

Wrenched Foot and Ankle Cured by St. Jacobs Oil.
GENTLEMEN—A short time ago I severely wrenched my foot and ankle. The injury was very painful, and the consequent inconvenience (being obliged to keep to business) was very trying. A friend recommended St. Jacobs Oil, and I take great pleasure in informing you that one application was sufficient to effect a complete cure. To a busy man so simple and effective a remedy is invaluable, and I shall lose no opportunity of suggesting the use of St. Jacobs Oil. Yours truly, Henry J. Dolfs, Manager, The Cycles Co., London, England.
St. Jacobs Oil is safe and sure and never failing. Conquers pain.

RESUSCITATION BY HEAT
A SOVEREIGN REMEDY FOR USE IN SUSPENDED ANIMATION CASES.

Dr. T. S. Lambert's Method of Treating Persons Supposed to Be Drowned is to Apply Heat to the Surface of the Body—Some Remarkable Cases.
We often read of people supposed to be drowned that were soon taken from the water, but life was extinct, writes Henry M. Dean, of Readsville, in a letter to the Boston Transcript. If, as I believe, such persons could have been easily resuscitated had those present known what to do, such accounts are most distressing.
In 1879 Dr. T. S. Lambert, of New York City, made public in a little book a new method of resuscitation, which has received surprisingly little attention. Dr. Lambert unfortunately mingled with his practical directions such superfluous theorizing, but the sensible person can easily understand his main contention.
His sovereign remedy for suspended animation caused by strangulation is the application of heat to the surface of the body. He insists that there is little or no water in the lungs of a drowned person, and that autopsy shows this. He affirms that the epiglottis in such cases closes automatically upon the windpipe. Hence, the first thing to do is simply to lay the body for a moment on its face and let the water drain from the mouth and nose. Then turn it over and wrap the whole body, except nose and mouth, in many cloths, and then pour constantly upon it water as hot as one's hand can bear. Rubbing is needless or worse.

Some of Dr. Lambert's remarkable accounts will make my meaning clear. Thus, a black boy fifteen years old fell early one morning into the waters of the harbor at Havana and was taken out apparently dead. He was laid on the roof of a house, a physician called, and for an hour or more the usual means of resuscitation were tried in vain. He was then left on the roof, exposed to the fierce heat of a tropical sun. Five or six hours later the coffin was ready, and two men went to the roof to bring the body, but found the boy alive and very little worse for his adventure.
A man was taken out of the East River at Forty-fourth street, New York, who had apparently been under water for some time. He was laid on the grass near by under a blazing summer sun. After several hours the pumper took him on a stretcher to the station, where it was noticed that his heart was beating. A brisk rubbing of his ears soon restored him to life.
A boy of thirteen years, living in Chillicothe, Ohio, rode a horse into a river, where the horse, stumbling, threw him into the water. The groom, who was with the boy, succeeded at length in getting the boy out in an apparently lifeless condition, but was so horrified that he did not obtain help for fully half an hour. Then the family physician came, who wrapped the body in blankets as hot as he could make them, renewing them constantly. In fifteen minutes the boy gave a faint sigh, then a feeble groan, and in ten minutes more was fully restored to consciousness.
Dr. Lambert was once a passenger on a steamer which was leaving Cleveland for Buffalo. About 8 o'clock p. m. a deckhand fell into the water, and his body was not recovered until a little after 9 o'clock, and was then rolled on a barrel, etc., till about 10 o'clock. Then the captain came to Dr. Lambert and asked if anything more could be done. The doctor remembered some remarkable resuscitations of animals by heat, which he had never experimented with heat upon drowned human beings. But the captain agreed with him that it could do no harm to try. Dr. Lambert swathed the body in wet sheets and kept them as hot as his hands could bear. At about 11 o'clock he detected a feeble and infrequent pulse. After about five minutes more there came a gasp, and at length another. The pulse and breath became more frequent, and at 12 o'clock the man was conscious and spoke. About 1 o'clock the man put on his clothes and walked off to bed. The next morning the man, though very cross, was about his work as usual.
And this treatment has also been found effective with infants that have never breathed and persons strangled by hanging.

Dr. Lambert's theory is that the cessation of respiration and circulation is not necessarily death at all, but simply nature's method of preserving life until the heat needed to warm the blood and stimulate the nerve centers can be supplied from without. It is better that cold blood should not circulate. And this state, when there is no paralysis from fright or shock, and there was robust health, may persist for a long time.
However this may be, the method suggested has one great merit. It is not exclusive. Those who have more faith in other methods may try them and if they fail may resort to this.
And the bare possibility that these things are so should command for them thoughtful consideration and the widest publication.

Fifteen-Year Back Subscription.
The Indian, of Warsaw, sued a fellow who owed it for a fifteen-year service. The delinquent had been getting the paper these many years without paying a cent. Then, when haled before a court, he declared he had ordered it but for four months. The judge, just as Portia, ruled that as he accepted the paper week by week he should pay for it, and pay he did. Still, one is led to wonder what kind of a publisher it is who would credit a man for so many years.

A DOTTING FATHER.

Sent His Son Away on a Little Excursion With Salubrious Results.
A doting Washington avenue father administered interesting punishment to his wayward son the other evening when the latter was taken home by a party of friends, intoxicated.

The young man was in a passive condition. He could walk a little with support, but he couldn't supply the support himself. His cognizance of what was taking place around him was very indefinite.
Soon as he was received by his father the latter ordered a carriage and drove his boy to Union Station. On the way he took all the money out of his pockets.
Upon arriving at the station he purchased a ticket and a berth to Chicago. He gave the former to the conductor of a train and he saw that the young man was put to bed in the proper berth.

Then he returned to his home.
Next day a wall came over the wires from Chicago.
The young man was stranded in the Windy City, and had no friends or acquaintances there. All this he told in the telegram.
"What are you doing in Chicago?" wired the father back in answer.
Back came a confession that his sprawling companions, who had a distorted ideas about jokes, had put him on a Chicago train without money.
"The plan is working fine," said the father to himself. "I will let him think about the 'joke' a little longer."
The wayward son was given just five days to think—five days of hungry stomach, outdoor sleeping and strenuous life stunts. Then the doting father sent him money upon which to return.

Now the young man, remembering his thrilling experience and confidently believing his friends were responsible for it, has "cut out the old crowd," to use his own expression, and is on the "water wagon."
The doting father says he may tell the boy the "joke" some day when there is no danger that he will be driven to drink again by it.—St. Louis Post-Dispatch.

WISE WORDS.

Polish is not purity.
Roses need no rouge.
The love of the law leads to liberty in it.
The loss by grinding is the gain of the axe.
Temperature often depends on temperament.
A traitor is not he who falls but he who flees.
When life will not bear grain dig in it for gold.
Self is the shortest and the deepest definition of sin.
The spells of avarice build the tomb of all the virtues.
Love's softest words often have the sublimest echoes.
It is always easier to praise virtue than to pursue it.
Big words do not always carry great weight of meaning.
Sympathy and sincerity are the sister keys to all hearts.
Except life be deepened its widening will be its weakening.
The advice that is dear as a gift will be dangerous as a guide.
A slippery character will not insure you against friction in life.
All agree that it is more blessed to give than it is to receive advice.
No man will ever be wise who is unwilling to be esteemed a fool.—Ran's World.

Something New in Mechanics.

Great is the humor of woman—when she doesn't mean it. Great is the nerve of woman—when she doesn't need it. And great are the nerves of woman—when it so pleases her. This combination is blamable for the following: A very pretty girl sat in a Long Island railroad train en route for Manhattan Beach. Suddenly a whistle blew. It is perhaps not necessary to say that a Long Island railroad whistle is more efficacious than otherwise. It is tuned to the key of W and is operated with a great diapason, giving out a different brand of yeeping shriek than anything known to nature. To repeat, the whistle whistled. "Oooww," cried the pretty girl. "Isn't that awful? I should think the railroad company would have these things oiled. It is an outrage." Her companion had often heard of wetting whistles, but never heard before of oiling them. Think it over.—Brooklyn Times.

Airship Possibilities.

If this Frenchman's air-ship is perfected the fancy of Mortimer Collins may no longer be described as purely whimsical. In "Squire Slichester's Whim," which was published in 1873, Mr. Achilles Gilest steers his balloon from Guernsey to the English coast and descends on the Squire's estate.
"Very impertinent," said the Squire. "They are trespassing already. They ignore the important fact that the air above my manor is as much mine as the earth underneath."
"Ah, if balloons should become general," said Simonet, "that consideration would generate lawsuits. You would have to fence your plot of air, and set spring guns and man traps."
—Boston Journal.

Chronic Dyspepsia.

Finding undigested food in the stomach of a Siberian mammoth that had been dead 50,000 years breaks the record for chronic dyspepsia.—Louisville Courier-Journal.

Household Talks
by Mrs. Bartholomew
Accompaniments of Dishes.
There is an unwritten law regarding the accompaniments of various dishes which is changeless in the daily bill of fare. Who, for example, would serve roast turkey without cranberry sauce, lamb without peas, venison without currant jelly, or fish without cabbage? With veal, lamb and all white meats, peas, beans, cabbage, cauliflower, spinach and, in fact, most vegetables growing above ground are best. With roasts, turnips, carrots, parsnips, corn, asparagus, onions and tomatoes are all suitable. Spinach is usually served with veal. For fowl, potatoes are generally mashed; for roast beef, peeled and baked in the pan with the meat, and for fish, fried.

Cherry Jelly.
Cherries make a delicious, but not very firm jelly. They are improved in this respect by adding one-fourth currants, also by not using fruit that is over-ripe. Mash the berries slightly after they are in the preserving kettle, and place the kettle on the back of the stove where its contents will cook slowly. Use no water. When thoroughly done put a few of them into a jelly bag and press out the juice (you get more juice if you stone the cherries; then the process of extraction is the same as for any jelly). To a pint of juice allow a scant pint of sugar. Boil the juice alone twenty minutes; add the sugar, made hot in the oven, stir till dissolved, let boil briskly one minute and fill into the jelly glasses. Very nice to serve with game or for sandwiches.

Beans Two Ways.
Wash the beans in two water, then soak before stringing. Break them in inch lengths and boil until tender in well-salted water. Drain very dry, then put them back in the steamer with a light seasoning of red and black pepper, and a tablespoonful of the best salad oil to every quart of beans uncooked. Set them over slow fire for five minutes, stirring most of the time. Turn out into a hot dish upon very crisp toast, and serve with either quartered lemon or pepper vinegar. Instead of the oil fat bacon may be used. Fry half a dozen slices crisp without burning them, then put the drained beans in the bacon gravy, and stir well over the fire until it is absorbed. Serve on a hot dish with the bacon laid on top, along with hot cornbread and sliced cucumbers in vinegar.

Second Way—Boil the beans after stringing until tender, drain and put in a deep dish with alternate layers of sliced onion and very thin bacon. Bake until the onion is well done. Serve hot with cornbread and strong peppercorn sauce.

Tomatoes in Jelly.

These tomatoes make a very attractive salad course served with a mayonnaise dressing. They are usually prepared from canned tomatoes, and are as delicious as they are dainty in appearance. Season a can of fine, solid, brilliant red tomatoes with a little celery salt, or, if this is not convenient, grate about a teaspoonful of crisp celery stalk into a can of tomatoes, and season them with plain salt. Cook them about five minutes, and when they have been thoroughly boiled this length of time add two-thirds of a package of gelatine, which has been soaked for two hours in two tablespoonfuls of water. Remove the tomatoes from the fire as soon as the gelatine is added, stir them very thoroughly until the gelatine is mixed evenly throughout them, and distribute the prepared tomato in cups, filling each cup two-thirds full. Set the cups away in a very cold place until the tomato has become a firm jelly. When you are ready to serve the jelly-tomatoes, turn out each on a blanched lettuce leaf, and stick a slender bit of celery stalk in one side. Arrange the tomatoes, which resemble the fresh vegetable, and leaves on a low salad platter, and serve them with a spoonful of fresh, firm mayonnaise on each tomato.

The Drift of Trade.

Encouraging Feature of Business Situation—Normal Conditions Are Now Restored.
R. G. Dun & Co's weekly review of trade says: Normal conditions have been fully restored in the distribution of merchandise, the placing of delayed orders stimulating the few lines that appeared to have. One of the most gratifying features of the business situation is the pronounced preference for the better grades of goods, clearly indicating the improved financial condition of consumers. Resumption of work progressed rapidly in the steel industry since the settlement of the labor controversy, and there is little discord between employer and employee in other lines. Stability of prices, without inflation, is the rule, except where the unusual size of crops introduces a special factor.
Steel production is now progressing at nearly the average rate. There are interruptions and delays through inability to secure special lines of material, and higher prices are quoted for both steel and iron bars, steel billets and some other shapes. In pig iron there was the greatest activity since the strike began, most brands reaching higher prices. Sales of 35,000 tons Bessemer at valley furnaces were reported, equal to \$16 delivered at Pittsburgh.
Other large orders were under negotiation, and producers look for a rising market. Higher prices for billets were partially nominal, owing to the impossibility of securing deliveries. A record breaking output of steel rails in a practically assured for 1901, and the new year will open with an unparalleled volume of business on the books. Plates and structural material are very strong.
The market for footwear is still on a strong basis. Leather and hides still reflect the heavy demand for finished products, and exports are also a sustaining feature. Textile lines were well engaged as a rule, much better news being received from cotton spinners at the north, and southern mills are busy, though there is less night work. Wool is quiet but firm.
Steadiness in quotations of corn at the present high level is all that producers could desire. Making full allowance for the smaller yield, and the decrease in exports, which has thus far been much greater proportionately, there does not appear to be satisfactory reason for the rise of 15 cents over last year's figures and 25 cents over the price at this date in 1899. Shipments from the Atlantic coast for the week were 72,820 bushels, against 1,650,018 bushels last year, and 2,854,477 bushels two years ago.
Wheat is well sustained and still better prices are promised by the heavy export movement.

Hint's
For the
Housekeeper

A square of loosely knitted wool makes a good floor cloth.
Boil cabbage, onions and other strong-smelling food in uncovered vessels.
Clean the beets before boiling them, but be careful not to break the skins if a bright color is wanted after they are done.
Lacking fruit juices, a tablespoonful of currant or cranberry jelly stirred into a glass of cold water gives a pleasant drink.
Cane-seated chair bottoms that have sagged may be tightened by washing with hot soapsuds and then drying them in the open air.
A saturated solution of borax and water rubbed on with a sponge, then followed by clear water, will remove a glaze the result of wear from black goods.
A loaf of stale bread may be freshened by plunging into cold water and then heating it in a quick oven.
A very stale loaf may need to have two or three plunges in the water. It must be eaten at once—or it will be harder than it was in the first place.

Nothing Equals St. Jacobs Oil.

For Rheumatism, Gout, Sciatica, Neuralgia, Cramp, Pleurisy, Lumbago, Hore Throat, Bronchitis, Soreness, Bruises, Toothache, Headache, Backache, Feetache, Pains in the Throat, Pains in the Back, Pains in the Shoulders, Pains in the Limbs, and all bodily aches and pains, it acts like magic. Safe, sure and never failing.
France has ten regiments of soldiers in Africa.
The careless actor and the careless fisherman have not much in common, but they resemble each other when they forget their lines.
Each package of PETRAN FARMER'S DYE colors either Silk, Wool or Cotton perfectly at one boiling. Sold by all druggists.
It is said that the Japanese Emperor has \$2,000,000 to gratify his desire for entertainment.
It's easier to put up with the prodigal son than to put up for him.
How's This?
We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. Dr. J. C. Carter, 111 N. 2nd St., Philadelphia, Pa., writes: "I have been afflicted with Catarrh of the bladder for several years, and have tried every remedy, but none of them has done me any good. I have heard of your Catarrh Cure, and have bought a box, and I feel compelled to say that it has cured me. I feel like a new man. I can now do my work as usual. I have no pain, and I am perfectly healthy. I am sure that your Catarrh Cure is the best medicine ever offered to the public. I have recommended it to my friends, and they all say it is the best. I have no more to say. I am, Sir, your obedient servant, J. C. Carter, 111 N. 2nd St., Philadelphia, Pa."

Your Tongue.
If it's coated, your stomach is bad, your liver is out of order. Ayer's Pills will clean your tongue, cure your dyspepsia, make your liver right. Easy to take, easy to operate.
25c. All druggists.
Want your mouth to be as beautiful as your tongue? Use BUCKINGHAM'S DYE FOR THE MOUTH.
The longest bridge in the world is the Lion Bridge, near Sangang, China. It extends 5 1/2 miles over an arm of the Yellow Sea, and is supported by 200 huge stone arches. The roadway is 70 feet above the water, and is enclosed in an iron net work.
The Oregon Pine Needle factory is said to be the only one outside of Germany.

A Cough
"I have made a most thorough trial of Ayer's Cherry Pectoral and am prepared to say that for all diseases of the lungs it never disappoints."
J. Early Finley, Ironton, O.
Ayer's Cherry Pectoral won't cure rheumatism; we never said it would. It won't cure dyspepsia; we never claimed it. But it will cure coughs and colds of all kinds. We first said this sixty years ago; we've been saying it ever since.
Three sizes: 25c., 50c., \$1. All druggists.
Consult your doctor. If he says take it, then do as he says. If he tells you not to take it, then don't take it. You know. Leave it with him. We are willing.

Millions
USE CUTICURA SOAP MEDICINAL TOILET
Rheumatism, Eczema, etc.
MILLIONS of Women Use CUTICURA SOAP, assisted by Cuticura Ointment, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itching, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves to women and mothers, and for all the purposes of the toilet, bath, and nursery. No amount of persuasion can induce those who have once used these great skin purifiers and beautifiers to use any others. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, and the BEST toilet and baby soap in the world.
Complete External and Internal Treatment for every ailment, consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation; and CUTICURA BATH, to cleanse the system, soothe the nerves, and cool and soothe the blood. CUTICURA is often sufficient to cure the most stubborn itching, disfiguring, itching, burning, and scaly skin, scalp, and blood humors, with loss of hair, when all else fails. Sold throughout the world. English Depot: F. NEWBURY & SONS, 27 and 29, Charterhouse Sq., London, E.C. Foreign Depot: ANDERSON & COMPANY, Sole Props., Boston, U. S. A.
