Pawnee Bill's Circus.

How many of us are there, who have not upon returning from a circus, with a splitting headache, soiled clothes and painful eyes, registered a vow that we bould never attend another circus? Many of us have kept it. The sickening odor from the menagerie, the uncomfortable board seats, the vain atempt to evet our attention on two or logs at the same time, the unrable heat that all enclosed tents are bound to draw and retain and the sweltering mass of humanity under the tent produce this, and on many cecasions, more serious illness. With the Pawnee Bill Historical Wild West and Great Far East which will exhibit at Brookville on Tuesday, May 23, all this 15 overcome. Promotions and Grading in the Public Schools.

Since the close of the schools some of planation with reference to the promotlow of their children. Some of the teachers likewise report similar experleaces. In order that all may understand as clearly as possible the principles of promotion and classification, I deem it wise to make this public explanation. What I shall say will pertain only to the first eight grades of the school, not including the two grades in Room 13 and the three grades of Room 14. On account of crowded condition of

the lower grades for the past two years it has been necessary to have two rooms doing the same grade of work. Last year rooms 2 and 3 were doing first grade work; rooms 4 and 5 second grade; rooms 6 and 7 third grade. Next year it will be necessary to have two rooms doing fourth grade work. Now this necessitates the opening of another room parallel with room eight. The extra room however, to be furnished will be in the basement. The two basement rooms will represent the first grade work for next year. Rooms 3 and 4 will be occupied with second grade work, Ira L. Beebe, passed away, Lester being 5 and 6 with third grade work, and 7 and 8 with fourth grade work. In all of the eight grades each room will have centum additional, together with three classes, designated the A, B and C classes. In the promotion of pupils the strongest of each grade were promoted to the A class of the next grade, those not quite so strong to the B class, and these who were weakest and yet worthy of advancement to the C class. On this basis of promotion where two rooms were doing the same work, some pupils were retained in the same room, though they were promoted to the next grade of work. Rooms 3, 5 and 7 next year will have work one grade higher than that done the year that has just closed. No pupils who

> to remain in the same room two years. The object of making three classes in the same room is for the purpose of better teaching by reason of smaller classes. A further end is that the bright pupils may not be held back in their classes or grades when they can do harder or more advanced work. They may be put into the next higher class of their own grade or into the lower class of the next grade above them. In this way each pupil will be enabled to advance as rapidly as possible, unless checked because of crowded conditions of the rooms.

were worthy of promotion have been

held back, even though they will be in

the same room another year. The

raising of the grade of the rooms men

tioned above causes some of the pupils

Many of the best schools of the state have this method in operation with the most satisfactory results. This change of the method of promotion and classification was done with the approval of the board of directors and teachers.
