# MOTHERHOOD

Actual Sterility in Women Is Very Rare-Healthy Mothers and Children Make Happy Homes.

themselves with Lydia E. Pinkham's Vegetable Compound, which for thirty years has sustained thousands of women in this condition, there would be a great decrease in miscarriages, in suffering, and in disappointments at birth.

Mrs. L. C. Glover, Vice-President of

Milwaukee Business Woman's Associa-tion, of 614 Grove Street, Milwaukee, Wis., writes:

"I was married for several years and no children blessed our home. The doctor said I had a complication of female trouble and I could not have any children unless could be cured. For months I took his medicines, trying in vain for a cure, but at last my husband became discussed and suggested that I Many Women Have Been Benefited by Mrs. Pinkham's Advice and Medicine.

Many women long for a child to bless try Lydia E. Pinkham's Vegetable Comtheir homes, but because of some debility or displacement of the female child came to be some whome. Now we have

organs they are barren.

Preparation for healthy maternity is something to live for, and all the credit is due to Lydia E. Pinkham's Vegetable Compound more successfully than by any other medicine, because it gives tone and strength to the entire female organism, curing all displacements, ulceration and inflammation.

A woman who is in 1 od physical condition transmits to her children the blessings of a good constitution. Is not that an incentive to prepare for a healthy maternity?

If expectant mothers would fortify themselves with Lydia E. Pinkham's Vegetable Compound was recommended to me, and I am so glad I took it, for the changed me from a weak, nervous woman to a strong, happy and healthy one within seven months. Within two years a lovely title girl was born, which is the pride and loy of our household. Every day I bless legistable Compound for the light, health and happiness it brought to our home."

If any woman thinks she is sterile, or has doubts about her ability to earry a child to a mature birth let her write The following letters to Mrs. Pink.

to Mrs. Pinkam, Lynn, Mass., whose advice is free to all expectant or would-be mothers. She has helped to Mrs. Pinkam's Vegetable Compound in the control of the con would-be mothers. She has helped thousands of women through this anxous period.

men suffering with irregular or painful menstruation lencorrhoa, dislacement ulceration or inflammation f the womb, that bearing down feelng or ovarian trouble, backache, bloating or nervous prostration, should re-member that Lydia E. Pinkham's Vege-table Compound holds the record for the greatest number of actual cures of woman's ills, and accept no substi-

SAYS MEN CAN LIVE FOREVER.

Be Done.

Treating lightly the habit of dying, to which men have been slaves for of years, Henry Gaze London told a small company of per-sons gathered in Odd Fellows' Teme. Philadelphia, that they could live prever if they would just apply heir minds to the effort.

Gaze is the author of a book entled "How to Live Forever." Anxious propagate his theories as to evering physical life, he is making a turing tour in this country.

"Practical psychology, rejuvenating et and regenerative life" are the principles of Gaze's scheme. He lds up perpetual youth as being so casy of attainment that one is fool

If one is old he can regain youth, and if he doesn't like his body he transform it into any mold of form and cast of features that he desires, Thus he can get rid of any defects that happen to mar his beauty or at-

Gaze would get rid of the death of the body by dying little by little, an atomic or "up-to-date" death, as he described it, while the "rejuvenating diet" and "regenerative life" get in their work by building up the body; replacing the dead atoms, as they are given off, with new ones.

Control over the subconscious soul that governs the rebuilding of life is all that is necessary.

Animosity toward the government may lead to good results to the individual. Thus in Poland thousands of workmen are said to have quit the drinking of spirits and the smoking of tobacco in order to deprive the gov ernment of the revenues from those sources. Not only have the workmen themsives "sworn off," but wherever they see a man smoking or drinking they appeal to him to practice selfdenial in order to mark popular discontent with administrative abuses. In many instances the smokers and arinkers comply, and the Russian ournals express the fear that, with the spread of the movement, there will be serious decrease in the revenue. Also there will be a corresponding imrovement in the conditions and the ealth of the workingmen.-Philadelphia Ledger.

Toronto as a Phoenix. It is now a year since Toronto lost property to the value of \$12,000,000 by fire. This property was in the heart of the city, of the business section. and there was the usual percentage of insurance. In the past 12 months more than one-third of the burned area has been covered with buildings more substantial than were the old, and contracts have been let for Several of the concerns which were burned out have put up fine buildings in other parts of the own, so that, on the whole, the Cana-I do it thoroughly. dian city may challenge comparison and enterprise.-Philadelphia Ledger.

A London specialist has saved a man's hand from amoutation by grafting the sciatic nerve from a live

SUB-SOLLING FOR ORCHARDS.

Fruit trees, and particularly apples equire a deep soil and, of course, one bat is fairly rich. There are hundreds acros of righ clay soils that would to splendidly for apples if properly repared. Trials which have resulted n failures have been almost wholly ine to the fact that the soil had not een opened deep enough to permit the rocts of the trees properly to penetrate

If such soil had been sub-soiler using the implement made for that purpose which does not throw back . vide furrow, the roots would have : chance to get into the soil severa nches deeper than otherwise, and after hat would be strong enough to piere he soil below without it being loc ned. Of course it must be remer pered that the soil below the distant cenetrated by the subsoller is wet an emains so, it is not suited to tree root in the other hand, if it is simply w nough to retain a good amount edsture, the trees will then make cost distratte grawth.-Indianapoli

PRUNING GRAPES. Grape vines should be pruned by March; but some delinquent though ellemeaning nerson may desire now what should be done if if runing has been neglected. cut back the vines row, or skull low them to go untrained?" We hall not advise the owners of vinards, nor consider it necessary, fo hey are not the parties who delay his work. We shall simply relate our wn experience to the average farm villager who has a few vines. We ive pruned our vines during Marc several occasions and have o eved no bad results; but year id our frimming not earlier than siddle of the month. To be sure th ines chould be triumed while di non:-January or February are be r-but not much sap in moving early March in this latitude. Our advice to trita at once this time and do efter next year. If you have a viant you are training over the hous over a mug trellis, do not pay any ittention to theorists who would be nence you to cut back the main vine hey may the fruit will not be sail actory if ico far removed from the and of the viae. We have grapes a wo rides of the house, all growing from a single base; the fruit at the ex remities of the vine-at least third feet from the base-is an perfect as

THE BROWN-TAIL MOTH.

ams, in The Litourist.

my clusters found elsewhere. Ins

stretch out the vine to suit your de

dres; if you find the fruit at the ex-

remities getting slighted it will b

emple time then to cut it back. The

size of clusters depends very much

more on keeping the vine thinne

well throughout than on distant

from the baral ctalk.—Googe P. Will

The ravages of the brown-tail mo iave become so great in different par of the country that some concerned a fort should be made to externilua the pest. The eggs of the female at aid on the leaves of the tree, and are

MOTH, CATERFILLAR AND WED.

of the moth in the caterpillar state be sins its ravages on the tender foliage On the approach of winter the cute pillars construct heavy webs, in which they live until coring, when they come out to feast on the buds, blossoms and leaves. It is at this season of the year, and later, while the trees are de void of foliage that the main work to exterminate them must be done,

While the moth is in whater quar ters he and she can be readily reached Obtain a pruning shears mounted on ong handle and operated by a wire i the hands, go through the trees of the orchard and anywhere on the grounds and cut off the twigs on which the mass of web hangs. Lay them in pile prefully, then gather them, and, after taking them out of the crchard, bur them. Only in this way can one be certain of their destruction. The plan of fastening a bunch of cetton waste to a pole, setting fire to it and holding the lighted torch to the web until 1 is consumed is also a good one. Better get at this work during the winter and

The illustration will give the reader with our own in the matter of pluck, some idea of this pest. The female moth is shown, as well as the enterollier, and also a twig of a tree show ing the web attached. As this latter has been accurately drawn it will not be difficult to identify the web of the brown tall moth.-Indianapolis News. | of the next century.

\*\*\*\*\*\*\* FARM TOPICS.

FEEDING OLD HORSES.

When horses get old their teeth fre juently get out of order and become sharp and irregular at the edges, so as to wound the gums; probably a melar tooth gets broken off, so that its antagonist becomes long and projecting, and in time prevents its neighbors from doing their duty. While the cld man, under similar eiremastances, can resort to a dentist, or to soup, bread and milk or to the sausage machine, the old horse is expected, in the generality of cases to musticate his food as well as ever. The same food is given as to young horses, except perhaps, a little corn is taken from the old horse to feed those that answer the best for it Laborers have no respect for old age in horses more than in other cases. Gradually the old horse gets lower and lower, and he is termed "worn out." Here, then, is the case for the specia food, and hence the marvels it effects n such a case by supplying the nourshment in the form of meal, doing that for the old horse that he would not do for himself.

#### DAIRY DOTS.

If the butter is mottled, work it a little after salting.

If the butter is too soft, feed the cow ome potatoes.

Stringy milk can be cured by keeping he cows clean Wash all milk vessels with cold water

sefore scalding. Whitewashed stables mean fewer

lies and more milk. Crosses are usually better for farmrs than pure breeds. Whenever possible test the cow's

nilk before buying Lov. A cow that tests below three per ent, is not worth keeping. Cows and herses should not be al

swed in the same pasture. Richer feed does not mean richer allk: it means more milk. The calf should have new milk ex-

insively the first fourteen to twenty You waste twenty-five per cent, of your butter in summer by not using a

eparator. Adding hot water to cream while burning is the worst of all practices, If the butter takes too long to comadd one or two fresh cows to the

dairy. Warm milk from the cow does not absorb odors. While cooling keep it in pure atmosphere.

Pair the animals of such families as give much and rich milk, so the progmy will produce much and rich milk. When butter is poor don't blame the

Blame your own want of skill. Heating milk to 100 degrees pasteurtes it. Stir it constantly while hot, Pair animals of similar character so you may know the kind of progeny to expect

Do not pair too young animals: that nakes both parents and progeny suf

Make a memorandum of the milk yield, and, if possible, its test; only thus can a positive knowelge of the ow's value be secured-Rice-Journal and Gulf Coast Farmer.

A GOOD END POST.

In a recent Oblo Farmer, one of the readers advises others against the fighatched in midsummer, and the pest are 4 style of end post braces for fence, have on my farm, says Chancy Avery, fourteen end posts of this type, all giving as good service as I think it possible to get from any wood post some of them have been set for six years, and the truss rods have needed no tightening, and I am confident that with the right principle of construction, carefully executed, this style of brueing will be found the best. Thorough work is essential to success with any style of bracing. Too short braces lift too much on the end post, and I think this is the main source of failure In erecting the Fig. 4 type, I set my posts as shown in the sketch. The post A is fourteen to eighteen inches n diameter, and set three and one-half feet in the ground and has two pieces of two by twelve plank three feet long spiked to faces on the post, as shown at F F. The large stone, D, i flat and about twice as large as a macan lift, and finely settled in its bod with its top about three or four inches above ground. On this stone rests a brace shoe of three-eighths by four

END POST BRACE.

inches wagon tire izen, bent as shown with a hole in the straight end, through which the red C is bent or booked as shown. . C is a three-fourths inch roc twelve feet long and has five inches of thread, a nut and a very large (three or four-inch) washer on the other end which passes through a one-inch hole in the post about six inches above the surface of the ground. If the post ever sags forward it can be righted by removing dirt from the back of post as indicated by shaded line G, and then were very irregular, dark colored and tightening the not on the rod. It is a full of sediment. The Pills cleared it good plan to fill the thread on the rod all up and I have not had an ache in thoroughly with axle grease, to pre my back since taking the last dose, vent rust, before putting it in. If read My health generally is improved a ers desire I will in future describe great deal." some other posts I have in use, which evidently will be all right at the dawn For sale by all dealers, price 50 cents

Fixing Railroad Rates.

Making railroad rates is like playing game of checkers or chess. Communities to be benefited, producers, manufacturers or shippers to be aided represent the pieces used. Every possible move is studied for its effect on the general result by skilled traffic managers. A false move in the making of freight rates may mean the ruin of a city, of a great manufacturing interest, of an agricultural community. Rall roads strive to build up all these so that each may have an equal chance in the sharp competition of business. So sensitive to this rivalry are the rail roads that in order to build up business along their lines they frequently allow the shipper to practically dictate rates Rate making has been a matter of de velopment; of mutual concessions for mutual benefit. That is why the railroads of the United States have voluntarily made freight rates so much lower in this country than they are on the government-owned and operated rail-ways of Europe and Australia that they are now the lowest transportation rates in the world.

Japanese Immigration.

Within the past few months an agitation has been started in California against the coming of the Japanese to America, which resembles that which resulted in the exclusion of the Chinese 25 years ago. The legfslature has memorialized congress to take action on the matter, and the recent decision to employ coolles in the construction of the Panama cana has added to the prejudice fell against a race which is regarded as ready to ursurp the place of the American laborer.

A small boy who was waiting with his mother in a twelve-story office building on Chestnut street the other day, watched with fascination an indienter which showed, by a pointing hand on a dial, where the mounting car was. "Mamma," he said, "now I know why everybody here hurries so. Just look how fast that clock goes!"-Philadelphia Record.

Schiller's Father's Wish.

Apropos of the Friedrich Schiller centenary it is interesting to recall that when the news of the birth of the poet reached his father, the latter besought God to bestow upon the boy "those gifts of mind and soul to which he himself, through lack of education, had never attained."

CAPT. GRAHAM'S CURE

Sores on Face and Back-Tried Many Doctors Without Success-Gives Thanks to Cutleurs.

Captain W. S. Graham, 1321 Foff St., Wheeling, W. Va., writing under date of June 14, '04, says: "I am so grateful I want to thank God that a friend recommended to thank Goil that a friend recommended Cutieura Soap and Ointment to me. I suffered for a long time with some on my face and back. Come doctors said I had blood poison, and others that I had barbers' itch. None of them did me any good, but they all took my money. My friends tell me my skin now looks as clear as a haby's, and I tell them all that Cuticura Soan and I was a Chatman did it. Soop and Cuticura Ointment did it."

Gardening as a "Cure." Few of us know that a far better cure for all our health troubles than any of the patent medicines which are so constantly recommended lies at our doors in more senses than one-i, e., the garden cure, says Amateur Gardening. This idea is at last breaking through the crust of cen-turies and emerging to the light; so that garden cities, lady gardeners. horticulture and agriculture and vari ous signs of coming sanity, amateur gardening being one of the most conspicuous, are all on the increase. Al we have to do is to open our doors and live in our gardens.

The Biggest Idel.

Some two miles from Kamakura and about 20 from Yokahama, in Ja pan, on a terrace near the Temple sits the most gigantic idol in the world. It is a brazen image of a deity, and it dates from the reign of the Emperor Shomu, who died A. D 748. The dimensions of this idol are colossal. Its height from the base of the lotus flower upon which it sits to the top of its head is 6314
