# THE CHANGE OF LIFE INTELLIGENTWOMEN PREPARE

Dangers and Pain of This Critical Period led by the Use of Lydia B. Pinkham's Vegetable Compound.

change of

reason ? If her system is in a deranged condition, or she is predisposed to apoplexy or congestion of any organ, it is at this time likely to become active and, with a host of nervous irritations, make life s burden.

At this time, also, cancers and tumors are more liable to begin their destructive work. Such warning symptoms as a sense of suffocation, hot flashes, dizriness, headache, dread of impending evil, sounds in the ears, timidity, pal-pitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and inquietude are promptly heeded by intelli-gent women who are approaching the period of life when woman's great change may be expected. Lydia E. Pinkham's Vagetable Com-

goand is the world's greatest remedy for women at this trying period, and ramy be relied upon to overcome all distressing symptoms and carry them safely through to a healthy and happy

old age. · Lydia E. Pinkham's Vegetable Compound invigorates and strengthens the female organism, and builds up the weakened nervous system as no other

medicine can. Mrs A. E. G. Hyland, of Chestertown, Md., in a letter to Mrs. Pinkham, says :

"I had been suffering with failing of the womb for years and was passing through the change of life. My womb was badly swollen. I had a good deal of soreness, dizzy spells, headaches, and was very nervous. I wrote you for advice and commenced treatment with Lydia E. Pinkham's Vegetable Com-pound as you directed, and I am happy to say that all those distressing symptoms left me, and I have passed safely through the change of life a well woman."

For special advice regarding this important period women are invited to write to Mrs. Pinkham for advice. It is free and always helpful.

#### The Time for Repentance.

Here Is the way a Benton county man confessed at a revival: He had been pressed to repent, and finally got up and said: "Dear friends, I feel the spirit moving in me to talk and tell what a bad man I have been, but I can't do it while the grand jury is in session." "The Lord will forgive," shouted the preacher. "I guess that's right," paid the penitent, "but he right." ain't on the grand jury."

Sure Profit in Sheep. Hogs are probably the best paying inimals to grow on the average farms, examination the bran was found to but in some respects sheep are preferable. This is especially true on upland contain rice hulls. These hulls, produced abundantly as a waste from the farms that are too much worn or derice milling industry, differ materially pleted of humus to produce staple from the hulls of barley, wheat, rye crops in paying quantities. Such fields and oats because the fact that they if fenced for sheep and converted into ontain sharp particles of silica. These a pasture for them, will yield a greater

net return than if cultivated, and at the same time become more fertile, for it is a true saying that the foot of the sheep fertilizes the land. While improving the soil, they also improve the herbage of the pasture by exterminat ing the weeds.

It is claimed for sheep that they make larger relative gains for food consumed than any other kind of livestock. Another claim set up for them is that the annual clip of wool will pay for the expense of keep. Perhaps this is a little overdrawn, except under very auspicious circumstances, which can only he brought about by more

judicious management than usually obtains on farms where mixed husbandry is the practice They require less attention during sinter in the manner of housing and feeding, but they should be looked after pretty closely at lambing times, as some mothers ignore their young at first, and require to be penned with their lambs for a few days in order to

get them to recognize the obligations of motherhood The objection to allowing sheep and neat cattle to run in the same pasture an only apply to restricted areas, where the stock is unduly crowded. One of the most decided advantages in raising sheep is that it requires less manual labor, the most expensive feature of farming, than cultivated crops,

but this is applicable to livestock genprevent crooked breasts. These are erally, but to sheep in a more eminent ften caused by birds roosting on nariegree row perches. When the perch is in An important, if not the most imposition pour a little kerosene into the portant, essential for profitable sheep tips at each end, and you will have inhusbandry is the proper selection of sect proof perches .- H. # To make Cheap Gas-light for **Country Homes**

# "AKE a common Clay Pipe. Put a simple "Acetylene" Gasburner on its

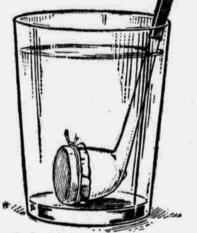

stem. Bind the two in position with a tight-fitting piece of Rubber Hose. Then fill the bowl of the pipe with fine-ground Cal-

cium Carbide. Next tie a rag over head of the bowl to keep in the Carbide.

Now put the pipe into a Glass of Water, as in picture. There you have a complete Gas-

plant for 25 cents. Touch a match to the Burnerand you'll get a beautiful White Gas- 7, light.

Of course, this is only an experi-ment, but it shows the wonderful sim-plicity of Acetylene Lighting. That very simplicity gave Acetylene

Light a setback, at first.

It seemed so simple to turn Calcium Carbide into Gas-light that over 600 different kinds of "tanks" and "Acetylene Machines" were invented, patented, and marketed for the purpose, by about as many different

people. Well, the thing to be expected certainly happened! About 530 of these "Acetylene Machines" had been invented and sold by people who knew more about *Timware* than they did about *Gas-making*. The "Calcium Carbide" was all right all the time, but 530 of the machines for turning it into Gas were

all wrong all the time. So Acetylene Gas "got a bad name," though it is clear enough now that it never deserved it at any time. It was like selling Wood Stoves to burn Hard Coal in, and then blaming the Coal for not burning.

Lots of things happened to grieve the Owners of these 530 makes of alleged "Acctylene Machines." But very few accidents occurred from them even in

the days of rank experiment and dense ignorance, among, "Generator" Makers.

Of course, a gun will go off unexpectedly, now and then, if the trigger be pulled by a person who "didn't know it was loaded." ut, that's no fault of the Ammunition-is it?

Well, finally the Insurance Companies got after these 530 odd makes of "Acetylene Machines" that wouldn't Acetylate, and the Insurance Board made an investigation of all Generators that were submitted to

them. Then, out of the 600 odd "Machines" patented, only about 70 were "permitted" by the Insurance Board to be used

Oh, what a howl was there! By "permitted" I mean that the Insurance Board was willing that any building should be Insured, with-

#### Moon and the Weather.

Speaking of the superstition that the changes of the moon influence the weather, Professor Pickering points out that since the moon changes every seven and half days, every change in the weather must come within four days of a change in the moon, and that changes will necessarily come within two days of a lunar change

Mrs. Winslow's Soothing Nyrup for Children teething, softens thegums, reduces inflamma-

out extra charge, which used any one of these 70 Acetylene Generators it had found safe, and effective, just as it permitted houses to be piped for City Gas,

just as it permitted houses to be piped for City Gas, or wired for Electricity, under proper conditions. Now, the Insurance Companies ought to know whether or not these 70 different makes of Acetylene Generators were absolutely Safe to use. Because, they have to pay the bills, if Fire or Ex-plosion occurs, from any one of the Acetylene Gener-ators they authorize.

And, here's a proof of their good judgment. Though there are now Two Million people using 'Acetylene Light in America, there have only been four Fires from it in one year, against 8865 Fires from

Kerosene and Gasoline There have also been 4691 Fires from Electricity,

1707 Fires from City Gas, and 520 Fires from Candles. Besides these there have been 26 Fires from the

Sun's rays, But,—only four Fires from Acetylene. That shows how careful the Insurance Board was in its examination of Acetylene Generators, and in "permitting" only the 70 makes that were above sus-ficion, out of the 600 experiments that were once on the market. . .

Well,-the boom in Acetylene Lighting made lower prices possible on the material it is derived from, viz., Calcium Carbide, a material that looks like Granite

but acts like Magic. Today, Acetylene Light is a full third cheaper than Kerosene Light, or Gasoline Light, per Candle Power. It is not more than half the price of Electric Light, nor three-fourths that of City Gas.

If I can't prove these statements to your full satis-faction my name is not "Acetylene Jones." But Acetylene is more than the safest and cheapest

But Acetylene is more than the safest and cheapest Light of the year 1905. It is also the Whitest Light—the nearest to natural Sunlight in health-giving Blue and Violet rays, and because of this, with its freedom from flicker, it is the easiest of all Artificial Light on the Eyes. It is so much like real Sunlight that it has made plants grow 24 hours per day in dark cellars where no ray of Sunlight could reach them. It made them grow twice as fast as similar plants that had only the Sun-light of dav-time, viz, half the time.

light of day-time, viz., half the time. That was proven by Cornell University in a three-months' experiment made this very year.

Now, I've saved up for the last a point more im-portant to you than all the others about Acetylene Light.

Light. It consumes only one-fourth as much of the vital Orygen from the Air of Living rooms or bed-rooms, as either Kerosene or City Gas-Light consumes. That's a tremendous difference in a lifetime, mark you-three-fourths of a difference. Because,-Oxygen is Life. And every bit of Oxygen stolen from the lungs of Women, Children and Men, through Lighting, is a loss that can never be made good again. A 24 Candle-Power Acetylene Light costs you only two-fifths of a cent per hour.

A 24 Candle-Power Acetylene Light costs you only two-fifths of a cent per hour. That's about \$5.85 per year, if burned every night in the year for four steady hours. A Kerosene Lamp of equal capacity would cost you a third more, viz.: three-fifths of a cent per hour for Kerosene alone, or \$8.75 per year. That's exclusive of broken lamp chimneys, new wicks, and the everlasting drudgery and danger of cleaning, filling and trimming daily. I want to prove these figures to you, Reader, if you are a house-owner or storekeeper.

are a house-owner or storekeeper.

#### Vanishing Languages.

President Wheeler and Professor Putnam of the University of California, in describing the recent ethnological and archeological work of that institution, say that nowhere in America has there been such a diversity of Indian languages as in California. But these languages are now rapidly disap-pearing. Several of them at the present moment are known by only five or six, and others by only 20 to 30 living persons, and hardly a year passes without some dialect, or even language, ceasing to exist through the death of the last individual able to speak it. It is regarded as important to record all these languages at the earliest possible moment for the sake of the light they throw on the ancient history of the Pacific coast .-- Youth's Companion.

There are in Paris something like 1.000 co-operative cabs plying, supplied by 16 to 18 co-operative cab yards, which are now in a flourishing condition, some of them very large and substantial undertakings.
