THE STATE GRANGE.

To study the origin, composition and especially the possibilities of a shovel full of ground requires no less application and brings into exercise all the powers of the mind as fully as does the study of mathematics, classic or philosophy.

The late session of the National Grange at Rochester, New York passed resolutions in favor of woman suffrage.

Prof. S. H. Bailey, dean of the agricultural college, of Cornell University, during an address at the recent Rochester National Grange meeting, paid this excellent tribute to the order: "I am a member of a number of organizations; but if I could be in and work for one only, it would be the grange."

The telephone and the trolley are rapidly banishing the isolation of the farm. As these extend rural life loses its most objectionable features. Men can live in the country and yet be in constant touch with their fellows.

Twenty-five states were represented at the National Grange at Rochester.

About 700 members took the seventh degree at the National Grange meeting at Rochester.

Climate Cures.

The influence of climatic conditions in the cure of consumption is very much overdrawn. The poor patient, and the rich patient, too, can do much better at home by proper attention to food digestion, and a regular use of German Syrup. Free expectoration in the morning is made certain by German Syrup, so is a good night's rest and the absence of that weakening cough and debilitating night sweat.
