Much has lately been written of Edward VII.'s connection with certain leading Jewish families of London. In 1881 he was the first member of an English royal family to attend a Jewish wedding. This was at the Central Synagogue, when Leopold de Rothschild married Mile. Marie Porugin. He also witnessed the marriage contract together with Baron Alphonse de Rothschild.

## WOMEN MUST SLEEP.

### Avoid Nervous Prostration.

If you are dangerously sick what is the first duty of your physician? He quiets the nervous system, he deadens the pain, and you sleep well.

Friends ask, "what is the cause?" and the answer comes in pitying tones, nervous prostration. It came upon you so quietly in the beginning, that you were not alarmed, and when sleep deserted you night after night until your eyes fairly barned in the darkness, then you tossed in nervous darkness, then you tossed in nervous agony praying for sleep.

You ought to have known that when you ceased to be regular in your courses, and you grew irritable with-out cause, that there was serious

trouble somewhere.
You ought to know that indigestion, exhaustion, womb displacements, fainting, dizziness, headache, and backache send the nerves wild with

backache send the nerves wild with affright, and you cannot sleep.

Mrs. Hartley, of 221 W. Congress St., Chicago, Ill., whose portrait we publish, suffered all these agonies, and was entirely cured by Lydia E. Pinkham's Vegetable Compound; her case should be a warning to others, and her cure carry conviction to the minds of every suffering woman of the unfailing efficiency of Lydia E. Pinkham's Vegetable Compound.

Glasgow, Scotland, has the higher chimneys in the world. One of thes -the Townsend shaft at Port Dunda has a total height of 468 feet, with a diameter at the base or 32 feet, and at the top of 13 feet 4 inches. The atructure weighs about 8,000 tons. The other stack—that at St. Rollox, Glas-gow—has a total beight of 445 feet and 6 inches, with a diameter at the base of 50 feet and at the hop of 13 feet 6 inches. There is a chimney at Cologne which is 441 feet high, with a diameter at the square base of 39 feet and at the round top of 11 feet 6 tuches its weight is about 5,560 tons. Another towering chimney is at the Royal Smelting works, near Freiburg, in Saxony. It is built up to the top of a hill, where it stands isolated, and is 400 feet high. The most costly chimney in the world is in Bradford, Eng. at the famous Manningham mills. The shaft is a remarkable structure, archifecturally, and is the most prominent feature in the landscape. It is 256 feet 6 inches high, and 21 feet square. It contains 8,000 tons of material and cost \$50,000. A peculiarity of the shaft is that it is as broad at the top as it is at the bottom, but the interior is wider at the summit than at the base, the dimensions being 13 feet and nose, the dimensions being to feet and 10 feet, respectively. In addition to possessing the most expensive chim-ney, Bradford has the gloomy distinc-tion of having experienced the most terrible chimney disaster on record— that of the Newlands mills.

The habit of drinking petroleum is spreading to an alarming extent in many districts in France. It has apparently been prevalent for some considerable time without being recognized, and is quite as persistent a habit as alcoholism. Though petroleum does not make the drinker brutal, but morose, there is no doubt that, so far as the victim of the vice himself is concerned, it is even more deadly than ordinary drunkenness.

DECREASE IN FAILURES.

Close of the Year's First Quarter Seem Most Encouraging-The Crop Out-Look Very Good.

Bradstreet's says: A rather more cheerful tone is apparent in general trade, and the close of the first quarter of the year finds the business world contemplating a total trade for that period in many cases in excess of all preceding periods, while the future, with some exceptions, is viewed with apparent confidence. The advance of the spring season is, of course, partly responsible for the feeling above mentioned, allowing as it does, better op-portunity for a wider range of operations than was possible in the winter

First indications as to crop prospects and outlook are in the main favorable. Rank clearings are showing steady galas over unprecedentedly large volume totals a year ago. Railway earnings testify to an immense volume of Ings testify to an immense volume of merchandise passing into consumption, and, as for some time past, the active demand at advancing prices for iron and steel is regarded as a reliable index of good general trade to come. Building is becoming more active, and promises this spring to be the heaviest for many years. Hence the lumber trade and all lines of builders' hardware note continued or growing activity. The demand in the latter line and in agricultural implements at the west

in agricultural implements at the west is, in fact, most notable.

Dun's "Weekly Review of Trade" says: The condition of general busisays: The condition of general business is in most respects satisfactory. The dry goods trade is gloomy, but from every other department of business reports are cheerful, and the outlook for a good spring retail turn-over is encouraging. Aside from the ex-pected advance in structural shapes, there is comparative steadiness in iron and steel. After more or less advance every week for two months, it is gratifying to find that Bessemer pig remain-ed seven days without alteration. The tone is firm and producers report all recent sales for early delivery. While exports of cruder forms are light, other countries having reduced prices until their competition is 'elt, there is no diminution in the foreign demand for diminution in the foreign demand for bridge material and other finished products. Consolidation of valley furnaces is practically assured, and promises to be a powerful force in the industry. Wheat did not respond to rumors of damage, but found reason for strength in Atlantic exports, including flour, in four weeks of 11,432,947 bushels, against 6,078,7°2 bushels in 1900. Failures for the week numbered 200 in the United States, against 203 last year, and 29 in Canada, against 33 last year.

So far as a "finished" education is concerned, the girls seem to be getting the better of the beys. In 1890 the public high schools of the United States graduated 20,344 boys and 36,124 girls.
