Celery King is composed of nature's tonic-laxatives of the roots, herbs and seeds which, skillfully blended, make the gentlest and at the same time the most potent of laxatives and the greatest cure for constipation and the like it causes. ### Starting Evidence.

Fresh testimony in great quantity is constantly coming in, declaring Dr. King's New Discovery for Consumption Coughs and Colds to be unequalled. A recent expression from T. J. McFarland, Bentonsville, Va., serves as example. He writes: "I had Bronchitis for three years and doctored all the time without being benefited. Then I began taking Dr. King's New Discovery, and a few bottles wholly cured me." Equally effective in curing all Lung and Throat troubles, Consumption, Pneumonia and Grip. Guaranteed by H. Alex Stoke's, Druggist. Trial bottles free, regular size 50c, and \$1.00.

### Worst of All Experiences.

Can anything be worse than to feel that every minute will be your last? Such was the experience of Mrs. S. H. Newson, Decatur, Ala. "For three years" she writes, "I endured insufferable pain from indigestion, stomach and bowel trouble. Death seemed inevitable when doctors and all remedies failed. At length I was induced to try Electric Bitters and the result was miraculous. I improved at once and now I'm completely recovered." For Liver, Kidney, Stomach and Bowel trouble Electric Bitters is the only medicine. Only 50c. It's guaranteed by H. Alex Stoke, Druggist.

### Child Study.

The study of child psychology is attracting ever increasing interest and enthusiasm. Problems in crime and insanity are becoming solvable. The right of the child to proper treatment, bodily and mental, is making a stronger appeal. It is coming to be better known just what treatment fosters a balanced development and just what physical conditions preclude the possibility of such development. Parents will know that the nervous, fractious child needs the services of a brain expert, possibly after-ward of a skilled surgeon. It will be understood that stubbornness can be cured if rationally dealt with or made a nucleus of crime if murderously mismanaged. May every educated parent aid in this beneficent work by studying his own child fairly and impartially and collecting materials from his neighborhood that will give the students a broader outlook! Fair, honest statements from varying environments are of value. Read, study along this line and see what wonderful avenues of thought open up.—Health.

### Curing an Otter Skin.

A full grown sea otter is from four to five feet long and perhaps a foot or more wide. When a hunter secures one he loosens the hide from the nose and head, and, without cutting it lengthwise at all, he pulls the skin down over the body, the hide being so elastic that this is not a difficult job. It is then stretched over a smooth board six and a half feet long, nine inches wide at one end and ten at the other end. Each end of this board is tapered to a point. Another board exactly the same size is then inserted, and the skin is stretched a foot or eighteen inches longer than its original length.

A third board half the length of the other is wedged in and the skin lightly tacked at the ends to hold it in place. If any flesh adheres to the skin it is then cut off, and the hide is cured and dried in this condition. In a few days it is taken off the boards and turned fur side out, when it is ready for market.

### Emerson the American.

In Emerson as an American, as a patriot, we of the new world have an inheritance peculiarly our own which will grow richer with the spending, for the spending of such an inheritance means that we ourselves be spent for the republic. Far as we may go beyond our present failures, beyond what Morley calls this our corrupt period, far as we may go on the line of our nobler national accomplishments (and amid all our discouragements we must not forget these nobler accomplishments), far as we may travel up the pathway of our true ideals, still before us and ever higher on that pathway will be seen the beckoning figure, will be heard the urging and inspiring voice, of Emerson.—Century.

### Blood Corpuscles.

The war between the white corpuscles of the blood and the microbes of disease was first described by the Russian pathologist, Metchnikoff. While devoting himself to the study of inflammations he in each case noted the presence of white cells in the blood currents in abnormal numbers. Inside these white cells he invariably found the specific microbe of the disease under consideration. It seemed that the big corpuscles were devouring the poisonous microbes. Sometimes the number taken up by a corpuscle was too great, and it died as a result. If this overcoming of the white corpuscles by the microbes was general the patient died.

### A Common Color.

The elder Dumas once was wearing the ribbon of a certain order, having recently been made a commandant, and an envious friend remarked upon it. "My dear fellow," he said, "that cord is a wretched color! One would think it was your woeen vest that was showing!"

"Oh, no, my dear d'E—," replied Dumas with a smile. "You're mistaken. It's not a bad color; it is exactly the shade of the sour grapes in the fable."

### Wig Wearing Very Old.

The ancient Egyptians all wore wigs, and the early Christians from A. D. 427 to A. D. 917 considered a false head covering a badge of distinction. This, too, in direct opposition to Tertullian, who in vain declared them devices and inventions of the devil, and Clement of Alexandria, who warned his hearers that when the sacred hands of the clergy were laid on their heads the blessing would not penetrate through the false hair.

### Limited Opportunity.

"Did you call at Roxley's house?" inquired the young doctor's wife.

"Yes, and I wish he had sent for me sooner."

"Gracious! Is he seriously ill?"

"Quite the reverse. I'm afraid he'll be all right again before I get in a half dozen visits."—Philadelphia Ledger.

### His "Better Half."

A newly married man told us a tale of woe the other day which happens to every newly married man. When he got married his wife gave him half the clothes cupboard, but in only three weeks all his clothes were hanging on nails driven into the wall.—Exchange.
