

Retort Peninsular Smoke Consuming Hot Blast Slack Burner.

Most advanced and up-to-date slack burner constructed on the market. Has practical points found exclusively on the Peninsular. Combined cleanliness with

> economy of fuel. Any fuel. Every joint fitted absolutely air tight. Guaranteed by Company's bond.

MICA ILLUMINATING DOOR fitted air tight gives a cheerful and comfortable look to stove. Does away with the one objection to stoves of this class.

DOUBLE FIRE POT is corrugated and allows for expansion and contraction, insuring durability, and being exposed gives an immense heat.

DEFLECTING RING and "Never-Break" steel foot rail force the intense heat generated by fire pot down and around floor, making stove a great floor warmer. ASH PIT is large and absolutely air tight. Has air tight side shaker door and air tight ash

PERFECT COMBUSTION and greatest heat are had by mixing the proper quantity of heated oxygen, air, with the unconsumed carbon in a quick radiating construction.

PENINSULAR SMOKE CONSUMERS have steel bodies which radiate heat quickly and are equipped with "hot blasts" which supply a proper quantity of heated oxygen which mixes with gasses, producing the most intense heat from the least fuel. As the sketch shows, the smoke is turned almost white, keeping the soot off the roof and chimney clean. HOT BLAST TUBE WITH DAMPER operated from the right hand side without regard to position of reflector top : supplies combustion chamber with proper quantity of heated

air, effecting perfect combustion and extracting every unit of heat from the fuel. IMPORTANT-Notice "Never Break" steel top ring; "Never Break" steel foot rail; Nickel reflector top, nickel ash guard and handsome nickel urn.

YOU RUN NO RISK in buying a Peninsular. Our word is backed by the Company's bond. COME IN and see these Fuel Savers and Fire Keepers.
