Minister Bowen's telegram formed the principal topic of discussion at Friday's meeting of the cabinet. That the situation is not regarded as acute at this time was indicated clearly by determination of the President the and his advisers to pay no present heed to Castro's refusal to arbitrate. It is the indicated intention of the President and Secretary Taft, who, in the absence of Secretary Hay, is being relied upon for advice in matters pertaining to foreign affairs, simply to await further developments in Venezuela. It is not believed that the situation now is of such a character as to warrant alarm. Indeed, the President is proceeding with the arrangements for his southwestern trip without reference to the Venezuelan dispute
