Mrs. Sarah Swoder, 103 West St., La Porte, Ind., writes:

"Dear Mrs. Pinkham:—It gives me great pleasure to tell you how much good Lydia E. Pinkham's Vegetable Compound has done for me.

"I had been a sufferer for years with female trouble. I could not sew but a few minutes at a time without suffering terribly with my head. My back and kidneys also troubled me all the time. I was advised by a friend to take your medicine. I had no faith in it, but decided to try it. After taking one bottle I feit so much better that I continued its use, and by the time I had taken six bottles I was cured. There is no other medicine for me. I recommend it to all my friends."

REWARD we are constantly publishing, we have with the National City Bank, of Lynn, Mann, Saccoo-be paid to any person who will show that the above a are not genuine, or were published before obtaining appecial permission.—LYDIA E. PENKHAS MEDICIES CO.

Biblical Customs in Abyssinia.

I have alluded to the survival in Abyssinia of the manners and customs of Bible times, says a correspondent of a London newspaper. You have only to stop at a well to realize the kind of scene at which Rebecca figured. conception of the word, it is not a at all. Sometimes it is a pit in at all. Sometimes it is a pit in the sand, about 15 feet deep. At the bot-tom of this is a hole as big as a wash-hand basin, full of water, which has to be ladled out with a mug or cocoanut shell. The basin keeps on replenishing itself from the springs except in time
