Owing to the late conflagration it was necessary for the School Savings Bank to suspend business for a short time. But its doors were reopened Monday morning and the business done shows that its financial supporters have the greatest faith in the reliability of the institution. The this system of banking has been in operation only one year, yet the pupils of the school have over \$1,000 deposited to their account. This record speaks well for the saving habits of our younger ones, and seems to testify to the fact that there are those in our midst who are laying the foundation of a fortune which in after life will elevate them to that sphere of eminence which is now occupied by the financiers of our nation.

Hitherto we have restrained from doing any "roasting" in this column, but as others are doing it in a manner somewhat at variance with our well founded convictions on the subject, we will remark as a timely suggestion, that 75 degrees F. of the kinetic molecular energy imparted by the combustion of coke is an adequate sufficiency to produce that sensation we term warmth. More anon, Mr. Janitor.

It is with much joy and a secret satisfaction that we view the growing intimacy between the dignified personae of the high school and the members that constitute that other branch of our educational institution—the preparatory department. The beneficial results obtained from this social intermingling are being manifested in the literary work of the schools.

The next notable event on the catalogue of literary projects is the mock trial to be conducted under the auspices of the joint literary societies on Friday, March 15th. One of the masculine members of the high school has been charged by a "prep" with filching his stud—and seeks satisfaction through the strong arm of the law. Those who attend are assured of an enjoyable entertainment for the afternoon.

At this writing it seems evident that an appeal will have to be made to the court to grant an injunction prohibiting some of the juniors from signing names other than their own to their correspondence.

The text books have now arrived, and have been distributed among the several rooms.

The Seniors will begin an eight weeks course in political economy this week.

The officers of the literary societies assumed their respective offices at the last meeting. Owing to the inclemency of the weather the serving of refreshments was dispensed with.

Strikes a Rich Find.

I was troubled for several years with chronic indigestion and nervous debility," writes F. J. Green, of Lancaster, N. H. "No remedy helped me until I began using Electric Bitters, which did me more good than all the medicine I ever used. They have also kept my wife in excellent health for years. She says Electric Bitters are just splendid for female troubles; that they are a grand tonic and invigorator for weak, run-down women. No other medicine can take its place in our family." Try them. Only 50c. Satisfaction guaranteed by H. Alex. Stoke, druggist.

If you want a perfect fit, order suit from John Flynn, the tailor.

Soft Coal Market.

Coal Trade Journal.

The soft coal trade does not rally very quickly, and one must wait for what is called the spring activity or time of making the annual contracts, before there will be much that is new or progressive in this branch of the fuel industry; at present it seems as if there were the necessity for a little slowing up in the output; mines working to full capacity and new ones opening up on every hand make an ample supply; it is necessary that the carrying companies exercise a firmness in regard to rates, and the promised increase for the first of next month ought to be a fixture to give a needed stability to prices; there are plenty of rumors afloat as to the prices at which soft coal can be had at seaboard loading ports, which do not put the sellers in a very favorable light; when there shall be an opening up of spring trade one may look for firmer figures all round; just now soft coal is quoted as dull in many parts of the country.

At Buffalo, soft coal shippers, especially the Pennsylvania and Buffalo, Rochester & Pittsburg, are having a hard time to get enough coal forward to keep customers reasonably satisfied. At the office of Harry Yates, of the latter company, it was stated that double the amount of coal received from the mines could be sold if it could be obtained. The demand for coke continues strong and prices remain firm and unchanged on all grades of fuel.

Rathmel.

Miss Eva L. Dunning, America's most gifted reader, will be at the K. of P. hall Monday evening, March 18th. Columbus (Ohio) State Journal says of her: "An elocutionist of rare talent and ability. She is particularly pleasing in her comic sketches. Her voice is pleasant, sharp and clear. To her art Miss Dunning adds charm of person and easily ranks in the front of her profession. A sprightly little brunette."

NOTICE

To All Who Want to Buy or Have a Carpet to be Woven.

I am ready to do it in a very short time and my work of the past few years recommends itself. I have bought an improvement for my loom, making it a four-harness (instead of two), but prices will stay the same for weaving as before, that is 10 cents a square yard, and I will weave it from 30 to 42 inches in width to fit your rooms at that price. I keep 21 colors of chain on hand (call or send for sample) and when I furnish chain, all of which is of the best 5-ply, for carpet 13 1/2 threads to the inch I charge only 20c.; 15-thread for 22c.; and 18 threads to the inch 25c., which includes weaving and chain. For out-of-town people on 20 yards or over will pay freight one way. I also weave
