Look Out for Them. Borrowing, or trying to borrow 10 ents, 25 cents and 50 cents "until evening" or "until to-morrow," seems to be a regular business with several town girls. They succeed occasionally in borrowing money, but they fail to pay back. It is getting to be an "old story" and victims are more difficult to find. Better keep your money in your pocket unless you want to encourage a dishonest manner of getting money.

The High School Bulletin

Edited by members of the Reynoldsville High School.

The Seniors have begun early la their preparations for the B., R. and P. contest at Brookville, Mar. 10. Influenced by previous success and relying upon present ability we fell quite confident of victory.

The High School under its present instructor is developing great musical ability. So well pleased was Mr. Me-Clure that he was beard to remark "No need of hard examinations when a school sings like that." Howeverthere was a failing somewhere for we all feel the effects of last week.

Mid-term "Exams" all over and hard work boldly confronts us.

The Juniors neglected to use their ingeouity in the German "Exam." 'Nein gut' seems to be their favorite expression. Woncer Why?

· PENN: A. STATE GRANGE REPORT.

Legislatitive Committee Wants Good Roads, Increased School Appropriation, &c., &.

From the report of the legislative ammittee of the Pennsylvania State range at its annual session at Eric, a., Dec. 13-16, 1904, we clip the following concerning good roads, school oppopriation, trolley legislation and reight discrimination:

All the people have equal rights to the public reads and we can not under-stand why the farmers should alone have been compelled to build and main-tain them. Good roads are also of equal importance to all interests, therefore no class of property should refuse to assist in paying for them. When in support of this position your legislative nmittee asked the legislature to tax ersonal and corporate property in-luding manufacturing corporations, be small sum of one mill for road purposes, the legislature falled to pass t. Such a tax would yield at least two and one-half millions of dollars annually Under our present system of taxation we still contend that this is the right way to raise money from these interests for road purposes. It must be kept in mind that good roads cost money and lose of it."

d lots of It. We believe that the money so raised ir money appropriated should be divid-d among the different townships noording to their respective road mileag or permanent road improvements. A our past road legislation has added additional taxation. The road law of 1903 is a failure in nearly all the countles of the state. Several of the most wealthy sections seem to be the only exceptions. If this law is to be any use it must have some radica amendments. There are possibly twelve thousand miles of main traveled read There is no just reason why po-cownships should be taxed to improve and repair these main roads when the are used for inter-county and star

While the act of 1903 makes an appr printing act of 1993 makes an appropriation of five hundred thousand dulars amountly for 1993 and 1994 increases local taxation on real estate and the loss of local control. It cannot be claimed that the appropriation of \$1500,000. 500,000 annually represents mon-ollected from corporations for the eason that the state collects taxes from the countles which by right belongs he countles and should never be paid

into the state treasury.

We are opposed to the repeal of the law known as the Bridge Act of 1885 whereby the state rebuilds bridge over public streams which have been swopt away by floods. This law is you eneficial, especially to poorer counti f the state. We favor national aid f of the state bublic road improvement provided it is not coupled with additional taxation the farms. We believe that more on the farms. We delieve that mone so spent is of more use to the people of this nation than to waste it on far oposession or in building a big navy We are in favor of peace and believ hat disputes between nations should? ettled by arbitration.

We favor an increased public school appropriation, at least the \$11,000,000 should be kept for the public schools with no deductions therefrom except or township high schools. The amount appropriated at the last session of the egislature to these schools was \$100,000. We are in favor of increasing this t 200,000 if that amount is necessary carry out the provisions of the ac-

eating township high schools. We demand that trolley roads shall have the right to carry freight. This privilege is granted to them in tates except Pennsylvania and New

We demand that our legislature enact law problbiting freight discriming loss whether done directly or by in direct means. Excessive freight rate and discrimination in rates has robber he Pennsylvania farmer of millions of follars. We favor the granting of in reased powers to the inter-state comnerce commission.
