TEACHERS' RECEPTION.

Refreshments Were Served-Short Addresses Delivered-Everybody Had A Pleasant Time.

The reception given in the public school building last Friday evening, under the auspices of the Mothers' Club, for the teachers of the public schools, was a pleasant affair. There were a large number present, mostly of the gentler sex, and everybody seemed to be glad they were there. The teachers were given a cordial greeting. The people were very generous with kind words and complimentary expression to the teachers, and if they don't feel now that their work is appreciated by a large number of parents and patrons, they must be hard to convince.

The second floor of the school building was used for reception and serving light luncheon. After au hour or more had been squandered in hand

shaking, pleasant greetings and partaking of lunch, the crowd ascended to Assembly hall to listen to a short program provided for the occasion. Dr. John H. Murray, one of the school directors, presided. Program as follows: Address of welcome, Rev. A. D. McKay; response, Prof. Clifford J.

Scott, principal of the schools; plano solo, Miss Marie Altman; address Lawyer Clement W. Flynn; selection by female quartette. Misses Mary Parsons, Lillian Harries, Edith Herpel, Marian Harris: address, Leonard Harris: plano solo, Miss Mary Parsons; three minute talks by Rev. A. J. Meek, Rev. J. A. Parsons, Dr. J. W. Foust and Hon. S. B. Elliott: good night song by female quartette.

Si Stebbins

The performances of "Si Stebbins" are commendable and are certainly appreciated. The play is a series of realistic pictures of rural life as seen from a humorous standpoint, and is consequently popular. All the familiar rural scenes, such as the farmer in blue jeans, the country dance, etc., are accurately portrayed and the scenes which materially lend well to humorous depictions are made the most of in such a manner that the audience is kept in a constant uproar of laughter. There is no real

The Window Glass Situation We have been asked to give the readers of THE STAR some information in regards to the trouble. We reply by saying that the trouble is principally imaginary. The only real difficulty being the machine made product, which costs very much less than that made by hand. However, the machine equipped factories are only able to make about onethird of the amount required by the market, hence the balance must be made by hand. In order to protect the pusiness of the hand manufacturer as well as the worker, it is absolutely ecessary for them to join heart and hand in a war against the machine manifacturer. The only feasable suggeston thus far, is a scale of wages which

will adjust itself either up or down in ccordance with the market. The result of the present dead-lock is s follows: The twenty-four hundred

workers who are idle are losing at least \$10,000 dollars per day in wages and the manufacturers who are idle are also los ing.

The machine manufacturers, the cooperative element and the Burns organization are all reaping a share of the prosperity caused by the failure of the Faulkner or Amalgamated workmen to accept a scale of wages which is now paying more wages than the scale they tre asking.

The question naturally arises, why ot sign the Faulkner scale? We an swer: because the American Window Glass Company are and have been fo months past storing the greater portion of their out-put, and should we resume under the Flat or Faulkner scale, they will dump this stock on the market at a price below our cost and force us out of disst.

Hence, we say, the only real trouble the machine, and this we believe can e overcome with the hearty co-operaion of the hand operating manufacturrs and the workers.

If any one else has a better solution e is serving the best interest of the American | Window Glass Co. by re maining quiet.

This One To-Night.

Whenever the name of Culhane, Chase and Westen is known, it stands us a synonym for honest advertising and promises faithfully fulfilled. Making to extravagant claims or false promises athor contonting themselves with giv ng the fest possible performance and otting that be their chief advertising factor, they now have, at the end of their eighth successful season, a reputa ion that is virtually an absolute guarantee as to the fine quality of the attraction. The organization is certainly not to be classed with some of the "fly by night" companies that one some

times sees. On the contrary, the Culhane, Chase and Weston Minstrel cests on a firm financial foundation, naving a home office at 1368 Broadway, New York City, from where the affairs of the company are directed in a conservative and strictly business-like manne so essential to the success of any enterorise, either theatrical or commercial thereby giving the amusement loving public the best possible entertainment at the lowest possible price. The splendid minstrel organization will be the atplot to the play, but this fact is soon lost traction at the Reynolds opera house to-night, and all indications point to an
