The first cabinet meeting held News has been received at La Vie

Founder Bradley will have to defend his title to the Asbury Park, New Jersey, beach front and boardwalk and the public parks and lakes. The city council thinks it has discovcred that all these holdings are publie property and is going after them. The city council has passed unant mously a resolution that a special beach and park committee appointed to investigate the question of the city ownership make formal demand on Bradley for possession of all properties that appear on the original tural design harmonizes with the maps of Asbury Park as having been dedicated to the people. The resolu-\$50,000, tion is the outcome of a discovery made by Dr. Bruce S. Keator, councilman-at-large, who is one of the largest property owners in the city. Dr. Keator's attention was called, a short time ago, to the Spring Lake suit brought to declare the lake at that resort to be the property of the bor-ough. Ho thought that the principles laid down by the court in that case, which was decided in favor of the borough, would apply to the Asbury Park beach front. Lawyers were consulted and the original maps of Asbury Park on file at Freehold were closely examined. The maps showed that the beach front, including the the President that Congress shall strip over which the boardwalk was create. Secretary Cortelyou's office had been dedicated to the public and that the city line ran out to the Many of the parks now claimed by Mr. Bradley were also marked "public square" or "park," and under the ruling of the courts, it is contended, dedicated to the public. Many old settlers who had bought property from Mr. Bradley in the early were interviewed, and they all said that the beach front, parks and lakes were represented to them, at the time purchases, as public propof their erty. R. V. Lindabury, of Elizabeth, to whom the case was submitted, renered an opinion in which he declared that the beach and other property described belonged to the people, and that Mr. Bradley was an usurper on ublic domain. City Solicitor F. Hawkins and Counselor the public John Frank Durand, of Asbury Park, concurred in this opinion. For ten years the city has sought to obtain control of the boardwalk. Four years ago Mr. Bradley offered to sell his beach domain to the people for \$150,000. Enabling bills were passed by the legslature, and all the preliminaries seemed satisfactorily adjusted. Then scheme collapsed. Mr. Bradley wouldn't sell. The Asbury Park beach front is valued at from \$500,000 to \$1. 000,000. The, disputed parks are worth at least \$500,000. Mr. Bradley is mayor of the city and can veto the acts of the council. This fact, however, is regarded as of no advantage. The council is unanimous on the question and can overrule him. The demand to hand over the beach parks and lakes will be made at once, and the case advanced, if possible, so that the issue may be tried in January at Freehold.

## HARNESSING GLACIAL WATERS.

#### Ice Crest of a Mountain to Furnisi Electric Power.

Engineers are being sent from Bos ton to Tacoma and Seattle to begin work on harnessing the waters of the Payallup glacier on Mt. Tacoma. State of Washington, for commercial purposes. It is claimed that if suc-cessful this will be the first instance where glacial waters have been used directly to provide power. The plan is to construct from the glacier a flume 14 miles long, through which a head of water will flow sufficient to generate 50,000 horse-nower. The water in running through the flume will drop 600 feet and through pen-stocks will be diverted into turbines connected with electric generators. A three-phase alternating current will he transmitted at high voltage to Tacoma and Seattle.

This he refused to do and havior. the court sentenced him to six months

isonment.

sumption, as shown by Dun's index number declined about 1 per cent during October. The decrease occurred in meats and fuel, mainly the latter. The only development of note in the iron and steel market has been the 10 per cent reduction in prices of tin plates, to take effect December 1. While some change was anticipated, the trade was not prepared for so large a cut. If the recent lowering of price lists in certain sections of the market should stimulate foreign trade, there will be occasion for gratification, as some exceptional export movement is needed to offset the heavy imports of pig iron and billets. Many furnaces have been compelled to bank because of the poor receipts of coke, and there is little evidence of improvement in the railway situation, motive power being utterly in-adequate. Contracts run far into the future in structural material bridges and buildings, while plates are sought by car works and shipyards. High premiums are still paid for prompt delivery, but most shipments are on old contracts placed at regular list prices. Recent enlargement of facilities has greatly creased production in many lines. which explains the slightly easier tone of the market as a whole, but there is no evidence of diminished demand nor unsound conditions Taking of inventories interrupts work at New England shoe shops, and will probably occupy much of this month. so that cutting will not begin on the large contracts already placed for delivery during the first quarter next year. Business failures in the United States for the week ending Thursday, November 6, number 148, as against 194 last week, 101 in this week last year, 161 in 1900, 185 in 1899 and 187 in 1898.

The secretary of the treasury discontinued the acceptance of a and municipal bonds as security public deposits. The amount of nicipal and state bonds so depos aggregates roundly \$17,000,00 Transactions in process will be com pleted and will slightly increase th treasury's holdings of these securities
