THE REYNOLDSVILLE BUSINESS COLLEGE.

It has met with Remarkable Success and Promises to Become One of the Leading Institutions of its kind in the State.

Through the kindness of Prof. H. J. Hughes, we are enabled to give a picture and brief history of the Reynoldsville Business College, which is now one of the leading business colleges in the state.

Prof. Hughes began this work Dec. 9, 1901, in the Henry building, Reynoldsville, Pa., but the school grew so rapidly that within a short time it became necessary to secure larger rooms and the second floor of the new Deible building was designated especially for this school and rooms consisting of Commercial Department, Shorthand Department, Typewriting room and office, have been fitted up in first class style, and equipped with Smith Premier and Remington typewriters, tables, desks etc. Summerville telephone connection with office.

This institution uses nothing but the latest and best systems, consisting of Ellis Commercial Bookkeeping, Sadler-Rowe's Manufacturing set, in which the voucher system of accounts is used and a complete course in banking. Pernin's Universal Phonography is used, this is one of the standard systems of shorthand and for speed and legibility is unequalled. The new Van Sant touch typewriting is used. By this method students are taught the location of the keys by touch, thus enabling them to acquire great speed and accuracy in transcribing their notes.

This institution places its graduates in good positions and at present is unable to supply the demand upon it for stenographers and bookkeepers. This work is carried on through salaried agents who look after the interests of the graduates.

Prof. Hughes has arranged for a club for students coming from other towns, which greatly reduces the cost of board. An invitation is extended to all interested in educational matters to visit this school and investigate the methods in use.

Dangerous "Pot."

The heavy rock that fell last Saturday and killed young Wiley, in the Anita mines, is known among miners as a "pot." It is a heavy boulder, round and smooth at one end. It tapers to a point. Overhanging as it does it is a menace to the lives of any passing under. It might appear to be firmly imbedded in the roof, but as the earth over the mines is continually settling or jarred by blasting, this wedged shaped rock is gradually worked loose, and the pressure on it is bound sooner or later to force it from its place. As the heavy end hangs down, and it tapers to a point upward, it is easily understood how such a rock may be squeezed out and falling, crush out the life of anyone passing beneath, as was the case Saturday. Many miners understand the danger and put props under the "pot."—Punxsutawney News.

The New School Law.

The new law, approved July 10, 1902, supplants the act of 1901. All children between the ages of 6 and 16 years are required to attend a school where the common English branches are taught during the entire term. There is a provision allowing the directors to reduce this requirement to 70 per cent. of the term if circumstances warrant. Pupils may be excused on account of mental, physical or other urgent reasons, acceptable to the board; or pupils between 13 and 16 who can read and write the English language intelligently are exempt from the law, provided they are regularly engaged in some useful employment or service. Another provision is that in case there be no public school in session within two miles, by the nearest traveled road, of any person within the school district he or she shall not be liable to the provisions of the act. The new law provides fines not only for the neglecting person in paternal relation, but also for teachers and school directors who fail to comply with its provisions. The law, in fact, is so comprehensive and important that interested persons should at once make themselves acquainted with its provisions. Copies may be obtained by addressing the secretary of the commonwealth, W. W. Grist, Harrisburg, Pa.

Reduced Rates to Washington.

Tickets will be on sale from October 4 to 7, inclusive, and good to return until October 14, inclusive. Minutes of Educational Meeting.

An educational meeting was held at Reynoldsville on August 27, 1902. Among the instructors were Mrs. H. G. Carmalt, of Indiana Normal, and Prof. W. Y. Welch, of Clarion Normal. The meeting was called to order with Supt. Teitrick in the chair. The Rev. Perry A. Reno, of the M. E. church, conducted the devotional exercises.

Prof. Welch then spoke, his subject was "The First Day of School." Among the helpful things he said were "Plan, the keystone of the teacher's success lies in the plan. Be prompt in beginning, in recitation, and in dismissing. Never steal time from one recitation to give to another." Set the pace on the forenoon of the first day for the rest of the year. A book which he recommended was "Jean Mitchell's School."

Mrs. Carmalt spoke on "Primary Reading." The points most emphasized were that we should look at the children from their own standpoint and not as miniature men and women.

Prof. Welch spoke on "Getting a Full Day's Work." First plan your school as a whole, then as classes and finally as individuals and then work out your plans.

The meeting then adjourned to meet at 1.30 p. m.

Supt. Teitrick opened the afternoon session with a short address.

Prof. Welch then talked on "School Incentives." In giving incentives, lead the child to compare himself with himself and not with someone else. "To do right is the highest incentive."

Mrs. Carmalt followed with a talk on "Language." First have the child open his senses, then he will express himself, if he has something worth expressing.

Prof. Welch then talked on "The Recitation." "Give the child what he can most readily assimilate." "Always review before taking up new matter."

Mrs. Carmalt spoke on "Busy Work." She said that busy work was anything which appeals to the child's activities. Always construct with a purpose in view.

Closing address by Supt. Teitrick, he told us to teach the child memory gems, also to use our old institute programs, in these we will find many things in a condensed form, which it will be good to do in the school room.
