Save dollars in fuel

You cannot afford to say to yourself "My old stove will have to do this winter." The old stove is eating up the price of a new stove every year. Not only that, but on top of the cost is the unsatisfactory result it gives.

Cole's Hot Blast is the Modern Heater

It produces an even temperature because it is air-tight and burns all the gases in the fuel with the patented Hot Blast Draft. Soft coal is half gas. This is the great fuel saver. Fire keeps over night. No extremes of heat and cold. The smoke-proof feed door is a great feature.

If you want to keep your plants from freezing and enjoy the luxury of getting up in warm rooms every morning without kindling new fires, investigate Cole's Hot Blast to-day. With every stove goes this

GUARANTEE

We guarantee every stove to remain absolutely air-tight as long as used.

We guarantee a uniform heat day and night, with soft coal, slack, siftings or hard coal.

We guarantee that the rooms can be heated from one to two hours each morning with the soft coal put in the stove the evening before.

We guarantee the feed door to be smoke-proof, and that the stove will hold fire with soft coal thirty-six hours without attention.

We guarantee a saving of one-third in fuel over any other draft stove of the same size.

The above guarantee is made with the understanding that the stove be operated according to directions and set up with a good flue.
