THE LEADING FURNITURE AND CARPET STORE

## Saves All Wasted With Other Stoves For Hard Coal, Soft Coal or Lignite

The waste of gas in burning hard coal is shown by opening the magazine cover of an ordinary base burner, when the oxygen supplied fills the entire stove with flaming gas. Cole's Hot Blast stove burns this gas in hard coal which, in ordinary stoves, escapes, on account of their leaky construction, causing great waste and endangering health and life when it escapes into the rooms.

In the ordinary magazine hard coal stove, three-fourths of the coal is partially consumed in the magazine, where it gives off no heat, as it is not in contact with the radiating surface. The one-fourth of the coal in the fire pot must be kept at a white heat combustion to throw the heat into the rooms, thus causing great waste.

# Cole's Original Hot Blast

The combustion chamber and the magazine are combined in this stove and the combustion is perfect. The stove is filled to the top of the inside cast iron lining. This large body of hard coal is burned under perfect control by means of the absolutely air-tight construction of the stove giving perfect control over the drafts. The coal is kept at a slow, economical cherry red combustion and as the heat is in direct contact with every square inch of the sensitive steel radiating surface, all the heat is radiated into the room where it is wanted and not blanketed in and sent up the chimney. Hard coal at Cherry Red Combustion burns 48 hours, while at white heat it is consumed in from 2 to 5 hours.

### Sold Under a Positive Guarantee

We Guarantee Cole's Original Hot Blast to use less hard coal for heating a given space than any base burner with the same heating surface.

Requires attention only morning and night with hard coal. Warm rooms day and night. No escaping gases to endanger life. The heat wasted up the chimney with other stoves is saved.

### Burns Any Fuel—Saves Half

Cole's Hot Blast is not only a perfect hard coal stove, but is generally recognized as the most economical and cleanest soft coal stove made. Soft coal is half gas and a \$3.00 ton of soft coal or a \$2.00 ton of slack is made to do the work of \$9.00 worth of hard coal, as the gas half is utilized as a heat producer. It burns soft coal, hard coal or wood without any change of fixtures.

### Scientific Construction

Cole's Original Hot Blast has an absolutely air-tight and gas tight construction throughout, by reason of its numerous patented improvements. The patented Hot Blast draft saves the gas. A patented steel collar connects the elbow draft to the stove body and cannot be made to leak air by action of the fiercest heat. The patented compound hinge on the ash door cannot warp and the door closes air-tight by its own weight. The heavy fire box protects the joints, where other stoves burn out first. The guaranteed smoke-proof feed door prevents smoke, soot or dust from escaping into the room when fuel is put into the stove. Perfect cleanliness, therefore, from soft coal.

CAUTION. Like all original improvements, Cole's Original Hot Blast has many imitations. They are failures, because they do not have the above patented features. The words "Cole's Hot Blast from Chicago" will be found on the feed door of every Cole's Hot Blast. None genuine without it.

## DRUNKENNESS AND CRIME.

### The Defense of Murderers Intoxicated When Deed is Committed.

Drunkenness as a defense for murder can be reduced to the plain statement that a drunken man bent on commission of crime is as dangerous to the individual against whom his efforts are directed as is the man who is sober.

The argument that murder or any other breach of the law should be condoned because the accused admits he had been drinking to excess for a considerable time before the crime was committed may appear reasonable, but is it? Manifestly the man was in possession of his faculties before he began drinking, and if he continued the debauch until such time as he believed he had some right to take the life of another there can be little excuse for his act.

But it is not so much in the decision of one case that the danger lies. If the courts are to take as argument for acquittal the word of a man charged with felony that he is irresponsible because it was committed while he was drunk, the possibilities are dangerous. What is to prevent every deliberate murderer from hiding behind this defense, as so many of them have hidden behind the ruling of a court that there is emotional insanity? Is it not possible, if one man is acquitted of crime, or his sentence is made nothing more than a few years' confinement, because the crime was an act done while he was under the influence of liquor, that it will serve to increase the number of felonies of that character?—Pittsburg Dispatch.

## ERYSIPELAS.

### Treatment That is Said to be Speedy and Effective.

A medical authority says: I would like to state that I consider that one may get absolute control over erysipelas generally within three days by a very simple treatment. Of 100 cases of ordinary facial erysipelas treated I should not expect more than three that would not yield within three days, very likely within forty-eight hours, with the simplest antiseptic treatment.

My custom is always to treat cases of that sort by the application during alternate hours of the day and evening of a mild solution of carbolic acid in alcohol and water as an evaporating lotion. It is only in very exceptional cases that the disease is not almost completely under control and has disappeared within forty-eight hours, but after three days it would be extraordinary if by this means every vestige of the disease has not disappeared.

This has been my treatment in erysipelas for many years. I have never known it to fail. I have never given a drop of medicine internally. I feel that I have absolute control over the disease. I am speaking now of ordinary erysipelas, not the deep seated phlegmonous erysipelas, of course. The strength of the solution used is as follows: Crystal carbolic acid, one-half dram; alcohol, four ounces; water, four ounces.—Health.

## A Resourceful Reptile.

An example of rare animal intelligence was related by the French explorer G. Mingaud. This noted scientist had caught a water adder, which he placed in a wire cage. The snake began at once to try to effect an escape between the wire bars, but got no farther than her head and neck, which protruded through the interstices. At last the reptile, weary of its futile efforts, lay down on the bottom of the cage, and Mingaud observed it go into apparently useless convulsions. But the snake knew what it wanted. Not more than a minute had passed before it gave up its breakfast of the morning in the form of a lizard about four inches long. A moment later the adder was again at the bars of the cage and this time had no difficulty in crawling through.

## Poison in Java.

The natives in Java have a natural poison to aid them in avenging themselves against their enemies. It is a strong fluid found in the bark of the aro tree. The bark is over an inch thick and is very spongy. A drop of the fluid on the skin causes intense irritation. A private revenge is satisfied by hiding a cup of this fluid in the room of the enemy, and then the avenger flees, for well he knows that by morning his victim will have crossed the high divide. The fluid produces stupor, which finally ends in death.

## An Indian Hat Maker.

A hat maker in India has an apparatus consisting of a rocket capable of rising to the height of a mile, containing a reservoir of ether. In its descent it opens a parachute, which causes it to come down slowly. The ether is thrown out in fine spray, and its absorption of heat is said to lower the temperature about it sufficiently to condense the vapor and produce a limited shower.

## Her Discovery.

"My grandfather was a regular bibliomaniac," observed Blowhard. "Oh, that's it, is it?" said Miss Cutting. "I knew some one of your ancestors was crazy, but I didn't know what form it had taken."—Detroit Free Press.

## Just Sued Her.

"How did you enjoy Mrs. X's reception, my dear?" "Oh, splendid! I never saw such a failure."—Boston Transcript.

## Tenacious.

"Did the minister die resigned?" "Not him. He died, but blamed if we could get him to resign."—Cleveland Leader.

## A BIT OF WHITMAN.

### His Debt to Scott and an Estimate of Cooper.

How much I am indebted to Scott no one can tell—I couldn't tell it myself—but it has permeated me through and through. If you could reduce the "Leaves" to their elements, you would see Scott unmistakably active at the roots. I remember the "Tales of My Landlord," "Ivanhoe," "The Fortunes of Nigel"—yes, and "Kenilworth"—its great pageantry; then there's "The Heart of Midlothian," which I have read a dozen times and more.

I might say just about the same thing about Cooper too. He has written books which will survive into the farthest future. Try to think of literature, of the world, of boys, today, without "Natty Bumppo," "The Spy," "The Red Rover"—oh, "The Red Rover"! It used to stir me up, charitably. I read it many times. Is all this old fashioned? I am not sworn to the old things, not at all—that is, not to old things at the expense of new, but some of the oldest things are the newest. I should not refuse to see and welcome any one who came to violate the precedents—on the contrary, I am looking about for just such men, but a lot of the fresh things are not new; they are only repetitions, after all. They do not seem to take life forward, but to take it back.

I look for the things that take life forward—the new things, the old things that take life forward. Scott, Cooper, such men, always, perpetually, as a matter of course, always take life forward. From Horace Traubel's "With Walt Whitman in Camden" in Century.

## AN ANNUAL HONEYMOON.

### The Kind of Vacation a Man and His Wife Should Take.

The man came back from his vacation with shining eyes and a tendency to laugh at the least provocation. He said he had had a good time. He said he and his wife had just been looking about from place to place. He said he hadn't bothered to think about his work and his wife hadn't bothered to think about housekeeping.

The man has been married a good many years. His eyes haven't shone like that for a long time. He didn't laugh so much before he went away. He seemed to be better acquainted with his wife than was noticeable before. The changes are he has been discovering her all over again in these weeks of leisure from hard work. And it's done him good.

That is one of the reasons of a vacation, and that is why a man and his wife should go away together. In the busy busy of the everyday routine we sometimes lose sight of the finest things in life. We work in order that we may have the companionship of those we love best, and then we lose ourselves in the work itself, and so miss the very joys our labor was intended to purchase.

It is a good thing to run away from the work once in a while and remember what we are working for anyway.

That is what the man had been doing, and that is why he got the good out of his vacation. —Philadelphia Bulletin.

## Most Tedious Reading.

The proofreader took off his glasses, wiped his tired eyes and put his hat on. "I'll go out and take a walk," he said. "I have been working two hours on these time tables, and that is all my nerves will stand. No work is harder, more tedious or more wearing than this time table proofreading. So much, you see, depends upon accuracy. If in the proofreading of a book an error or two are made, a laugh or a frown is the only consequence, but an error in a time table may mean a disaster. Sometimes we go over a time table seventy and eighty times before we finally O. K. it. We get to know the time table by heart. We can rattle off the trains—2:27, 3:14, 3:26 and so on—like phonographs. How wearing the work is! In a busy season I have lost four pounds in a week!"

## Recent and Extinct Animals.

"It is a great mistake to conclude that it is a law of nature that recent animals are all small and insignificant as compared with their representatives in the past," says a scientist. "That is simply not true. Recent horses are bigger than extinct ones and much bigger than the three toed and four toed ancestors of horses. Recent elephants are as big as any that have existed and much bigger than their early elephantine ancestors. There never has been any creature of any kind—mammal, reptile, bird or fish—in any geological period we know of so big as some of the existing whales."

Bobbs—Wigwag is always going to law about something. Slobs—That's right. He's even going to marry a girl named Sue.

Nothing serves better to illustrate a man's character than the things which he finds ridiculous.—Goethe.

## STRANGE ADVICE!

Dr. G. G. Green gives alert personal attention to his great humanitarian contract.

In our Almanac for many years past we have given unusual advice to those afflicted with coughs, colds, throat or lung troubles or consumption. We have told them if they did not receive any special benefit after the use of one 75-cent size bottle of German Syrup, to consult their doctor. We did not ask them or urge them to use a large number of bottles, as is the case in the advertising of many other remedies. Our confidence in German Syrup makes it possible for us to give such advice. We know by the experience of over 35 years that one 75-cent bottle of German Syrup will speedily relieve or cure the worst coughs, colds, bronchitis or lung troubles—and that, even in bad cases of consumption, one large bottle of German Syrup will work wonders. New trial bottles, 25c; regular size, 75c. At all druggists.

For sale by Boyle-Woodward Drug Co.

## The Cure that Cures

### Coughs, Colds, Grippe, Whooping Cough, Asthma, Bronchitis and Inipient Consumption is

# OTTO'S CURE

Cures throat and lung diseases. Sold by all druggists. 25c/50c.

For sale by Boyle-Woodward Drug Co.

## Paying a Debt of Gratitude

Note what Mr. Mott Allen, of Union City, says: Was badly afflicted with rheumatism for more than eight months and at times had to get up at 11 o'clock and stay up the balance of the night. Could not dress myself without aid from my wife. I am now entirely cured, and by the use of only one bottle of Crocker's Rheumatic Remedy. For sale by Stoke & Feicht Drug Co.

## Leech Bros.'

PLANING MILL, WEST REYNOLDSVILLE, YOU WILL FIND WINDOW SASH, DOORS, FRAMES, FLOORING, STAIR WORK, ROUGH AND DRESSED LUMBER, ETC., ETC. Give us your order. Our prices are reasonable. LEECH BROS., PROPRIETORS.

## Why GANDEE RUBBERS Are the Best.

The Gande Rubber Co., founded in 1842, is the oldest company making rubber boots and shoes in the world. That's RELIABILITY. Its workmen have been making rubbers all their lives. That's EXPERIENCE. It makes 5,000,000 pairs of rubber boots and shoes a year. Big production means ECONOMY. SO WHY BUY OTHERS WHEN YOU CAN GET GANDEES? For sale by all Leading Stores. Merchants desiring their names to appear at the bottom of this card can have it under established rules free of charge on application to H. CHILDS & COMPANY, Wholesale Distributors, 315 Post Ave., PITTSBURGH.
