Letter to Thomas E. Evans, Reynoldsville, Pa.

Dear Sir: It is your business to know what materials to put into a house as well as to plan it. Of course you know the effect of zinc on lead in paint—toughens it. Do you also know the greater effect of zinc ground in?

For a painter can't grind; he can only mix. Devco lead and zinc is thoroughly ground in oil. The result is an intimate mixture.

Your painter can only mix; he can't grind; there's no need of grinding by hand. He should buy lead and zinc ground together in oil.

Devco lead and zinc is that; the proportions are right besides. It outlasts lead and oil two to one, and costs no more—even less; for hand work can't compete with machine work.

Yours truly, F. W. DEVCO & CO.
