Turns The Tide.

The influence of newspaper advertisng is wenderful. It makes small stores great. It turns the tide of business toward the advertised store as nothing else will. It places the name of the store so strongly in the minds of the people that they cannot think of dry goods, clothing, shoes or drugs without the name of that advertised store coming into their minds simultaneously. By a good persistent advertising campaign any business house can push its way to the front. The very best medium to use in your community is your local newspapers, as it goes to the people when their minds are easily impressed.-The Ad-writer.

Dogs Without Muzzles.

On account of the mad dog scare in Reynoldsville two weeks ago, when six children were bitten by a dog that had hydrophobia and all the children are now in the Magee Pathological Institute at Pittsburg receiving the Pasteur reatment for rables, a notice was pubished by president of town council and burgess of this borough requesting all owners of dogs within the borough to shut up their dogs for sixty days or muzzle them, but the notification has been ignored by a number of people, as a number of dogs are still running the streets without muzzles. Owners of dogs should be willing to muzzle their dogs for sixty days, considering the great danger people are exposed to, especially children. when a mad dog runs our streets. If they will not muzzle their dogs without being forced to do so, then the law should be enforced. Ordinance No. 83, which is almost entirely ignored-there are a few exceptions-should be strictly enforced.

It is remarkable the number of dogs there are in town and how few the assessor can find owners for when he makes the assessment.
