The printer's dollars—where are they? A dollar here and a dollar there, scattered over numerous small towns, miles and miles apart. How shall they be gathered in? Come home; you are wanted. Come in single file that we may send you forth again to battle for us and vindicate our credit. Reader, are you sure you have not one of the printer's dollars sticking to the bottom of your trousers pockets? Feel down and see if we are right.—Punxsutawney Republican.

Letter to Dr. A. H. Bowser, Reynoldsville, Pa.

Dear Sir: You understand chemistry; how'd you like to earn \$100? Devos lead and zinc—that's the name of our paint that lasts twice as long as lead and oil—is made of white-lead, white-zinc, its color, turpentine dyes, and linseed oil.

If any chemist finds anything else in this paint, we'll pay his bill and \$100 besides.

It's nobody's business what we put in our paint, of course; but we want it known. For lead and zinc and linseed oil are the stuff to paint with; and lead alone is not.

We want it known that one word describes the best paint in the world and that word is Devos.

Are you going to paint?
Yours truly,
F. W. DEVOS & CO.
