INSOMNIA is a forerunner of nervous prostration; what organism is strong enough to stand up under the strain of sleepless nights? It is plain that nothing in the world can possibly take the place of restful sleep, yet many try to elude an existence without this sustaining power. Their nerves are in such a state of tension that sleep is an impossibility, or at best is a series of hideous dreams. It is not strange that physical and mental weakness, amounting soon to complete prostration, follows inability to sleep. There is no let-up to the strain. Vital forces are drawn upon, confirmed invalidism results.

The recuperative power of natural sleep is wonderful. Complete physical and mental exhaustion gives place, after a few hours of quiet slumber, to a full renewal of energy. The fatigue of body and mind disappears entirely while all the muscles are strong and the nerves absolutely calm.

Sleep is the indication given by Nature as a guide to human plans to restore health. It shows that there are inherent in the wonderful human organism powers of recuperation which must have opportunity to assert themselves. Based on this clear demonstration, Dr. Greene's Nervura blood and nerve remedy was constructed by Dr. Greene to help Nature combat the ills that attack men and women. What no amount of powerful drugs could possibly accomplish, can be successfully and promptly effected by healthy blood and nerves, the kind of blood which flows in strengthening flood to every portion of the body, the condition of nerves which permits awakened Nature to seize its opportunity to restore to perfect health.

Mrs. FLORENCE TAYLOR, of 4 Courtland Place, Bridgeport, Conn., writes:

"For four years I was troubled with nervous debility and hysteria in a most aggravated form. It caused sleeplessness and mental depression, and for months I was confined to my bed. My constitution wasted and I totally lost my appetite. I had many doctors, but they failed to give me any relief. I was advised to try Dr. Greene's Nervura blood and nerve remedy. I was in a terrible condition when I began its use, and almost immediately there was a wonderful change come over me. I regained my appetite, the dizziness in my head departed; it renewed my interest in life and made me feel, in fact, like another person. After taking six bottles I bankfully proclaimed myself strong and well. These six bottles did for me what hundreds of doctors and numerous physicians failed to do."

Dr. Greene's Nervura is the Remedy that Cures.

Full explanation of these matters given by Dr. Greene on request, without charge. Dr. Greene's address is 38 West 43rd Street, New York City. Consultation with him either by call or letter is absolutely free.

REVIEW OF TRADE.

Business at the Opening of the Year Very Erisk—A Small Decline in Wheat.

R. G. Dun & Co.'s "Weekly Review of Trade" says: In spite of the interruptions of the holidays, and of the unusually heavy annual settlements in all lines of business, the new year opens with indications of further progress. No alteration has occurred in quotations of iron and steel products, and this industry is on such a firm foundation that most large concerns have maintained wages at the old scale, instead of making the reductions anticipated. Iron ore prices are also unchanged, and no action is now expected until March, although a lower rate was looked for early in January. Coke is firmly held at Connellsville, and there are fewer idle ovens, while the fall in prices appears confined to inferior qualities at outside furnaces. Pig iron sells freely for delivery up to April and there is no indication of weakness. All finished products are eagerly sought; many large contracts have been placed for structural material and others are under consideration. An American company is the lowest bidder for the large bridge at Sydney harbor, Australia. The purchase of 700 acres near Pittsburg by a leading steel company indicates great enlargement of its plant. Aside from reduction of wages at blast furnaces in the Mahoning and Shenango valleys, the week's news is most encouraging in this, the greatest of American industries.

Bradstreet's says of the grain movement: Wheat, including flour, shipments for the week aggregate 3,914,301 bushels, against 3,868,165 bushels last week. From July 1 to date wheat exports are 28,665,755 bushels, against 28,665,755 bushels last season and 28,388,977 bushels in 1898-99. Corn exports for the week aggregate 4,470,521 bushels, against 4,011,105 bushels last week. From July 1 to date corn exports are 98,710,690 bushels against 115,627,181 bushels last season and 85,791,627 bushels in 1898-99. Business failures for the week number 268 in the United States, against 213 last week, 220 in 1900, 237 in 1899, 333 in 1898 and 488 in 1897.

THE CHANGE OF LIFE

In the most important period in a woman's existence. Owing to modern methods of living, not one woman in a thousand approaches this perfectly natural change without experiencing a train of very annoying and sometimes painful symptoms.

Those dreadful hot flashes, sending the blood surging to the heart until it seems ready to burst, and the faint feeling that follows, sometimes with chills, as if the heart were going to stop for good, are symptoms of a dangerous, nervous trouble. Those hot flashes are just so many calls from nature for help. The nerves are cry-

ing out for assistance. The cry should be heeded in time. Lydia E. Pinkham's Vegetable Compound was prepared to meet the needs of woman's system at this trying period of her life. It builds up the weakened nervous system, and enables a woman to pass that grand change triumphantly.

"I was a very sick woman, enused by Change of Life. I suffered with hot flashes, and fainting spells. I was afraid to go on the street, my head and back troubled me so. I was entirely cured by Lydia E. Pinkham's Vegetable Compound."—Mrs. JENNIE NOBLE, 2010 Keyser St., Germantown, Pa.

Lived Before the Pharaohs.

There has been brought to the Hall of the Dead in the British Museum, says the New York Press, the body of a man who lived in Egypt in time long before the days of Menes, the first king of the United Egypt. It was probably 7,000 years ago that this man roamed about, hunting on the shores of the Nile with his weapons of flint. When he died his body was treated to a preparation of bitumen and placed in the tomb from which the explorers took it. The tomb was hollowed out of the sandstone on the west bank of the Nile, in Upper Egypt, and the body rests in the British Museum in a model of the tomb. The mummy lay on its left side with its knees drawn up and its hands over its face. The grave was covered with a slab of unworked stone, and in it, beside the body, were disposed flint knives and several vases partly filled with the dust of funeral offerings. The indications are that the man belonged to a light-skinned, fair-haired people. He was of the race which came into Egypt in the earliest times, when the setting of the Nile made a land capable of cultivation. These people might be called the aboriginals of Egypt, and remains of their settlements are found on the west bank of the Nile.
