The High School Bulletin

EDITOR IN-CHIEF, LEONARD HARRIS.

Professor Scott has found it necessary to give up his sophomore class. We are very sorry indeed to lose him and hope that the schedule may be so arranged as to permit his being with us again.

Teacher—What is stalactite and stalagmite?
Minetta—Frozen peat.

The juniors delight more in reading newspapers and magazines than Caesar or classics. If they prefer "light reading" why not learn to read gas meters?

Mrs. H. C. Leavenworth, formerly teacher of room 13, was a welcome visitor at the schools Wednesday last. She spoke highly of the present condition of our schools.

The total enrollment of our schools is now about 735, an increase of 115 over any previous year. There is an unusually large high school, numbering 70. The senior class contains 13 members, 8 boys and 5 girls.

The high school basket ball team recently organized opened the season by a game with the Brookville team on the floor of the latter last Friday evening. The contest was an exceedingly fast and exciting one. From the moment the referee's whistle was blown and the ball tossed up between the opposing centers, the play was of a whirlwind variety and elicited frequent applause and cheers from the large crowd of spectators present. In passing and in cleverness in securing the ball the home boys were fully the equal of their opponents, but the superior goal throwing of Prof. Downs put the majority of the tallies on the wrong side of the score board for Reynoldsville. The game ended 27 to 15 in favor of Brookville. The score during the second half was 8 to 6, which shows how closely the two teams were matched. The Brookville boys are veterans in the sport, while our team had never before played a game. This bespeaks much for our high school athletes. Preliminary to the scheduled contest a very interesting game between girl teams from the Brookville schools was played. Basket ball is entirely new to our boys but they proved themselves material for a winning team. Return game will be played the latter part of next week.

The students are greatly appreciating the chapel services being conducted Wednesday mornings by the pastors of the different churches of our city.

The pupils taken from the overcrowded rooms to the new room, No. 1, were not "demoted" but will pursue there the same work as in their former rooms.

On Wednesday evening of last week the first number of the lecture course appeared. The attraction was highly pleasing to all. The large attendance was especially gratifying to the high school in that the proceeds of the course are to go towards fitting up and equipping a chemistry and physics laboratory, something our schools are much in need of and which will be of great aid in the study of science.

The farmers all think the telephone a benefit but one of our Beechwoods neighbors.

A. E. Thompson, of Clearfield, called on friends and relatives in this place and Glendale last Sunday.

Some of the men are wondering if the women clean house all the year or if it is only 12 months of the year.

The stockholders of the telephone are getting their poles up and expect to have their phones in service before they are all snowed in.

If the man that furnishes the President's Thanksgiving turkey had no better luck raising turkeys this year than some of our neighbors, his feast will be slim.

Lecture that is Worth Hearing.
One of the best lectures ever given in Chicago was heard last night at the Art Institute. The slides used in illustration were done in color and represented the highest skill in the art of slide painting. Now and then a sparkling moving picture added a dash of realistic life to the delightful story, and a quiet humor drifted through the entire lecture, which was so brimful of interesting fact. Dr. McDowell has an easy, direct style of delivery, speaking naturally and at times with fine oratorical effect, thought always with the polish that comes of culture and long experience.—Chicago Record-Herald.
