Tang Po and Teamaking. There is but one way of making tea,

Unless the water boiling be To pour on water spoils the tes. The teapot itself should be heated very hot before the tea is placed in it and the boiling water poured on. It should be scalding hot water, or the leaves will float to the top.

No less authority than Tung Po, the Chinese poet, is quoted for a recipe for teamaking. He says: "Whenever tea is to be infused, take water from a running stream and boil it over a lively fire. It is an old custom to use running water, boiled over a lively fire. That from springs in the hills is said to be best and river water the next, while well water is the worst. A lively fire

is a clear, bright charcoal fire. When making an infusion, do not boll the water too hastily. At first it begins to sparkle like crabs' eyes, then somewhat like fish's eyes and lastly it boils up like pearls innumerable springing and waving about. "This is the way to boil

Berthold Schwarz, a monk, he ex plains, opened the "Lives of the Saints" on St. Barbara's day and read the story of her martyrdom, after which he reasoned as follows:

"The heart of the Virgin was white as salt, the soul of her tormentor was black as coal, and it was sulphur from heaven which punished him for his cruelty. I will mix these three things, and it will be a wonder if I do not discover the philosopher's stone." He did mix them, and as soon as he put the mixture in a fire a tremendous explosion followed. Such, according to

German soldiers, was the origin of gunpowder.

THE BULLET FROM AFAR.

How Modern War Methods Try the Soldlers' Nerves.

Today a man may die as soon as the enemy's guns, hidden away in the distant, cloud topped mountains seven miles away, begin to talk. And over that seven miles in must walk with caution, with a war-interval between him and his pelos a other hand. He must lie down an every short halt and seratch the ground hurriedly with his little spade at every long one, for the great shells are sailing toward him, and he was by his officer's eye and hears by his commands that it is considered that he may perish at any moment and that precautions are necessary to preserve him. He sees, moreover, how futile those precautions must be if one of those howling overhead should land as near to him as the last one did to that blasted tree, for instance, with its scorched, dangling limbs and the huge charred fissure in its stout trunk, or as the one before did to the team of mules in the ambulance wagon, now a screaming, struggling jumble of harness and
