THE STATE GRANGE.

J. T. Adman, Press Correspondent.

No, the officers and Legislative Committee of the Pennsylvania State Grange are not "afraid" to speak out on the tax question or any other questions that is of special interest to the agricultural class. There are now three bills pending before the legislature which, if enacted, will give substantial relief to the tax burdened farmer. Letters and memorials are now pouring in upon the members of the House and Senate urging them to work and vote for these measures.

One bill proposes to return to the counties the license fees and nine-tenths of the personal property tax instead of the three-fourths, as now.

Another will levy a tax of one mill on the capital stock of corporations for road purposes, and the other will give \$150,000 for the establishment and support of township high schools.

If the farmers of the state generally could be rallied to the support of these measures as the members of the grange are rallying, they would be passed. This done the next step towards the full equalization of taxes in the state would be easier.

Meeting of Pomona Grange.

The regular meeting of Jefferson County Pomona Grange No. 20, P. of H., was held in McKnight's hall, Brookville, Wednesday, March 8th, 1905. Meeting was called to order at 10:30 a. m. by Worthy Master J. M. Norris and all vacancies were filled by appointment.

Worthy State Lecturer A. M. Cornell installed the following officers: Lecturer, Stewart, Assistant Stewart, Address of welcome by W. L. McCracken, of Brookville; response by Mrs. A. J. Sprague, of Paradise Grange. Adjourned to meet at 1:30 p. m.

Grange was called to order at 1:30; Question: "What do you think of Parcel Post?" Which was ably discussed by W. L. McCracken, Dr. McKnight and A. M. Cornell. Grange then closed and a public session convened until 4:00 o'clock.

First speaker was Mr. Truman who gave us a very interesting talk on his travels through the South. He also complimented the farmers of Jefferson county on maintaining fertility in their soil. A committee consisting of John Dougherty and W. L. McCracken made their report. Report was accepted, then the Hon. Judge John W. Reed was introduced. He gave us a fine and interesting address, which will be published in the next issue. Solo by Sister Anna Bullers, of Union Grange. State Lecturer A. M. Cornell lectured on the "Benefits Derived from the Grange." Dr. W. J. McKnight gave us a rambling talk and then introduced his seedless apple of sixty years ago. I think from the appearance of the fruit they did grow sixty years ago. Recitation by Mrs. Ada Scott, of Union Grange. Subject, "The Farmers Telephone." Solo by Miss Maggie Milliron, of Union Grange.

Recess of ten minutes.

Grange again convened in full form. On motion by John Dougherty, second by W. L. McCracken, that each granger provide his or her own lunch while attending Pomona Grange. Motion carried by a unanimous vote. A rising vote of thanks was extended Dr. McKnight for use of his hall. Then Grange closed in full form to meet with Horn-ton Grange in June.

The program was interspersed with music by Union Grange.

SECRETARY.

Two Ways of Doing Business.

I have seen in London only one office where there is any real enthusiasm. And the employees seldom have any interest in the business beyond drawing their salaries. In most of the factories, and even in the offices, they are taught a certain round of duties, and they are allowed to do nothing else. They seldom suggest improvements for fear of losing their places, where in America they'd soon lose their places if they didn't make suggestions. Here it's the firm in its private offices and everybody else doing as little as possible and never stepping out of the rut they're put in, and there it's everybody working together, coats off, and the head of the concern glad to listen to the office boy and to do as he says if it means results.—Vanity Fair.

We have just received spring styles of New Idea Patterns—the only popular paper pattern to retail at 10c on the market.

Corner Main and Fifth Streets. Reynoldsville, Penn'a.

The one industry on which all others rest and which is a condition of their existence is agriculture. Enterprises of great magnitude, far-reaching importance and employing large capital have sprung into existence, flourished for a time and disappeared because supplanted by something else. Not so the farm. It made civilization possible and will be its stay and support to the last. All true patriots respect agriculture and will give it every encouragement. The farmer owes it to himself and to his calling to do all he can to secure proper recognition. This he can do only through organization. To such as realize this the doors of the grange stand open.

Colonel's Waterloo.

Colonel John M. Fuller, of Honey Grove, Texas, nearly met his Waterloo, from Liver and Kidney trouble. In a recent letter, he says: "I was nearly dead, of these complaints, and, although I tried my family doctor, he did me no good; so I got a 50c bottle of your great Electric Bitters, which cured me. I consider them the best medicine on earth, and thank God who gave you the knowledge to make them." Sold, and guaranteed to cure, Dyspepsia, Biliousness and Kidney Disease, by H. Alex Stoke's druggist, at 50c a bottle.

Ancient Eggs in China.

A German epicure comes to the rescue of the Chinese in regard to their alleged habit of eating rotten eggs. The eggs, he says, are simply preserved in lime until they get a consistency like that of hard butter and they taste somewhat like lobster. He declares them one of the choicest delicacies he has ever eaten. He thinks there are no better cooks in the world than the Chinese. When he went to live among them his friends predicted he would starve, but he had a good time and gained weight—more than he wanted to.

Balky Steam Boilers.

According to an engineer, though there may be every reason present why a steam boiler should steam there are occasions when it simply will not. It refuses duty and sulks without any cause that can be detected. On such occasions every one takes a hand at the fires, but the result is the same—no steam or only enough to keep three-quarters speed. Marine and stationary boilers are both thus afflicted. There are "good days" and "bad days" in the performance of each.—Chicago News.

Get Busy.

The successful man is usually busy, and the busy man is usually successful. The young man, whatever his vocation, who has not learned to economize his time and keep busy has not got the lesson most essential to a prosperous, useful and happy life.—Chicago Tribune.

A Great Combination.

"You and your husband have lived together twenty-five years and never had a quarrel? What's the secret?" "No secret at all. I'm too good natured to quarrel, and he's too indolent." —Exchange.

Rejected Engines of War.

Certain engines of war have been rejected by civilized nations in times gone by because they were too destructive and too horrible. Edgland has still in keeping a secret war plan of the tenth Earl of Dundonald which the authorities rejected because, while it was infeasible, it was too inhuman to use by man against man. Even Louis XV. of France had backbone enough to refuse Dupre's terrible invention. If the story of this discovery be true the plan was to create by a secret process a conflagration whose intensity was but increased by water. It would burn town or fleet. Louis refused to have the secret published, and it went down to the grave with Dupre.

It Makes Restful Sleep.

Sleeplessness almost invariably accompanies constipation and its many evils—nervous disorders, indigestion, loss of appetite, etc. To induce sleep by opiates is a sure way to the brain in only temporary relief. Celery King removes the cause of sleeplessness by its soothing effect on the nerves and on the stomach and bowels. Celery King cures Constipation and Nerve, Stomach, Liver and Kidney diseases.
