## MANY CALLS FOR MONEY

President of the New York Life on Witness Stand.

Told of Large Sums Paid to the Company's Legal Adviser Without Vouchers.

John A. McCall, president of the New York Life Insurance Company, while on the rack of the legislative inquisition denied the New York Life contributions during the period of his presidency, except in the three instances which Mr. Perkins had already detailed, and he could not explain to what account those donations had been charged up.

. McCall volunteered the additional statement that Alton B. Parker, when chairman, had never misseed a chance to collect corporation money for campaign purposes, and that even during the national campaign last year the Parker managers had been a source of continual annoyance to him, dogging him with their solicitations for money,

Mr. McCall denied with vehemence that a dollar of the New York Life's money had ever been used, with his knowledge, in the effort to influence legislation in New York or any other state, but admitted that hundreds of thousands of dollars of the company's money had been advanced solely on his order to Andrew Hamilton of the New York Life's law department. Mr. Hamilton represents company in "legislative and tion" matters in the various taxation" states in this country, as well as in

Mr. Hughes brought out admissions that \$235,000 thus advanced remains unaccounted for, and that it is customary for Mr. Hamilton to report his expenditures exclusively to Mr. McCall, who takes Mr. Hamilton's receipts and vouchers. The witness admitted the company has on record no vouchers for any of these expenditures made by Hamilton and has not had since the beginning of "Judge Hamilton's connection with

HEALTHY TRADE CONDITIONS

Manufacturing Plants Being Kept Busy, a Heavy Tonnage of Iron and Steel Being Placed.

R. G. Dun & Co.'s "Weekly Review of Trade" says: Current trade shows a distinct gain in comparison with the same time last year; crop reports SAID THERE WAS NO BOODLING are reassuring, and evidences of continued activity are noted in almost every department of industry. growth without wholesome threatening danger of reckless inflation of prices is a commercial con dition greatly to be desired, these elements are recorded in the

majority of dispatches. Fall trade is now well under way especially encouraging results being achieved in dry goods, millinery. footwear and all lines of wearing ever had made political campaign apparel, while mercantile payments are unusually prompt for the season. There is a steady consumption of groceries and other staple articles of food, and in furniture, crockery and numerous household utensils the distribution is vigorous.

Manufacturing plants in leading in dustries receive large orders, a heavy tonnage of iron and steel business being placed and machinery making very cheerful reports; footwear shops have ample business in sight; textile mills are busy, though new contracts come forward en by Russia without first reaching more slowly; flour mills and saw mills have enlarged production, and the fuel markets reflect the stimulus of active factories. A little damage was done by floods in the Southwest, but weather conditions are favorable, on the whole. As grain comes to market more freely there is difficulty in averting freight block ades, and railway earnings thus far available for September exceed last year's by 2.5 per cent. Foreign commerce at this port for the last week showed a gain of \$532,846 in imports but a loss of \$1,068,163 in exports.

Failures this week numbered 206 in the United States against 225 last year, and in Canada 34, compared with 30aeyarthe,o pfwypfwypfwyp dl with 30 a year ago.
