erminates in a poin at the waist is a narrow curved belt. To cut this waist for a miss of fourteen years of age three and a half yards of material twenty inches wide, three and a quarter yards twenty seven inches wide, two and threequarter yards thirty-two inches wide or two yards forty-four inches wide will be required, with three-eighth yards of velvet to trim as illustrated.

A Becoming Home Gown.

Comfortable home gowns, that are tasteful and becoming at the same time that they can be slipped on with case, are essential to every woman's outfit. The charming May Manton model shown in the large illustration fulfills all the requirements and has the merit of being in the latest style. The original is made of turquoise blue challie with black figures, the front and undersleeves being of plain blue Sapho satin. The revers of black velvet and the edging a fancy galloon, in which threads of gold are woven, but

many equally satisfactory materials might be suggested. Cashmere, albarross, princess crepe, nun's veiling and French flannel are all fashionable while soft slik always make a hand some gown.

The back is fitted with a centre seam side-backs and under-arm gores that curve to the figure and give a princess effect. The full front is tucked to yoke depth, then falls free, its edges being attached under the fronts proper, which are turned back to form revers. Beneath is a snugly fitted body lining that extends slightly below the wais line. The fancy sleeves are arranged over fitted linings and are curved at the lower edge where they fall ov soft puffs. At the front is a velvet ribbon that it attached at the under-arm seams, brought around to the front and bowed.

To cut this gown for a woman of me dium size thirteen yards of material twenty-one inches wide, eleven yards twenty-seven inches wide or seven

> required, with two and a quarter inches wide, three yards thirty-two yards twenty-one inches wide for full inches wide or two and a quarter yards front and undersleeves and seven. forty-four inches wide will be required.

months to come. The admirable May Manton model illustrated is suited to silk, velveteen, corduroy, flannel, cash mere, albatross and all waist materials but in the original is made of white flaunel with tiny gold buttons - trimming.

The lining fits snugly and smoothly, and is desirable for all light weight wools and silks, but can be omitted when heavier materials are used or

for any reason it is not desired. The front of the waist proper is laid in small box pleats that are stitched deepest at the centre and grow shorter as they approach the arm-eyes. each of which is held at the end by three small buttons. The five pleats at the back are stitched for their entire length and form groups of two at each side of the centre, where the close ing is effected by means of buitons and buttonholes. The sleeves are in bishop style, with pointed cuffs that match

the novel treatment of the collar. To make this waist for a woman of medium size four and a quarter yards of material twenty-one inches wide,

A POPULAE SHIRT WAIST

yards forty-four inches wide will be three and a half yards twenty-seven

child's idea that necessaries will | Horace. come some way' I decided that first of all I would wear flowers, and so I cid: for a time violets or roses were a part of my costume. My mother and Mencius. older sister, however, gave no word of

caution, because no advice was ever asked. In a short time boots and gloves and the usual accessories stubbornly showed shabbiness in direct ratio to the size and quality of the cor sage bouquets, bonbons, matinee tickets, etc. But that was not all. Judgement in purchasing was to be learned and when I appeared in a bright green gown at Eastertime my sister was ashamed to go to church with me, The result of it all was that in order to dress as good taste directed I found it necessary to turn dressmaker and milliner and make my own wardrobe and as flowers became fewer boots and gloves improved in appearance."

#### The Martyrs of Science

The death of a number of courageous and high-minded people caused by efforts to determine whether mosquito bites can convey yellow fever is a reminder of the penalties which science has ever exacted from her

devotees. Comparative poverty, if not actual want, must be faced without hesitation. Even when the government has need of it, the price paid for superior learning is very insufficient. The ordinary social intercourse is to be foregone. And even life itself must sometimes be risked; not to attain tened with pleasure to the music. any definite object which shall at least

cause the martyr's name to sound with honor, but simply to secure an authoritative "yes" or "no" to questions on which future experimentations depend. The soldier is lauded for his courage and the statesman is admired for his ability. The public loves to honor them as they deserve to be honored, because it has been taken into their confidence and permitted to follow their achievements step by step. But the scientist must

be content with some memorial away from the ordinary walks of men. His name is carved upon no lofty monuments. His splendid sacrifice must be complete.-Washington Star.

Men must be decided on what they

must do, and then they are able to act with vigor in what they ought to do .-

The Tiger's Musical Ear.

A student of animal habits recently made some interesting experiments with music at the Zoo, says Tit-Bits. A violin player approached a sleeping tiger, and at the sound of the music

the tiger awoke, and, raising its head without moving its body, looked for some time with fixed attention at the player. It remained for a while in a fine attitude listening to the music, and then, making a peculiar sound that in tiger language does duty for erpool and New York.

purring, it lay down again and dozed The soft music was played on while the great beast lay as if lulled to sleep. The violin was then put aside for the piccolo. At the first note of the new instrument the tiger sprang to its feet and rushed up and down the cage, shaking its head and ears, and lashing

became still louder and more piercing the tiger bounded across the cage, reared on its hind feet and exhibited nain

The piccolo was stopped, and a very

difference in effect was seen at once, The tiger ceased to rush about, and the leaps subsided to a gentle walk. until the animal came to the bars, and standing still and quiet once more lis-

### Sportsmen's Guns.

"Half the guns and rifles brought here for repair," said a gun manufacture: in North Twelfth street, "want nothing but a good washing with cold water. When rifle barrels become so foul that they will not shoot true they should be washed and not scraped. It is a good plan for a man going shooting to carry a small syringe, and after every ten shots he should squire some water into the gun from the breech and shoot a cartridge out of it while it is wet. The water softens the pow der that has accumulated in the rifle and the bullet forces it out."-Phila-

delphia Times.

The architectural beauty will come with time. Safety and convenience were the first things considered. They are comfortable, however, well lighted, well warmed, well aired, and are supplied with all modern conveniences running water, electric lights, service-
