President Mitchell Asks Financial Support Only-Minera Will Give Ten Per Cent of Wages.

The first day's session Thursday of the extraordinary convention of the United Mine Workers of America demonstrated that the crisis has been passed and the possibility of a na-tional strike, affecting about 400,000 throughout the mining regions of the country, has been eliminated Following a course that was not altogether unexpected, immediately after the routine business preliminary to the actual work of the assembly was disposed of, President Mitchell, in an address representing his own convictions, practically gave voice to the of the convention's sonti ment. He said in part: "My views to declare a general strike. I have in all my career in labor work, de clared that contracts should be kept as long as their lives last. Any advantages gained in breaking contracts result in disaster. Such a course would destroy confidence and array against our cause all classes of so As far as my knowledge goes I do not know of one solitary sym-pathetic strike of any magnitude which has been successful. On the contrary, the most conspicuous among the sympathetic labor struggles have resulted in ignominious and crushing defeat, not only for the branch of in dustry originally involved, but also for the divisions participating through sympathy. In my judgment the United Mine Workers should not repeat the mistakes which, like milestones, mark the path trod by the toil-ing masses in their never-ceasing struggle for better and higher civili zation. This, like all great progres sive movements, has met with repulse, but, gathering new strength in adversity, moves forward and onward again in its murch to ultimate victory I am firm in my conviction that the strike in the anthracite field can and will be won without repudiating our solemn contracts with the bituminous operators, provided the bituminous miners will rise to the occasion and to their full duty by their struggling fellow-workers; and with this in mind submit for your consideration the following specific recommendations: An appropriation of \$50,000 from the national funds to be placed at the disposal of Districts 1, 7 and 9. All district, sub-district and local unions will be appealed to to donate from their treasury surplusses as large amounts as possible. An assessment of not less than \$1 a week be levied on all members of local unions, the amount to be collected at the earliest possible moment and forwarded to the national treasurer. An assessment of 25 per cent be levied on all national, district and sub-district officers whose salaries amount to \$60 a month or That all American trade unions and the general public be appealed to for financial assistance to carry the strike to a successful issue. Although utmost secrecy surrounded the meeting, it was learned upon high authat the anthracite miners voted to approve President of the national organization now will be to see to the collection of the defense fund. Secretary Wilson, who is the financial head of the union, will in charge of this work. It is be lieved that all the voluntary contributions from the various districts and sub-districts and local organizations turned into his hands within the next ten days. These contributions are estimated at about \$400,000. A systematic method will be adopted for canvassing outside subscriptions in the large cities. The miners hope

AT THE NATIONAL CAPITAL.

SILVER MINERS KILLED.

Two Huge Powder Magazines Let Go. Filling Workings With Strangling Vapors-105 Perish,

Two powder magazines at the 1,200foot level of the Daily-West mine at Park City. Utah, exploded about 1 o'clock a. m. Wednesday causing t terrible loss of life. Thirty-three men were taken from the mine dead and several others have been recovered in a half dazed condition. The 1,200 level of the Daly-West corresponds to and is connected by tunnel with the 600-level of the Ontario, a mile dis-tant. In the Daly-West mine between 100 and 150 men were at work. In the Ontario were nearly 100 it is believed. It is not known how many of these are dead, but the disaster extends to the Ontario, as the noxious gases that have been freed are known to be the cause of several of the deaths. The presence of these gases leads many miners to believe that the powder was burned and that the explosion was not the chief cause of the disaster. The explosion was so tremendous that it awakened everyone within a radius of miles. As an example of its awful force it is said that two horses in the ore tunnel one and half miles away were killed by it. dembers of a relief party who went into the Ontario mine shortly after the explosion after several hours absence had not returned and fears entertained for their safety. At the under-current of alarm throughout last report it was stated that there financial and railroad circles. Public were thought to be 105 men still in stiention was attracted when anthe workings. McKeaghlin, one of the lime to help, died on being brought the surface. He was asphyxlated. James Smith, a member of the rescu-ing party who went down, died soon was decided on when the fig after noon. Jack Balton, a Silver tween Andrew Carnegie and the Penn. from the vaults of the Mansonie Tem-King, miner, who also went down with sylvania was at its height, and before ple Safety Deposit Company, at Chithe rescuers, is unconscious and ex-pected to die. The condition of the was formed. The new agreement as gas in the mine is such that the rest to the division of the territory makes one work was abandoned for several a railroad man that is full of interest. hours to allow the gases to escape. Burgy, the "powder money," was a as to importance and novelty is the green man and should not have han entrance of the Goulds in the Eastern died explosives. A rescue party found railroad situation. They control sys-a hand and foot, presumably those of tems with large mileage in the West Burgy.

CHICAGO STRIKE ENDED.

Three Large Roads Settle With Men-Others Will Follow.

At a conference at Chicago between committee representing the men in the Lake Shore freight bouses and officials of the road a settlement of the difference was effected. The adjustment of the controversy was brought about by Chairman Job, of the State Board of Arbitration. The basis of the settlement for wages was: Cheek, transfer and receiving clerks for first three months; \$55 check, transfer and receiving stocks after first three months, \$60; delivery clerks for first three months, \$50, and after that period, \$55; stores, per hour, for first three months, 18 cents; and after three months, 181/2 cents; callers, first three months, 17 cents, and after that 18 cents per hour; truckers, per hour, first three months, 15 cents, and after three months, 17 cents. The officials of the Northwestern and the Nickel Plate roads also held conferences with committees of their and agreements men. reached similar to that of the Lake Shore.

JEAST IS DIVIDED IN THREE PARTS.

NEW RAILROAD MAP.

Harmony Assured—Fight Betwee Pennsylvania, New York Central and G. ..lds at an End.

The railroad territory of the coun try has been divided. Agreement has been reached between the managers of the New York Central, the Pennsy vania and the Goulds whereby fight has ended between the two mer systems and the Goulds. The con flict, which threatened to railroad and telegraph business of the country, has been stopped abrupt ly, and the Gould system will be ex tended to the Atlantic seaboard. In-stead of two parts, the East has now been divided into three. The an-nouncement of the agreement among these interests is the most important railroad item since it was announced on December 5, 1898, that harmonious relations had been established be established be tween the New York Central and the Pennsylvania. The agreement came necessary when the Goulds de sided to extend their system to the Atlantic scaboard. The entrance of that system into the Eastern or trunk line field upset the whole railroad non-situation. The fight that began theu Ky. has been bitter, and has caused an e workings. McKeaghlin, one of the nouncement came that the Goulds scuers, who went down the second Wahash system would extend its line to Pittsburg, a point where the rail road rate situation had been dominatfight be even to the person not familiar with edges his failure. Experienced miners say that John railroad ownership and control. First They control sysand Southwest, and are closely identified with the Harriman lines of rail-This insures an extension of the "community of interest" not only in the East, but also in the West and Southwest; in fact, across the con-tinent. The Goulds union with the Pennsylvania and the New York Central, in both of which case J. Pierpont Morgan is Interested, insures railroads of the country than was ever possible before. In short, it ap-

FIERCE STORM IN NORTH DAKOTA

WHOLE TOWNS DESTROYED.

Scarcely a Building Left in One VII lage, and Great Destruction in Others,

Great damage and, it is thought much loss of life were caused by a tornado Tuesday, which swept in a southwesterly direction from the international boundary across the north-eastern portion of North Dakota. The three towns of Bornp, Eldorado and Thompson, according to reports, were totally wiped out. The little town of Borup, on the St. Vincent line of the Great Northern railroad, is an absolute wreck. The final report was that the entire town was wiped out and hardly a structure of any sort left standing. This came from a plucky standing. This came from a plucky Great Northern telegraph operator who, after his station had been laid flat, saved his key from the rulns and Judge Advocate Groesses and the General Smith never issued the flat, saved his key from the runs and famous "kill and burn" order, even tapped the wires at the nearest available point. He also reported the razing of a hamlet some miles distance with destruction of a large amount of property. The report from Borup are great, and are becoming greater came in very soon after the storm every day. We South Americans are property. struck, and contained no information as to the casualties. At Thompson the Great Northern station lies a con wreckage directly across the main line. Stores and residences are in ruins and the main por-tion of the town is wiped out. The population was about 200. Mere to the United States. Your meat trust fragments of information Wednesday gives as the chief reason for the pres had come from Eldorado, but these indicate the destruction of that town. of about 250 people. Neither of the reports from Thompson or Eldorado speak of loss of life. This is partially accounted for by the fact that were sent before news could have received from the outlying districts.

ATTACK MISSIONARIES.

SERENE TRADE ASPECTS.

Prospects of Early Settlement of Strikes Greatly Improve the Industrial Outlook.

R. G. Dun & Co.'s Weekly Review

of Trade says: Settlement of numerous labor controversies and prospect John W. Mackay, American-multiof early agreements as to other struggles have greatly improved the industrial outlook, while agricultural conditions steadily improve. As these have been the only unfavorable influences for some months, the pects for active trade are decidedly encouraging. Preparations for un-usually heavy fall sales are being made, and confidence grows stronger. Mills and furnaces that have been idle on account of the usual overhauling, resumed as rapidly as needed reditions are sound, the midyear divi dend distributions producing no stringency, and speculation has been heavy for the season, both in securities and staples. Pig iron continues to command full prices, supplies fall ing below requirements, and furnace deliveries failing to fill contracts. Scarcity of fuel is still the principal drawback, while car and power shortage are additional causes of delay. New orders are reported for distant delivery, running about a year ahead. Prices are fully maintained for the raw material, but bil-lets weakened slightly because of foreign selling. Importations have reached a considerable aggregate and eign more are expected. Structural ma-terial is still the feature, new business being offered in great bulk, Rail-way needs do not diminish, despite the enormos amont of work already placed and agricultural implement makers are fully employed. A general advance in prices of machine tools has occurred, averaging nearly 10 per cent. it was expected that mills and foundries would resell pig iron, owing to the high premiums obtainable, but Ranabeni Madhu, or Shanko was this factor has had no appreciate famous as a mutiny leader, who was this factor has had no appreciate famous as a mutiny leader, who was this factor has had no appreciate famous as a mutiny leader, who was this factor has had no appreciate famous as a mutiny leader. The famous had not been all the material received. Manufactors are all the material received. turers of cotton goods hold prices steady, and there has been a distinct increase in demand during the past week, aithough buying is only for im perative requirements. Some curtailment of spinning is reported at scuthern mills, the tendency being to wait until the crop cotton comes forward. Export trade has increased through buying for india, but China is less of a factor than usual. New lines of light weight woolens and worlines of light weight woolens and worateds have opened at unchanged prices and the increased activity of mills has aroused more interest in the raw material, which tends to advance.

> last year, and 20 in Canada, against Bradstreet's says: Railway carnings are really flattering. June returns on nearly 100,000 miles of road showing an aggregate gain of 8 per cent on last year.
