AS A WORKING TOOL

for the student and the writer. as an authoritative reference book for schools, families and business men, there is one book which offers superior advantages both in the solid value of its information. and the ease with which it is obtained.

One's admiration for Webster's International Dictionary increases daily as it comes to be better known. It never refuses the information sought and it never overwhelms one with a mass of misinformation illogically arranged.

The St. James Gazette of London, England, says: For the teacher, the pupil, the student and the litterateur, there is nothing better; it covers everything.

The New and Enlarged Edition recently issued has 25,000 new words and phrases, 2364 pages and 5000 illustrations.

Our name is on the title-pages of all the authentic dictionaries of the Webster series.

LET US SEND YOU FREE "A Test in Pronunciation" which affords pleasant and instructive evening's entertain ment. Illustrated pamphlet also free.

TOXIN AND ANTITOXIN.

What These Two Terms In Medleine Mean Made Clear.

Pasteur, the great French savant, founder of the sciences of bacteriology and preventive medicine, proved in the first place that the epidemic diseases due to minute living organisms, are plants and animals and that for each definite disease there is a specific micro organism. This was the great fundamental fact. Later it became evident that these microscopic parasites cause disease by certain chemical poisons which they produce, called toxins. In many cases the micro organism, if grown in culture tubes outside the body, will produce the same toxins, After being separated from the living germs which produced them these substances will produce all the symptoms of the disease when injected into an animal body. The body at the beginning of an attack of fever is not, however, passive. Its cells react against the poisons introduced and a struggle ensues, the end of which is life or death, the fighting being purposeful and definite. The body cells secrete a specific chemical body which has the power of neutralizing or rendering harmless the particular toxin introduced. This antidote to the poisonous toxin we call the antitoxin. When a man recovers from an attack of smallpox, it is because his antitoxins have proved too strong for the toxins of the disease, and his after immunity, it seems probable, is due to the persistence within his body of the antitoxins

once produced .-- C. E. A. Winslow in Atlantic.

Hannibal's Downfall. The fate of Hannibal turned upon

the result of a promenade. It was after he had crossed the Alps and entered Italy, with winter quarters established at Capua. His residence was one of the best houses in the city, and while walking in the garden he heard a female voice singing not far away, Struck by the tones of the voice, he issued an order that the singer should be brought before him. He was so greatly impressed by her charms that he at once attached her to his household. disposing of the husband by beheading him. Retribution followed closely upon the cowardly perpetration of the outrage. The balance of the winter was devoted to pleasure, discipline and drills were practically abandoned, and with the advent of spring the Carthaginian army was so demoralized by the dissipation of the city that its prestige was lost, and with it came the downfall of Hannibal.

The Affections of the Arab. An Arab-meaning a tent dweller, for in an equine sense the town dweller is no Arab-loves first and above all his

horse. Next he loves his firearm; next to his gun he loves his oldest son. Last comes his wife or one of his wives. Daughters don't even count; I mean the Arab scarcely takes the trouble to count them unless in so far as they can minister to his comfort, dietetic or oth-Until some neighbor comes erwise. along and proposes to marry-in other words, to make a still worse slave of one of them-she is only a chattel, a soulless thing. And yet she is said to be a pretty, amlable, helpful beingsaid to be, for no one by any hap ever chances to cast his eyes on one worth seeing. This disregard for women, be it said to their honor, does not always apply to the Bedouins of the Syrian and Arabian deserts.

SLAVES OF FURNITURE.

The Result of Women Being Afraid of Beetles and Mice.

If man is the slave of a dog, woman is the slave of furniture. If women only knew how much more gracefuland the only way is to appeal to their vanity-they would be reclining on the floor, they would never sit up on chairs or round a table. That this is fundamentally true is proved by the fact that they are never so happy as at a picule, where there are no chairs and tables. I really believe that the craze for putting everything on something above the floor-by which I mean tables, sideboards, etc.-grew from the custom of sleeping in ugly, cumbersome and dirt collecting beds instend of on the floor. Of course the reason why women do not sleep on the floor is because they are afraid of beetles and mice and other harmless things. Women, therefore, having invented the bed, invented the table to stand by it, and thus spread the habit of putting everything above the level of the floor.

Woman's original sin of being afraid of black beetles and mice costs man more than all the royalty, armies, navies, pension lists, prisons, poverty, schooling, national debts and wars of Europe.

I am sure I am not putting it too high when I say that the average cost of furniture per house is \$1,000, and if the world would only agree not to cumber its rooms with beds and tables, side boards, cabinets and chairs our ground rents would be about half what they are, and the overcrowding of our cities would come down proportionately. -"Domestic Blunders of Women."

The Conductor's Houest Rakcoff. A conductor of a Sixth avenue car. during a lull in the ringing of fares, stood passing coins from one hand to the other, turning up the date of each coin as he did so. "There are more ways of making money than by 'knocking down' fares," he remarked, noting the inquiring look on a passenger's face. "Any greenhorn can pocket a dozen nickels in collecting 120 fares in a car built for forty-eight passengers. but a man has got to know something to spot a coin that has a premium value. It's surprising how many more or lean rare coins pass current without falling into the hands of some one who knows their value. This was suggested to me one day, and I took to studying the catalogue of dealers in rare coins and memorizing the dates of those that are worth more than the prices stamped on them. Since then I have picked out of the money I have taken in fares several hundred coins with a premium value ranging from a

few cents to \$5 and have redeemed them with my own money and sold them to dealers in coins."-New York Times. "Blography of a Snowflake."

Under this title Mr. Arthur H. Bell in Knowledge describes the life history of the aerial frost flowers of winter. In order to have a fair start in life a snowflake should be built up on a particle of dust. Then, if it has the good fortune to begin its career at the top of a cloud many miles above the earth and to pass through many atmospheric strata, differing in their temperature and the amount of moisture they contain, our snowflake is very likely to become a notable individual among its kind. In a stratum of warmer air the little flake catches moisture on its tiny spicules, and when it enters a colder stratum below the moisture is frozen, and so the flake grows. In a thawing air many flakes sometimes cohere.

forming disks from an inch to two or three inches across.

Ragged Island.

PARIS PAWNSHOPS.

Why They Are Poor Places to Get Loans on Stolen Watches.

Of watches alone there are received here and at the twenty-two branch offices from a thousand to twelve hun-dred a day, about 350,000 in a year, the average lean on a watch being 30 or 40 francs. The official assured me that in this great number of watches scarcely one in a thousand has been stolen, the fact being that people who have come dishonestly by watches or other property fight shy of the mont de plete. The reason of this was presently made plain as we watched the formalities of record, and I realized how difficult it would be for any one to do business here under a concealed identity. Every client receiving a loan greater than 15 francs must produce some official document-an insurance policy, a citizen's voting card, a permit to carry arms or a rent receipt bearing his signature and throwing light upon his station in life. For loans under 15 francs the client is simply required to show an envelope through the mails to his address. All these facts, with various oiners are duly inscribed upon huge record and so that whoever deals with the mor. de piete exposes himself to tiny that must be ungrateful to folks of shady antecedents. Indeed certam persons make this a grievance against the mont de piete and declare the Paris system an impertinent intrusion upon a client's privacy, which would seem a point badly taken if the client is an

Cards Disclose the Man. "I wish I had not played bridge with

Paris Pawnshops in Century.

Mr. X.," said a girl recently. "I thought him so nice before, and now my liking for him has quite gone. He was so keen about triffes, insisted upon every forfelt, questioned the score and seemed so annoyed when he lost, and yet the stakes were very small, and he was only out a few dollars; so, of course, it was not the money. It must have been the disposition of the man coming out under provocation, and the test did not show him up to advantage. Now, Mr. Z., the other man at the table, was so good natured and such a gentleman in his play that I quite like him, although I never thought him attractive before." All games of competition may be said

to assay certain characteristics, but the most crucial test seems to be card playing, and bridge is responsible for many a coolness resulting from self betrayal at the green table-New York Tribune.

The Badger as a Fireman.

A badger which had made its home among the granite cliffs dealt with the fire god with sagacity and skill, says Nature. A friend, while painting a sea piece, discovered a badger's lair and thought to play the animal a practical joke. Gathering together a bundle of grass and weeds, he placed it inside the mouth of the hole and, igniting it with a match, waited for the ignominious flight of the astonished householder. But Master Badger was a resourceful animal and not disposed to be made a butt of practical jokers. He came up from the depths of his hole as soon as the penetrating smoke told him that there was a fire on the premises and deliberately scratched earth on the burning grass with his strong claws until all danger was past. No human being could have grasped the situation more quickly or displayed greater skill in dealing with an unfamiliar event.

The Bud of a Tree.

Among the curious things discovered by the students of plant life is the fact that a bud taken from one tree and rafted on another carries the a

"SHATTERED DIGNITY.

Exit From Church That Had a An Fiavor of Comie Opera.

The crude humor that makes the small boy want to throw a stone at a sllk hat on a man bristling with dignity is not to be disposed of as a mere ill conceived prank of youth. There is deep in most people a spring of unsubduable humor that leaps gleefully when conscious dignity gets a fair tun ble. That is why, for all the solemnity of the place, the soberest charity and the best bred propriety in the world could not prevent a titter at a little farce that happened once in a church in Brooklyn.

offended at something the preache said, gravely rose and stalked toward the door, with their heads held high in assertive disdain. The wife followed the hushond.

Unfortunately when they were half way down the nisle the husband dropped his glove and stooped to pick it up. Fate, the humorist, determined that the wife should keep her head so high that she did not see her husband stoop. She went sailing on and doubled over him in riotous confusion

The congregation held its breath and kept its composure. The two recovered themselves and went on. Hoping to escape quickly, they turned to what looked like a side door. The husband pulled it open with an impressive swing. Before he could close it out tumbled the window pole, a long duster and a stepladder. The congregation could hold its mirth no longer, and man and wife fied to the real exit in undignified haste amid a general and pervasive spicker.

Jackson's Statue on the Constitution In 1833 Commodore Elliott ordered r figure of General Jackson to be carved to take the place of a billet head which the United States frigate Constitution had carried through the war of 1812. It was placed on the bow of the frigate in June, 1834, when she left the dry dock in Charlestown navy yard. The excitement among the political enemies of Jackson in Boston was intense. A meeting was called in Faneuil hallwhich, however, did not take placeand anonymous letter writers threaten ed the life of the commodore unless the statue was removed. On the night of the 2d of July, 1834, in the midst of a terrific thunderstorm, Samuel P. Dew ey, a young man of twenty-eight, rowed out to the vessel and managed to saw off the head of the statue and carry it away. The head was replaced a month later in New York, and the figure remained there until 1874. It now occu ples a place in the grounds of the Naval school at Annapolis.

Swelling Her Income.

A good story is told of a man who one day told his wife that he would give her all the silver pieces she found in his purse or pockets which were coined the year she was born. As a result the lady in due course of time had quite an amount of silver on

hand-so much, in fact, that she went to the bank and deposited it in her name. Then, speaking to the cashier, the

lady said: "My husband tells me you are going to pay him some money to-Will you please pay him in this day. sliver I have just deposited? I should be so much obliged to you if you would."

Of course the cashier quickly replied that he would be happy to please her. As a result the lady has still more birthday money.-London Answers.

Recognized the Smell.

The sexton of an Episcopal church in Boston has many stories to tell of the remarks and comments made by vis-

KEEPING A LOGBOOK.

The System of Abbrevistions Used or Merchant Vessels. How many landsmen know how

ogbook is written up? It seems just as aplicated as double entry bookkeeping when one does not know, but afte a little careful attention and study it's as easy to keep a logbook as to eat hot gingerbread. There is a list of letters arranged, and they look like so much Greek to the uneducated.

The letter b, for instance, stands for blue sky, whether there be clear or hazy atmosphere. C means cloudy or detached, opening clouds: d denotes drizzling rain; a small J. fog; capital F. thick fog; g. gloomy, dark weather; h. hail; I. lightning, and m. misty or hazy so as to interfere with the view.

The letter o represents overcast or when the whole sky is covered with one impenetrable cloud. Passing showers are noted by the letter p, and q indientes the weather to be squally. Con flumons rain is indicated by an r. snow by an s and thunder by a t. Any ugly. breatening appearance in the weathe calls for the letter u. and visibility of distant objects, whether the sky be cloudy or not, is represented by the letter v. A small w is wet dew. A full point or dot under any letter denotes an extraordinary degree. As an exam ple of how the letters are used take q p d l t. This reads very hard squalls and showers of drizzle, accompanied by lightning, with very heavy thunder Numerals denote the force of the wind A cipher indicates calm, 1 light air, 2 light breeze, 3 gentle breeze, 4 moder-ate breeze, 5 fresh breeze, 6 strong breeze, 7 moderate gale, 8 fresh gale, 9 strong gale, 10 whole gale, 11 storm 12 hurricane. This system of abbreviation is generally adhered to on all merchant vessels.

Quicksands.

Quicksands have a horrible fascination for writers and readers of fiction, and the reality is every bit as bad as fancy paints it. One of the most re markable quicksand accidents occurred years ago in New Zealand. Two prospectors were wading across the mouth of a small stream running into the sea in the north island, of New Zealand Both stepped into a quicksand. One who merely touched the edge of it got loose. The other sank rapidly and, in spite of his companion's efforts, was sucked under. When an attempt was made to recover the body, it was found that the sand was enormously rich in gold. From a single ton of it £300 worth of gold was washed .- Pearson's.

fils Andlence.

First Pinnist-Did you have much of an audience at your recital yesterday afternoon? Second Planist - Splendid! There were two men, three women and s boy. The boy, I afterward learned, was employed about the place, and the two men came in for shelter, as it was raining at the time, but the three women were all right. They came to hear me, I know, for I gave them the passes myself.-Boston Transcript.

He Took the Watch.

It is told of the late Dr. Parker that when a very, very, very good young man came to him asking whether he should accept for certain special serv ice a gold watch from an agnostic em ployer he replied: "Take it, my lad; take it. If he had been a Christian, perhaps he would not have offered it to you."

Great Labor Saver.

Customer - The metal in that knife you sold me is as soft as putty. It got dull the first time I used it.

Many old people are lame,

Would you like to

feel Young Again ?

nearly all are weak. Worst of all, is that feeling

of languor, of inability to act, of weariness at trifling exertion.

Nothing will make the old young again, but Vinol will prevent 99 out of 100 old people from feeling so old.

There is no humbug about it. We found out about Vinol, and tried it every way before we decided to put it on the market and guarantee it. Now we believe that almost any tired, discouraged old person who will take a bottle of Vinol and use it as directed will feel better right away.

It will increase their strength. relieve their lameness and brighten their spirits.

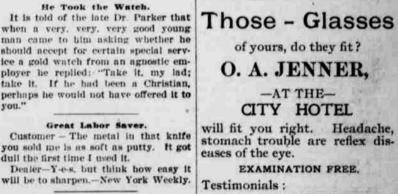

It does this by nourishing. Don't blame the old folks for Take being blue and cross. home a bottle of Vinol.

midnight." On one occasion instead of making the inquiry she said: "Alfred, I wish you would stop that clock. I cannot sleep for its noise."

An Artful Scheme.

A newly elected official would some

times return' home late at night after

his wife had retired, and when she

asked him what time it was would an-

All unsuspicious, he stopped the pendulum. In the morning while dressing his wife inquired artlessly: "Oh, by the way, what time did you get home?

"About midnight," replied the offi-

"Alfred, look at that clock!" The hands of the clock pointed at 2:20.

Clay "Butter."

It is not generally known that in many parts of the world clay is eaten on brend as a substitute for butter. This is termed "stone butter" and is used in Germany. In the northern parts of Sweden earth is often baked in bread and is sold in the public markets on the Italian peninsula as well as on the island of Sardinia, Persia, Nubia and other tropical countries. This practice probably had its origin in the knowledge that all earths have some sort of flavor and take the place of salt, a necessary ingredient in all kinds of food.

How She Caged Him.

"Are you fond of birds?" she asked innocently as she stood at the plane fumbling the music.

"I dearly love them," he replied with never a shadow of suspicion. Then she ran her slender fingers over the keys and began to sing, "Oh, Would Were a Bird!"-Chicago News.

Little Men,

Little men are the disappointment and defeat of God's purpose in making men. All men were intended to be great-some greater than others, but all great.-Bishop Candler in Atlanta News.

More deaths from snake bites occur in India in houses than in the fields or in the jungle.

as is the sepulcher of a living

Ragged Island, alias Crie Haven, on the coast of Maine, is certainly happy above most islands. It has neithe mice nor magistrates, though its inhabitants number nearly fifty. The solltary doctor comes over when wanted from the mainland. There is not the solace of a church, but there is also not the distraction of a lawyer. There are a few cows and horses, but neither dogs nor cats, nor is insect life, if present at all, a nuisance even in the hot test season. The natives catch lobsters and eat all that they cannot sell. Plants That Hate Each Other.

Fancy two plants being so unfriendly that the mere neighborhood of one is death to the other! Yet that is the case with two well known British plants. These are the thistle and the rape. If the field is infested with thistles, which come up year after year and ruin the crops, all you have to do is to sow it with rape. The thistie will be absolute ly annihilated .-- London Standard.

A Monster Bird. Freddie-Ma, the bat is the biggest bird that flies, ain't it? Ma-By no means, Freddie. Freddle-Well, anyway some of 'en

must be mighty big, 'cause I heard father say he was out on one last night .-Richmond Dispatch.

Juvenile Logic.

Mother-To think that my little Ethel should have spoken so impatiently to papa today at dinner! She never hears. me talk in that way to him. Ethel (stoutly)-Well, but you choos him, and I didn't.

Ambiguous. "Dear Father-We are all well an happy. The baby has grown ever much and has a great deal more sens than he used to have. Hoping the sam of you, I remain your daughter, Me He.

Conservative. She-Why don't you go out occasio ally, dearest, and enjoy yourself, so at the club?

He-But I don't want to get into the habit of having a good time.-Life.

the original tree with it. It has always been believed that the bud so transferred began a wholly new life, but this new theory-it may, after all, be more theory than fact as yet-shows the matter in an entirely different light. For example, if a bud be taken from a tree that is twenty-five years old with a natural life of fifty years and grafted on another tree it will not live as long as its parent tree is entitled to live, the full fifty years, but only for the period of life then left to the tree, twenty-five years.

Extravagant.

"There was a young man in Michi gan," said a United States senator, "who was deeply enamored of a beauti-ful young lady in my town. He lived In Detroit and one day decided that the only thing for him to do was to propose. So he went to the telegraph office and sent this message. 'Will you marry me? Twenty word

answer pald for.' "An hour later he received this reply:

"'You are extravagant. Why pay for nineteen words too many? No.'"

A Respect For Figures.

"What do you consider the most im-portant branch of education?" "Arithmetic," answered Mr. Cumrox. "Give a boy plenty of arithmetic. What blights the careers of so many young men is the failure to realize that you can't subtract a \$5,000 expense account from a \$1,000 income." - Washington Star.

Helps.

itors One Christmas when the church was

beautifully decorated with cedars and firs an old lady walked up the aisle to the chancel and stood sniffing the air after every one else had left the church.

"Don't it smell solemn?" she said at last to the sexton as she turned away with evident reluctance. "I don't know as I ever realized just what the 'odor of sanctity' meant before today. We don't have any such trimmings in the church I attend up in the country."-Youth's Companion

Human Calendars.

In Siam every woman is a walking calendar. On Sunday red silk, with a parure of rubies, is worn; Monday brings a silver and white dress and a necklace of moonstones; Tuesday is dedicated to light red, with coral ornaments: Wednesday is devoted to green. with emeralds; Thursday sees a display of variegated colors, with catseyes; Friday the lady is arrayed in pale blue, with flashing diamonds, and Saturday in more somber, darker blue, with sapphires to match.

	r (sternly) — Willie, you took
some of	these preserves from the pan-
try.	
Willie	(shrewdly)-Oh, who told you
that?	
Mothe	r-No one told me. I suspected
it! Now	, tell the truth! Didn't you?
Willie	-Ma, "children should be seen

and not heard."-Philadelphia Pross.

Gathering of Labor Agitators. f course you have read of the conon of tongues at the building of tower of Babel?"

gathering of labor agitators, I sup-No; I haven't read it. Tell the I'm not interested in trades up--Boston Transcript.

Be Ready.

each day take thought for what erns it. liquidate its own affairs and respect the day which is to follow. and then we shall be always ready. To know how to be ready is at the bot-tom to know how to die.

Men who mind their own business	Mr. and Mrs. A. C. Fish.
are usually successful because they have very little competition.—Chicago News. Glabys—Why did she ever marry him? Ethel—Oh, he said he couldn't live without her.
