 ters for commercial men. Steam heat, fre-  
 quent bath rooms and close on every floor,  
 sample rooms, billiard room, telephone con-  
 nections &c.

Land thickly covered with timber  
 indicates good land; where the trees  
 are scattered and not very tall in-  
 dicates poor land.

**Future Naval War**  
 --It is the Limit.

**N**AVIES are soon to disappear,  
 according to a critic in the  
 New York Herald, who has  
 been watching recent me-  
 chanical developments. He knows  
 that nothing is more likely to become  
 absolute than an existing naval insti-  
 tution the moment something better is  
 discovered, and he points to the rapid  
 extinction of wooden warships pro-  
 pelled by sails when the Merrimac-  
 Monitor fight demonstrated that with  
 such vessels the greatest squadrons  
 under the ablest commanders were at  
 the mercy of a little iron monitor.  
 Man's command of the air through  
 aeroplanes and flying machines, and  
 his utilization of a water blanket to  
 protect submarine boats, will, says  
 this critic, render ships that float on  
 the surface worthless. The floating  
 war ship, he says, will be subject to  
 attack from above and from beneath  
 by enemies which it cannot reach.  
 He draws, therefore, an interesting  
 and thrilling picture of a naval battle  
 of the future, which includes a fight  
 between a flying machine and a sub-  
 marine boat. This, he says, is not so  
 improbable as it seems.  
 The flying machine can, he says, see  
 the submarine beneath the surface  
 when it would be invisible to men on  
 a vessel, just as the fish hawk can

fast, lance carrying boat will have  
 dashed up to it and speared it with one  
 of the explosive booms or lances. This  
 submarine torpedo boat is then ex-  
 pected to retire from business.

**RECOVERY OF WRECKS.**  
 A New System of Raising Sunken  
 Ships.  
 On account of the many disastrous  
 accidents which occurred on the sea  
 during the last few years much atten-

tion is again being paid to the inven-  
 tion of a system by means of which  
 sunken ships can successfully be  
 raised. Among the latest proposals  
 to this effect is an invention of a Ger-  
 man engineer, which has been patent-  
 ed. The inventor employs two cylin-  
 drical caissons of such immense size  
 as will enable him to raise the longest  
 ships. As shown in one cut, the cais-  
 sons are sunk to the bottom of the sea  
 on each side of the vessel. The inner  
 parts of the caissons are equipped  
 with strong hydraulic machines. The  
 latter draw heavy chains attached to  
 both caissons tight; the chains run  
 over a pulley fixed in the caissons. In  
 order to prevent the caissons from

HUGE LANCES TO DESTROY SUBMARINE BOATS.

locate its submerged victim. As the  
 aeroplane can move with celerity, it  
 can hover over the submarine until  
 the latter is compelled to come to the  
 surface for air or rises for attack.  
 Then it can drop dynamite bombs upon  
 the submarine and train rapid firers  
 upon its thin shell.  
 The submarine, however, will not be  
 quite helpless. A well-aimed shot from  
 one of its bow rapid firers (which can  
 be uncovered the moment the nose of  
 the boat rises above the surface)  
 would instantly put the flying ma-  
 chine out of business, thus clearing  
 the way for other submarines to rise  
 to the surface or for a bevy of friend-  
 ly flying machines to come up. Mean-  
 while, there would be no vessels in  
 sight.

England, having ascertained the fact  
 that France is equipping herself with  
 a large fleet of submarine torpedo  
 boats, and having always in mind the  
 fact that only twenty-one miles of sea  
 separates France from England, has  
 been casting about for some means of  
 defending herself from submarine  
 boats in general and those of France  
 in particular.

Roughly speaking, the idea is to arm  
 a very fast steamship with an ex-  
 plosive tipped lance and let her run  
 up and stick the luckless submarine

FIGHT BETWEEN SUBMARINE AND FLY-  
 ING MACHINE.

boat before its navigators can make  
 it dive again.

In the carrying out of this plan Eng-  
 land intends to fit one of these marine  
 lances to the destroyer Starfish. Prob-  
 ably there will be one of these boom  
 like lances on each side of the ship.  
 They will protrude before the bow,  
 just as a lance is extended before the  
 rider who carries it. Each lance will  
 be tipped with powerful explosives.

Submarine boats are necessarily  
 rather slow. They can neither come to  
 the surface nor dive below it as  
 quickly as a fish. As a matter of fact  
 when a submarine torpedo boat comes  
 to the surface either to take an ob-  
 servation or for fresh air, it takes  
 some minutes to submerge the boat  
 again. Those few minutes are to be  
 taken advantage of by the destroyer,  
 which travels at a very high speed.

When the submarine boat comes to  
 the surface it will be seen by the de-  
 stroyer. Before it can sink again the

moving out of their original place they  
 are provided with heavy arms an-  
 chored to the ground. As soon as the  
 caissons have been placed in the re-  
 quired position the chains are drawn  
 tight, and thus slip below the bottom  
 of the vessel. In this way the caissons  
 come close to the vessel. They are  
 then pumped empty and raise simulta-  
 neously with the vessel, as shown in  
 the second illustration. A second  
 strong chain is then drawn below the  
 caissons themselves, worked in the  
 same manner by means of hydraulic  
 machines, until the vessel has been  
 lifted entirely out of the water. Trials

THE VESSEL SUPPORTED BY CAISSONS.

recently made in the North Sea are  
 said to have given entirely satisfactory  
 results.

**Bees Swarmed on His Hand.**  
 The Strand Magazine publishes this  
 interesting illustration of the vagaries  
 of a swarm of bees. The man who had  
 this peculiar experience was working  
 in an English garden, when a swarm  
 of bees came off, and as he stood  
 among the flying insects the queen  
 alighted on his hand and was joined  
 by her subjects, making a cluster on  
 his arm weighing five pounds. He

received but two stings, and these by  
 accidentally crushing bees between his  
 fingers.  
 There is nothing in words unless they  
 are properly strung together.

**Free Scholarships**

**WILL BE GIVEN AWAY BY THE STAR, OF  
 REYNOLDSVILLE, PA.**

CENTRAL STATE NORMAL SCHOOL, LOCK HAVEN, PA.

**FIRST PRIZE**—One full year at Lock Haven State Normal, including tuition, boarding, &c.  
**SECOND PRIZE**—One term in King's School of Oratory, Pittsburg.  
**THIRD PRIZE**—A \$35 course in the International Correspondence Schools, of Scranton, Pa.

The young lady or gentleman getting the  
 highest number of votes will be given one full  
 year at the Lock Haven State Normal School  
 free, including tuition, light, heat, furnished room  
 and boarding. This is one of the best Normal  
 schools in the State.

The contestant receiving second highest num-  
 ber of votes will be given one term—12 weeks—  
 at King's School of Oratory, Pittsburg, where  
 oratory, elocution, dramatic culture, literature,  
 Shakespeare study, music, drawing, diction

tion paid. Any one sending or bringing in a  
 new yearly cash subscriber will be given a cou-  
 pon equal to 60 votes.

Persons desiring to enter the contest should  
 begin as early as possible. As soon as the  
 names are sent or handed in to THE STAR office  
 they will be published, but the number of votes  
 will not be published until June 19th, when the  
 vote each contestant has at that time will be  
 published opposite name, and from that to close  
 of contest the vote will be published as counted  
 and returned by the judges from week to week.

On Monday of each week (after June 19th)  
 the ballot box will be opened and the coupons  
 counted by judges.

Prof. Byron W. King.

book-keeping are taught. King's School of  
 Oratory has gained quite a reputation as a first  
 class school.

The person receiving the third highest num-  
 ber of votes will be given a \$35.00 course in the  
 International Correspondence Schools, of Scrant-  
 on, Pa. A complete commercial course, steno-  
 graphic course, book keeping, complete teach-  
 ers' course, coal mining, mechanical drawing,  
 telegraphy and 60 other courses are taught by  
 this school. The winner of this prize can take  
 up a \$35.00 course or can have the \$35.00 ap-  
 plied as part pay on any course the winner may  
 select.

The person getting the second highest num-  
 ber of votes can have their choice of the scholarship  
 in King's School of Oratory or the Internation-  
 al Correspondence Schools.

**PREMIUM COUPONS**—Persons paying their back  
 subscription, or in advance one year or more,  
 will be given a premium coupon which will en-  
 title them to 36 votes for each dollar of subscrip-

 Scholarship Coupon.  
 NAME.....  
 ADDRESS.....

Write in the above lines the name and ad-  
 dress of the person for whom you wish to vote  
 and send or take the coupons to the secretary,  
 J. P. Haskins, the music dealer, where they  
 will be placed in the ballot box. Contest closes  
 at 12 M., August 8th, 1901. All business com-  
 munications and inquiries should be mailed  
 to THE STAR office. Receipts and coupons will  
 be promptly mailed from THE STAR office to  
 patrons.

**RULES OF CONTEST.**

Contestants must register their names at  
 THE STAR office.

All coupons must be sent to the secretary  
 of the committee, J. P. Haskins.

All money collected for new subscribers or  
 on subscription due must be sent to this  
 office weekly.

Each contestant will be furnished with  
 printed cards certifying that he or she is a  
 contestant.

 J. P. HASKINS, Secretary.

**Our Secret Service.**  
 In the last estimate of the govern-  
 ment an expenditure for spies was  
 duly and candidly reported, says the  
 Saturday Evening Post. The conven-  
 tionalists of the European nations  
 opened their eyes in amazement. Of  
 course every army had spies, but no-  
 body was supposed to acknowledge it  
 officially. They said the Americans  
 were really a most extraordinary peo-  
 ple. It was in his way the same kind  
 of revolutionary work that this gov-  
 ernment did in diplomacy—it made  
 the traditional modern diplomacy  
 truthful. Few realize the extent of  
 secret service work in the modern  
 trade of war. The books of instruc-  
 tion and the whole education in the  
 naval and military life impress the  
 importance of knowing everything pos-  
 sible about the geography, the habits,  
 the resources and the conditions of  
 every nation strong enough to fight.  
 Thus the world is mapped in every  
 war office and representatives of  
 every army are looking around to see  
 what other armies are doing. Some-  
 times there are discoveries and scan-  
 dals—but, scandal or no scandal, the  
 work goes steadily on.

In fact, the spy, whether he be after  
 the plans of a fortification in an era  
 of peace or in the ranks of the enemy  
 in the midst of war, is being developed  
 not only in keenness and intellectual  
 accomplishments, but in his stanc-  
 ing before the world. When caught  
 he is still a hero, and when successful  
 he is still a hero, but there is less  
 disposition to shoot him over night  
 than there used to be. Thus the  
 most hazardous part of the war busi-  
 ness is much safer than it used  
 to be.

Henry Beltz, agent for a Chicago  
 firm, was convicted Friday at Marietta  
 on the charge of selling oleomargarine  
 with coal tar coloring and was  
 sentenced to pay a fine of \$50 and  
 costs. The case was prosecuted by  
 the Ohio State Dairy and Food de-  
 partments.

Stephen Payne, formerly trainmas-  
 ter at Youngstown for the Lake Shore,  
 has been appointed assistant superin-  
 tendent of the Puchontas division of  
 the Norfolk and Western road at Blue-  
 field, the scene of last week's disas-  
 trous flood in West Virginia.

**L. M. SNYDER,**  
 Practical Horse-Shoer  
 and General Blacksmith.  
 Horse-shoeing done in the neatest manner  
 and by the latest improved methods. Re-  
 pairing of all kinds carefully and promptly  
 done. SATISFACTION GUARANTEED.  
**HORSE CLIPPING.**
