**Gas at Sykesville.**

About two months ago Samuel Hare, of Sykesville, discovered gas escaping from an old well which had been abandoned on the Daniel Weiss property. Believing that the escaping fluid could be utilized Mr. Weiss and two of his neighbors had their houses plumbed and the gas conducted thereto through a system of pipes, and are now enjoying the benefits of cheap light and heat. Upon learning of their success J. B. Sykes made an investigation on his premises and discovered an old boring near his residence the product of which was soon turned to use in his household. Convinced that gas was to be found in paying quantities Mr. Sykes had a well drilled on the hotel lot and about two weeks ago was rewarded by striking a good gusher. The hotel was fitted up with pipes and gas fixtures at once and a few days later the entire building was supplied both for lighting and heating, twenty-five jets, including a large arc light in front of the establishment, being now in operation. At night the gas is lighted at the wells, adding much to the convenience of Sykesville residents without making any perceptible change on the supply in the dwellings. The supply now being developed is found at a depth of from 60 to 100 feet, and it is expected that before long every family in town will be using gas for heating and lighting their dwellings.—Ponxotawney Spirit.

**The Window Glass Situation.**

There appears to be no material change in the window glass situation at the present writing. There is a movement on foot headed by a number of prominent window glass manufacturers to get control of 1,500 pots and if this is successful they are to be operated under the Burns scale. The presidents of the two window glass organizations with their executive committees are still endeavoring to reach an understanding whereby one scale will be used. Something definite will probably be accomplished during the coming week.—Kane Republican, Oct. 24.

UNDERTAKING AND PICTURE FRAMING.  
The U. S. Burial League has been tested and found all right. Cheapest form of insurance. Secure a contract. Woodward Building, Reynoldsville, Pa.

In years gone by our forefathers used to put a rock in one end of a bag of grain on the way to and from the mill, in order to balance it. It took them some time to learn that the grain might be divided and the load balanced without adding to the weight. They knew they could get to market and home again with the rock in the bag and they were adverse to change. You'd think a man was crazy if he did that now, but there are still some business men who don't believe in advertising because their fathers didn't need it. They know they can get along with the rock in the bag and they wouldn't wake up for the world. In the meantime the fellow next door who has divided the grain and is up to the times is getting the business and they wonder what the reason can be.—Falls Creek Herald.

TRUNKS . . . . . SUIT CASES . . . . . TRAVELING BAGS

**MILLIREN BROS.**

**Queen Quality THE FAMOUS SHOE FOR WOMEN**

**Most Important!**

Of what use is a hat that does not fit your head. Of what use are corsets that do not fit, dresses that do not fit, or gloves that do not fit?

Now take shoes! The one absolutely necessary thing about shoes is

that they shall FIT.

Unless they fit you feel "slouchy," you walk clumsily, dragging the feet along because they are tired. You acquire corns. And all because you bought shoes that were perhaps loudly advertised and smart in appearance, yet made with no regard to fit. The one shoe for women for FIT is the

Boots, \$3.00 and \$3.50.

**Queen Quality.**

Try them for easy walking.

**ROBINSON'S**
