Barred-out Immigrants.
Uncle Sam has a blacklist of birds and quadrupeds which it is absolutely prohibited to introduce into this country, says the Chattanooga Times. The mongoose, the flying fox and the starling are on the list. The mongoose is a species of ferret, a native of India, where it is domesticated as a sort of animal rat-trap and snake-destroyer. It was introduced into Jamaica to get rid of the sugarcane rats. These exterminated, however, the mongoose went on to diet off the insect-destroying birds, with the result that the crops have been devastated by insects in some sections of the island. The animal is exceedingly crafty, nocturnal in its habits, and evades traps with ease. The flying fox, known also as the fruit bat, is a voracious harvester of fruits and vegetables. The starling belongs to the crow family.
