A remarkable feat was performed in the machine shop yesterday. An Alle-gheny passenger engine which was sent here recently for repairs, was completd yesterday and was ready to be to the round house to have its tank coupled on. Instead of pulling the en-gine by a rope as heretofore, the employes in the gang of Foreman Beckley connected pumps to the engine and filled the boiler with air. This is the first time the feat has been performed here and it is altogether likely that this method will be used indefinite ly hereafter.-Renovo News,
