Feeding Eggs to Calves.

J. S. Dowdy, of this region, feeds most of the hen eggs laid on his premises to his calves. He says that he will never sell hen fruit for less than 16 cents a dozen as long as he had any calves to swallow them. Mr. Dowdy claims that it pays very handsomely to feed raw young cattle. He says that the calves fat and tall on raw eggs, and that they relish them to an astonish ing degree. He says that egg-fed veal exceedingly toothsome and nutritious.-Kansas City Journal.

The Eric Railroad has arranged for the Into Erre Kairroad has arranged for the immediate expenditure of \$225,000 for the installation of the most modern and efficient railway signal that has yet been put on the market. It is known as the Hall Electric Semaphore Normal Clear System, Electric Semaphore Normal Clear System, and is operated by stationary storage batteries. The line between Bergen, N. J., and Middletown, a distance of 68 miles, is to be equipped at once. For the first 32 miles the signals will be put two-thirds of a mile apart; for the rest of the distance, about one and one-third miles apart. It will require five power plants for charging the batteries, which will be located at Rutherford Junction, Ridgewood Junction, Suffern, Oxford and Middletown. The line to be protected has two and four tracks at to be protected has two and four tracks at different places and is the most congested part of the Erie system. Hitherto a man-ual block, which is a tower with signals operated by a towerman, has been used as a block protection, but it has been deemed best to install an automatic system for further protection and to accelerate the movement of trains. The new system will be extended over the entire line in the fu-

Long Submarine Tunnels.

Much attention has been attracted to the opening of the new subway tunnel under Boston Harbor, but the longest tunnel under water is in England, where the ? is a tunnel under the River Sever four miles 624 yards long, of which two and one-half miles are actually under water. posed tunnel under the English chan nel will be 23 miles in length, and the latest project is the construction of a tunnel to connect France with England, which would be 33 miles length and would lie at a depth of 500 feet below the bottom of the channel. The longest submarine tunnel actually in course of construction is that connecting the islands of Sicily with the Italian mainland, which will be eight and one-half miles long.-New York Herald.

Incomplete Education

Professor William James, of Harvard university, in a recent address said: "There is not a public abuse on the whole eastern coast which does not receive the enthusiastic approval of some Harvard graduate." And he added: "Fifty years ago the schools were supposed to free us from crime and unhappiness, but we do not indiuge in such sanguine hopes to any such extent to-day Though education frees us from the more brutal forms of crime, it is true that education itself has gut even meaner forms of crime in our The intellect is a servant of our passions and sometimes education only makes the person more adroit in carrying out these impuls

HONEST PHYSICIAN. Works With Himself First.

It is a mistake to assume that phy sicians are always skeptical as to the curative properties of anything else than drugs.

Indeed, the best doctors are those who seek to heal with as little use of drugs as possible, and by the use of correct food and drink. A physician writes from Calif. to tell how he made a well man of himself with nature's remedy:

"Before I came from Europe, where I was born," he says, "It was my custom to take coffee with milk (cafe au lait) with my morning meal, a small cup (cafe noir) after my dinner and two or three additional small cups at my club during the evening.

"In time nervous symptoms develoned, with pains in the cardiac region, and accompanied by great depression of spirits, despondency-in brief, 'the blues!" I at first tried medicines, but got no relief, and at last realized that all my troubles were caused by coffee. I thereupon quit its use forthwith, sub-

stituting English Breakfast Tea. "The tea seemed to help me at first but in time the old distressing symptoms returned, and I quit it also, and tried to use milk for my table beverage. This I was compelled, however, to abandon speedlly, for while it re Heved the nervousnes somewhat it brought on constipation. Then by a happy inspiration I was led to try the Postum Food Coffee. This was some months ago, and I still use it. I am no longer pervous, nor do i suffer from the pains about the heart, while my 'blues' have left me and life is bright to me once more. I know that leaving off coffee and using Postum healed me and I make it a rule to advise my natients to use it." Name given by Postum Co., Battle Creek, Mich.

There's a reason.

JOHN PAUL JONES IN LOVE AND WAR

0.0 d

AN INTERESTING STORY OF THE GREAT NAVAL HERO.

these columns the follow- man can wish more ardently to support ing historical article relating to this re- its rising glory than myself."

markable man. I reproduce it now in response to the public desire for facts order for the dismissal from Texel, an concerning the naval hero. I have island of Holland, "of a certain Paul nothing to add to it, save that he is Jones, a subject of the King, who, acnow to have his imposing tomb on the cording to treaties and the laws of soil of the country he fought to save war, could only be considered as a and advance in a new destiny.

Among the remarkable men identified as leaders with the American Rev olution-and no patriotic cause ever ity and success as a naval commander. terror to children, still this was at the a "rebel," when Franklin was denounced as a "hoary-headed traitor," and Samuel Adams and John Hancock were considered as meriting "condign punishment." The valorous and desperate achieve

nents of Jones at Whitehaven, near his early Scottish home, and on board the Bon Homme Richard, in the capture of the Scrapis, forty-four guns, drew upon him not only denunciation. but the vivid picturing of fancy in the books of the day, to which generations in Great Britain have clung. As a matter of fact, his sublime courage and his fierce purpose were dedicated to the cause of American liberty, which he espoused with his earliest years, and his severity was only what he considered just retallation for the atrocities enacted in this country by the British commanders. He wished "to put an end to the burnings in America by making one good fire of the English

shipping." He was the earliest officer of the Navy with a spirit and capacity for daring exploits necessary in a contest of the feeble against the strong, and the one also who gave the first ideas, and put them into execution, for a per-

manent American Navy. Wth some difficulty it has been corned that the remains of this illustrious man are in an obscure cemetery in Paris. It is proposed to remove them to this country, as he died a naval here and a steadfast patriot. His private papers were in the possession of first one and then a second gentleman of this city, and finally passed to the ands of a third person.

I propose to draw more especially from this source some interesting particulars in regard to Jones, who was or less brave with his sword than gallant with tongue and pen.

John Paul Jones was born at Arbeg ang, Kirkeudbright, Scotland, on July k 1747. His father was John Paul, a randener. At twelve he went to sen salling from Whitehaven. He had a brother in Fredericksburg, Va., and he ame to this country before he was birteen. He became a mate and master of vessels. In 1773, his brother having dled, he took charge of his esrates, and about this time changed his inme to Jones.

Before the colonies had declared their adependence the maritime aggressions his services. He was appointed a First Lieutenant December 22, 1775. He was the first man to hoist the flag which those then used

His commission as Captain, issued by order of Congress and signed by John Hancock, dated at Philadelphia, October 10, 1776, says: "To John Paul Jones, Esquire. We, reposing especial trust and confidence in your patriotism. valor, conduct and fidelity, do, by these presents, constitute and appoint you a be a Captain in the Navy of the United States of North America, fitted ut for the defense of American liberty nd for repelling hostile invasion."

He interested himself in giving opinons as to the organization of a Navy. Many of his plans were adopted. He ecommended the appointment of Commissioners of Dock Yards to superin tend the building and outfit of ships of war. Had it not been for his exertions It is probable that the Navy would have gradually disappeared.

The following resolutions of Congress show how directly Jones was associated with the adoption of the present fing:

In Congress, June 14, 1777. "Resolved, That the flag of the Thireen United States be thirteen stripes, alternate red and white; that the Union be thirteen stars, white in a blue field, representing a new constella-

"Resolved, That Captain J. Paul Jones be appointed to command the ship Ranger."

He was the first to hoist the Stars and Stripes. Arriving at Brest, in the Ranger, he delayed his salute to the French fieet until he was assured that would be returned, and he thus had ard was carried in the Dewey parade in Washington.

In a letter he says: "I have not drawn my sword in our glorious cause until the heart is so weak that one for hire, but in the support of the dignity of nature, and in obedience to the genuine divine feeling of philanthropy. I hoisted with my ow? hands the Flag of Freedom the first time dia and China, where it is quite comit was displayed on the Delaware; I mon,

IX years ago when the first | have attended it ever since with venefforts were made to dis- eration on the ocean. I claimed and cover the remains of John obtained its first salute from France Paul Jones in Paris, I before our independence was otherwise wrote and published in announced in that kingdom, and no

The English Ambassador obtained an rebel and a pirate." Writing of his remarkable escape, he says: "I had the pleasure of laughing at their expense as we passed the Downs, in spite produced more of them-John Paul of their ships of war, and along the

Jones is conspicuous for courage, abil- coast in full view of the Isle of Wight." In the midst of all this excitement Classed by the enemy as a "rebel" and he gave a remarkable evidence of the "pirate," and his very name used as a gallant side of his nature by writing some verses to a lady. This is the time when Washington was also called introductory explanation: "Verses written on board the Alliance, off Ushant, the first day of January, 1781, immediately after escaping out of the Texel from the blockade of the British fleet; being in answer to a piece written and sent to the Texel by a young lady at The Hague,"

"With him," says a writer, "woman was indeed not a toy to waste some fille hours on, but a superior existence for whom man was born an honored slave. Her wildest caprice was to him law, and her most improbable declaration absolute authority." A lady of the French Court-"Della"-offered all her diamonds and effects because she heard that Jones' crew were shut out of prize money. Her custom was to sit before her lover's portrait "for hours, bathed in tears." She wished to follow him to America, and was willing to be the lowest of his crew. In a letter to the Countess de Lavendahl he says: "I beseech you to accept the within lock. I am sorry that it is now eighteen inches shorter than it was three months ago. If I could send you my heart itself, or anything else that could afford you pleasure, it would be my happiness to do it."

He visited St. Mary's Isle, intending to capture the Earl of Selkirk, but Lord Selkirk was absent. Jones returned to his vessel, but an officer and some of the crew went to the horse and carried off the family plate of the house of Douglas. Subsequently Jones returned the plate. He was quite interested in the Countess of Selkirk, and in addressing her a letter of apology for the conduct of his men, he made this appeal: "As the feelings of your gentle bosom cannot but be congenial with mine, let me entreat you. madam, to use your persuasive art with your husband to stop this crue and destructive war, in which Britain

can never succeed." King Louis XVL gave Jones a sword and created him a Chevaller of the Order of Military Merit, and Congress voted him a gold medal. The chief no bility of France loaded him with invitations.

Congress thanked him in this form in February, 1781:

"Resolved, That the Congress enterinin a high sense of the distinguished bravery and military conduct of John Paul Jones, Captain of the Navy of the United States, and particularly in of Great Britain caused the American his victory over the British ship Ser-Congress to proceed to reprisals. It upis on the coast of England, which Congress to proceed to reprisals. It was attended with circumstances so was therefore resolved to have a small brilliant as to excite great appliance and approbation."

In 1781 Jones arrived in the United States. He was elected by Congress to command the America, the first ship of seventy-four guns built in this country. It was also proposed to create the grade of Rear-Admiral for him, but it was not done. He superintended the building of the ship. The French lost one of their ships, and Congress presented the new vessel to Louis XVL. and consequently Jones lost the command. In 1783 he returned to France, having been appointed by Congress agent of America for European prize money. He went to Denmark, and in 1788 entered the Russian naval service, with rank of Rear-Admiral, reserving the right to return to orders of Congress. He finally removed to Paris in very bad health, and died there of dropsy of the chest on July 18, 1792, The National Assembly went into mourning, and a deputation of memers attended his funeral.

He was short in stature and slenderly made. His manner was authoritative. and his will absolute. He had a soft voice and keen eyes. His weaknesses were allied to a kindly nature. Frankin and Jefferson testified their respect for him, and the latter styled him "the principal hope of our future efforts on the ocean."-The Antiquary, in Town Topics.

Dreams Which Cause Death.

In cases where dreams kill there is a sort of combined action between the dream and the disease through which death is accomplished. In the first place, the dream is usually the product of the disease. A person may have heart disease, which never asserts itself or allows the victim in any way the honor of the first salute which the to know of its presence until the fact American flag ever received from a is disclosed in a frightful dream, foreign man-of-war. The battle flag Moreover, terrifying dreams are often which flew on the Bon Homme Rich the first evidence of heart disease, Then the frequent recurrence of these dreams, dealing repeated shocks to the nervous system, aggravates the disease more shock is sufficient to cause death. -Chicago Tribune.

Dr. E. A. Mears announces his discovery of several new species of birds on the summit of Ape, a volcanic mountain of the Island of Mindinao, in the Philippine group.

By breeding and feeding his fowls in a special way, a Weisbaden chemist has been able to increase the natural quantity of iron in eggs that they are medicinal and useful for the cure of various diseases,

A specimen of the powerful electric bells now being made by a London firm for railway use has a gong of nineteen and one-half inches in diameter and weighing ninety pounds, and the complete bell weighs about 150 pounds.

An Italian engineer has invented a successful elevator for raising sunken vessels. It consists of compressed air chambers of canvas and wire, each equal to a lifting capacity of sixty tons, and it is possible to attach as many of these as may be necessary.

A physician, said to be eminent, has discovered that there are advantages even in baldness. Bald-headed men, he asserts, never suffer from consumption, and a tendency to scantiness of hair may be taken as a sign of immunity from the disease. In the census of 5000 tuberculosis patients he failed to find a single case of bald-

A company has been formed at Bern, Switzerland, for manufacturing a new kind of combustible from peat. The peat is dried under the influence of the electric current, and then further treated so that under the action of electric osmose a new compound, known as osmon, is formed. The most recent tests of the new combustible bring out the fact that it burns as well as coal and without giving any odor

Food Value of Bananas.

Professors of dietetics tell us that the banana is not as many fruits are. a flavor and nothing more, but a food and source of real nutriment. It is at once useful and delicious. It not only gratifies the palate, but supplies material for combustion and the maintenance of animal heat, while it also builds up the muscles and repairs the worn and threadbare nerves.

The flour made from it in its dried state is equal in nutritive value to rice, and how invigorating and sustaining rice is has been demonstrated in the recent achievements of the Japanose. Dried and sprinkled with sugar, a form in which it has been recently introduced in this country, the upstart banana is, weight for weight, as nutritious as the venerable fig.

But it is in the fresh state that the banana chiefly appeals to us. It's creamy succulence and delicate odor are inviting, and its pleasant sapor is a prelude to good digestion. Dependent as that sapor is in ethereal body, which the coal far investigators have not yet been able to imitate by chemical essence, it is a subtle stimulus to all subsequent elementary processes. And thus it is that the banana is an eminently digestible food. No sense of oppression or drowsiness follows a meal of it, and a meal of it may be bulky enough.-Pall Mall Gazette.

Don't Re a Slave of Koutine

Don't because you don't see the force of getting up in the middle of the night under a misconception that you are lenghtening your life by so doing, make an equally absolute rule of staying in bed till 11 o'clock because if you should have to catch the train at 10 o'clock you will take more out of youring. Don't have an idea that you can't sit with your back to the horses, or with your face to the engine. If you fon't happen to be hungry when you sit down to your lunch, don't force yourself to eat more than you feel inclined to do. If, at the same time, you feel inclined to have a second beining, have it by all means. Don't take a tepid bath as a sort of religion on a morning when you feel shivering and cold, or if you happen to have a pain between your shoulders; on the contrary, have it as hot as you can get into it, and you'll feel all the better for it .--John Strange Winter, in Black and White.

A movement is under way in Mississlppi to raise a monument to John M. Poag, Sheriff of Tate County, who was headquarters at Senatobia, which of their duties, this is the only instance where a sheriff voluntarily fought a mob to his death in the protection of a prisoner where to do so meant his certain death." "No man," says Giv. Yardaman, "ever died at a better time or for a better cause."-New York World.

A Brooklyn young man took his best girl to church, and as he reached a partially empty pew he turned to the usher and asked: "Do you suppose we could squeeze in

"You might be able to," replied the usher, politely, "but I would advise you to wait until you get home."-New

York Press.

HOUSEHOLD AFFAIRS

THE KITCHEN SINK.

Placing the sink in front of a window helps to make the routine work of washing pans and kettles less like drudgery, says a household magazine. To secure an architectural effect for the exterior of a house this pleasure of an outlook is often thoughtlessly taken away from the kitchen. The secret of making kitchen work enjoyable is to keep recurring duties at a minimum, relieving them by every possible labor-saving device.

METAL BEDS AND THEIR CARE.

If metal beds are chosen with an eye to their keeping bright, and then given just a little care, there's no necessity for their turning dull and tarnishing.

Experts say that brass oughtn't to tarnish if it's properly treated in the first place and the brass trimmings to white beds are the first places usually that show wear.

Be careful, in getting your bed, to see if the trimmings (or the bed itself. if it's all brass) are carefully finished If you don't know the signs yourself, ask some one who knows; it may cost a little more than you thought, but it will be less in the long run.

Enameling can be done (redone, that is.) at home with very little trouble, And enamel paint costs so little that there's no excuse for letting a white iron bed get shabby, even though frequent handlings may have scarred the enamel here and there.

Once, in every few weeks, too, an enameled bed should be gone over with a soapy rag-it is surprising how much dirt will come off and how fresh the enamel will look after its cleaning .-Washington Times.

CARING FOR PAINT BRUSHES.

Every housewife has, or should have, one or more good paint brushes and some cans of ready mixed paints. Nothing brightens up woodwork of any description more than a coating of good paint, and nothing saves the scrubbing brush more. When done with using the brushes, it will pay her to take care of them, for their uses are simply legion. Don't let "John" borrow them; he should have his own (which you should cheerfully borrow when you want them). When done with the brush, suspend it in water, with the brush part not quite touching the bottom of the vessel in which it is suspended, being careful that the water just covers the bristles. not reaching the binding, which should never be wet. Cared for in this way, a brush will last a long time. Some painters insist that a varnish brush should never be put in water, while others claim that it does not matter; but all agree that linseed oil is a good preservative, the brush being suspended so that only the bair is covered. It is a good plan not only to have these paints and brushes, but to use them and until tried, one bas no idea what a "saving power" for the overworked housewife is to be found in them .-The Commoner.

Tomato and Cucumber Salad-Six fresh, ripe tomatees, two encumbers, one onion, three hard-boiled eggs; slic all thin and place in layers in a salad bowl; add a dash of cayenne, if liked and salt and vinegar to taste.

Tomato Paste-One peck of ripe to matoes, four onions, twelve sprigs of self than by a week of ordinary liv- parsley, two bay leaves, two good-sized carrots, peeled and sliced, one table spoonful each of salt, sugar, ground cloves, mace, black pepper, and whole celery seed (tie the last up in a bit of thin muslin), one scant teaspoonful of cayenne. Boil the tematoes, onlong and carrots together until soft enough to press through a colander, then add the seasoning; boil again for about five hours, or until a little of the pulp will jelly when placed on a saucer. Remove the bag of celery seed. Spread on shallow pie plates and let the paste dry thoroughly in the sun or in an open oven. It can be packed in layers in wooden boxes, with waxed paper be tween the layers, and is useful for seasoning macaroni, soups, stews, etc.

Cranberry Pie-To make a cranberry pie extra good soak out the seeds. Cur one cup of cranberries across once and drop them into cold water to stand for murdered in the county fall on April a little while, then skim out and leave 12 by a mob from which he was de- the seeds, add one-half cup of raisins fending a prisoner. The project is seeded and cut small. Mix three level under the direction of the John M. tablespoons of flour in a little water to Poag Monument Association, with make smooth and pour on one cup of boiling water, cook until clear, then point out that "while other sheriffs add the cranberries, raisins and one have lost their lives in the discharge cup of sugar. Line a plate with good paste, pour in the filling, cover and bake. Serve when nearly cold.

> Stuffed Cucumbers-Pave the cucumbers; cut in halves crosswise; remove the seeds and let stand in cold water half an hour; make a forcement, using one-half cupful of fine stale bread crambs and one-half cupful of milk: cook the bread and milk to a paste; add two tablespoonfuls of butter, the white of one egg, two-thirds of a cup ful of raw veal chopped fine, and salt and cayenne eepper to season; fill the cucumber halves with the forcement; place them upright on a trivet in a saucepan; half cover with white stock and cook slowly for forty minutes; place on slices of dry toast and pour around rich cream sauce; serve as an entree or vegetable.

Tumors Conquered Without Operations

Unqualified Success of Lydia E. Pinkham's Vegetable Compound in Cases of Mrs. Fox and Miss Adams.

E. Pinkham's Vegetable Compound is the conquering of woman's dread

enemy, Tumor. So-called "wandering pains" may come from its early stages, or the pres-ence of danger may be made manifest by excessive menstruation accompanied by unusual pain extending from the

ovaries down the groin and thighs.

If you have mysterious pains, if there are indications of inflammation ulceration or displacement, don't wait for time to confirm your fears and go through the horrors of a hospital opera-tion; secure Lydia E. Pinkham's Vegetable Compound right away and begin its use and write Mrs. Pinkham of Lynn, Mass., for advice.

Read these strong letters from grate-

ful women who have been cured:

Dear Mrs. Pinkham:— (First Letter.)
"In looking over your book I see that your medicine cures Tumor of the Uterus. I have been to a doctor and he tells me I have a tumor. I will be more than grateful if you can help me, as I do so dread an operation."—Fannie D. Fox, 7 Chestnut-St., Bradford, Pa. Dear Mrs. Pinkham:— (Second Letter.)
"I take the liberty to congratulate you on the success I have had with your wonderful

medicine.
"Eighteen months ago my monthlies stopped. Shortly after I felt so badlyl submitted to a thorough examination by a physician, and was told that I had a tumor on the uterus and would have to undergo an exercise.

I soon after read one of your advertisements and decided to give Lydia E. Pinkham's Vegetable Compound a trial. After taking five bottles as directed, the tumor is entirely gone. I have again been examined for advice.

One of the greatest triumphs of Lydia

Another Case of Tumor Cured by Lydia E. Pinkham's Vegeta-ble Compound.

Dear Mrs. Pinkham:-

Dear Mrs. Pinkham:—

"About three years ago I had intense pain in my stomach, with cramps and raging headaches. The doctor prescribed for me, but finding that I did not get any better he examined me and, to my surprise, deciared I had a tumor in the uterus.

"I felt sure that it meant my death warrant, and was very disheartened. I spent hundreds of dollars in doctoring, but the tumor kept growing, till the doctor said that nothing but an operation would save me. Fortunately I corresponded with my aunt in the New Engand States, who advised me to try Lydia E. Pinkham's Vegetable Compound before submitting to an operation, and I at once started taking a regular treatment, finding to my great relief that my general health began to improve, and after three months I noticed that the tumor had reduced in size. I kept on taking the Compound, and in ten months it had entirely disappeared without an operation, and using no medicine but Lydia E. Pinkham's Vegetable Compound, and word fall to express how grateful I am for the good it has done me."—Miss Luella Adams, Colonnade Hotel, Seattle, Wash.

Such unquestionable testimony

Such unquestionable testimony proves the value of Lydia E. Pinkham's Vegetable Compound, and should give confidence and hope to every sick woman.
