CUBAN FLAG FLIES IN WASHINGTON

A NATION'S EMBLEM.

Minister Quesada's Arrival the Occa sion for Holsting One-Starred Banner of Infant Republic.

The flag of free Cuba was raised in Washington Thursday for the first time in a legal and official manner. The one star banner was flung to the breeze from a staff on the Hotel Raleigh when Senor Gonzales de Quesada, the Cuban Minister, arrived with his wife. It was not by any means the first time the flag has been flown from a staff on that hotel. On the contrary, on nearly every day dur-ing the Spanish War it was raised there, because Senor Quesada was then living in the hotel trying to ingovernment to recognize him as the diplomatic representative the insurgent government of Cuba. The officials of the State Department were amiable and made no objection to the flag. It represented nothing to them in their official capacity and personally they were glad to see it. There was no flag raising ceremony. As soon as Senor Quesada arrived the hotel people ran it up and the Minisapproved of the action, although he has not yet been recognized by the President. In that respect the flag raising is a little "previous." Senor Quesada called at the State Department to pay his respects to ecretary Hay and arrange for his reception by the President. Owing to the absence of the President no definite plan could be made, but if approves, Secretary Hay will present Senor Quesada.

Demands of Industry and Trade Is Not Impeded by Strikes-Crop Prospects Good.

R. G. Dun & Co.'s Weekly Review

of Trade says: No diminution in business is apparent from labor controversies, owing to the prosperous condition of the agricultural section and the bright outlook for this years crop. Retail distribution of light weight apparel has felt the stimulus of higher temperature. Railway earnings in May were 8.7 per cent. larger than last year and 21.7 per cent above those of 1900. There continues to be a wide discrepancy between the amount of business offered and the contracts closed in many branches of the iron and steel industry, owing to the inability of producers to assure delivery at a special time. Contracts running well into next year indicate that the end of activity is not near. Pressure is still most conspicuous for railway and structural supplies, and agricultural implement works are crowded with orders. Sales of Bessemer pig iron at Pittsburg for delivery next year were recently made at \$16.50, while immediate shipments command about \$5 Limited stocks are still the cause of steadiness in all branches of textiles. Holders are not urging sales and buyers show a disposition Purchasers of cotton goods are influenced by the prospect of cheaper raw material after the new crop begins to move. Cotton rose steadily on a few unfavorable weather reports, but the outlook is very bright in many States. deliveries of sample pieces by the woolen mills have caused complaint among the clothlers and fall orders are not placed freely. Wool sells more freely at leading eastern markets and quotations are steady. No change of importance has occurred in leather. Hides are again strong with Texas steers leading the market and foreign dry hides do not yield to lower bids. Grain markets have shown the effect of conflicting crop estimates and weather reports, ures for the week numbered 162 in the United States against 179 last year, and 20 in Canada compared with
