

DON'T DESPAIR.
Read the Experience of a Minnesota Woman and Take Heart.
If your back aches, and you feel sick, languid, weak and miserable day after day—don't worry. Doan's Kidney Pills have cured thousands of women in the same condition. Mrs. A. Helman of Stillwater, Minn., says: "But for Doan's Kidney Pills I would not be living now. They cured me in 1899 and I've been well since. I used to have such pain in my back that once I fainted. The kidney secretions were much disordered, and I was so far gone that I was thought to be at death's door. Since Doan's Kidney Pills cured me I feel as if I had been pulled back from the tomb."
Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Ether and Matter.
The densest matter is more or less porous. Gold will absorb mercury as a lump of sugar will absorb water, showing there must be interstices or interatomic spaces in it, but the ether shows no such property. If a drop of water could be magnified sufficiently one would ultimately see the different atoms of hydrogen and oxygen that constitute the molecules of water. If a small volume of ether could be magnified the indications are that the ultimate part would look like the first, which is the same as saying that it is not made up of discrete particles, but fills space completely. This is expressed by saying that the ether is a continuous medium and is hence incomparable with matter.

STATE OF OHIO, CITY OF TOLEDO, Lucas County, ss.
FRANK J. CHENEY makes oath that he is senior partner of the firm of F. J. CHENEY & CO., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of CATARRH that cannot be cured by the use of HALL'S CATARRH CURE. FRANK J. CHENEY, President, A. W. GLEASON, Secretary, A. D. 1906. A. W. GLEASON, Attorney Public, acts directly on the blood and mucous surfaces of the system. Send for testimonials, free. F. J. CHENEY & CO., Toledo, O. Sold by all Druggists.

A Story of Alexander Dumas.
This story is told of Alexander Dumas: It is well known that he could not refuse a request—at least not often. One day he gave a man a letter to one of his intimate friends in Brussels. The friend, a wealthy merchant, received him as though he had been Dumas' own brother, introduced him to his circle of acquaintances, placed his stable at the man's disposal and did everything in his power to make life pleasant for Dumas' friend. After the lapse of fourteen days the man suddenly disappeared and with him the best horse in the merchant's stable. Six months later the merchant visited Dumas and thanked him for the kind of people he recommended to his consideration. "Dear friend," he added, "your friend is a shark. He stole the best horse in my stable." Astonished, Dumas raised his hands toward heaven and cried, "What he stole from you too!"

Trinkets From Land of Llama.
Tibetan idols and trinkets are among the souvenirs that Eastern travelers are bringing home. The mysterious land of the Grand Llama will furnish a theme for talks in reading clubs this winter. The British Ambassador's brother, Sir Edward Durand, who returned recently from China, has presented a few specimens of embroidery to the embassy in Washington. They are quaint and surpass even the Japanese in delicacy of color and design. Dull gold pins with radiating rays like those of the sun are among the ornaments the British officers brought from Lhasa. Some of these have been given to American army men.—New York Press.

MALARIA???
Generally That is Not the Trouble.
Persons with a susceptibility to malarial influences should beware of coffee, which has a tendency to load up the liver with bile.
A lady writes from Denver that she suffered for years from chills and fever which at last she learned were mainly produced by the coffee she drank.
"I was also grievously afflicted with headaches and indigestion," she says, "which I became satisfied were likewise largely due to the coffee I drank. Six months ago I quit its use altogether and began to drink Postum Food Coffee, with the gratifying result that my headaches have disappeared, my digestion has been restored and I have not had a recurrence of chills and fever for more than three months. I have no doubt that it was Postum that brought me this relief, for I have used no medicine while this improvement has been going on." (It was really relief from congestion of the liver caused by coffee.)
"My daughter has been a great coffee drinker as I, and for years was afflicted with terrible sick headaches, which often lasted for a week at a time. She is a brain worker and excessive application together with the headaches began to affect her memory most seriously. She found no help in medicines and the doctor frankly advised her to quit coffee and use Postum.
"For more than four months she has not had a headache—her mental faculties have grown more active and vigorous and her memory has been restored.
"No more tea, coffee or drugs for us, so long as we can get Postum." Name given by Postum Co., Battle Creek, Mich.
There's a reason. Read the little book "The Road to Wellville" in pkgs.

ORCHARD and GARDEN

To Cure Halter Pulling.
Buckle or tie a long halter strap around the horse's foreleg just above the knee, pass the strap through one ring of the bridle and tie the other end to hitching post. After a time they may with safety be hitched in the ordinary way.

Weak Bone.
One of the common troubles in hog raising in the corn belt is that of breaking down. Weak legs are due to improper feeding. The pigs will do pretty well while with the sow provided they do not get too much corn, and they will develop very well on good pasture, but when confined to a corn diet they can't develop good, strong bone. Milk and grass contain bone making material, but corn does not. Bone meal, soft coal, wood ashes alfalfa hay or grasses, and such feeds as contain plenty of bone building elements, will balance the corn diet. Go easy on corn except when putting on the finishing touches of market hogs. Just because it is an easy feed to throw out does not make it a proper feed.

Turn your hogs and pigs out on a good pasture and keep them on grass till fall. Don't feed swill. They will spend too much time squealing at the gate. Give them good water.
Those hogs will look large boned and graze all summer. You may be ashamed to show them to anybody, but stick to grass and water. In the fall, when corn is fit, feed it; or, better still, start them on old corn gradually and then watch these slab sided porkers fill in the chinks. And they will do it so rapidly and so cheaply you will be surprised. There's no sense in feeding corn all summer—if you have pasture.

For Barb Wire Cuts.
When a horse has been injured on wire the first thing to do is to stop the flow of blood; this may be a rule by done by bandaging it up tight. It may also frequently be best to apply powdered alum or common saleratus, both of which will generally be found effective. In a few hours considerable swelling will set in; this should be reduced either by applying cold water frequently or, what is really better, apply pure kerosene oil not only to the wound but also to the swollen parts. No bandage should be kept on where kerosene is used as it will then cause the hair to fall off temporarily and as soon as it is safe to do so, the sore should be carefully washed with soft water and castile soap. This ought to be repeated daily until the sore heals. One of the best healing medicines for horseflesh that I have ever used can be put up at any drug store, as follows: One-half pint of alcohol; one-half pint spirits of turpentine; one ounce of pure glycerine; mix all together in a large bottle and shake well before using. Apply only with a feather at morning and night. The sore should never be bandaged. By daily washing it will in this way heal up very rapidly. I can personally testify to the effectiveness of this simple remedy as we have made use of it in numerous cases with the best results where every other remedy we tried failed to heal up the sore on the horse.—Lewis Olsen in the Epitomist.

Fat and a Persistent Milk.
W. K. S., North Bennington, Vt.: I am sixty years old and have dealt in horses all the days of my life. I want you to tell me just how to feed and take care of a three and a half year old cow; I know little about cows, and I raised this one for the fun of seeing it grow up. The sire is a Durham, the mother a Devon. She is a good sized red cow, always fat. She came in last year on September 10, and had no trouble; she gave lots of milk. I tried to dry her off six weeks ago, as she is coming fresh soon, but I could not entirely. She commenced making bag about September 16. Now she has got quite a bag full. She has got a poor pasture. She has had all summer two quarts of bran, wheat and corn twice a day until September 1. Then I stopped. Now I give her a pumpkin at night and one quart of coarse bran, a pint of ground oats and a gill of oilmeal very wet in the morning. I thought this would keep her bowels in better shape. She is fat. The front quarters of her bag are full; the hind ones not so full. I am keeping her in the barn nights. If you will let me know what to do when she comes in and after I will be very much obliged.

I have carefully looked over your letter and manner of feeding and care of this cow and I have no better advice to give you than to keep on as you are doing. This cow for her breeding is a remarkable milk producing cow. If you have any trouble with her it will be, I think, with her going back in milk flow after she calves.
As she has been milking up so near to calving I would not advise you now to try to dry her up, but continue to milk her right along. After the calf is born, slowly increase her feed, but let it be largely wheat middlings and wheat bran, with some oats added. Corn in a cow with an inherent tendency to lay on flesh is not called for. Should she go beyond a certain limit in laying on flesh her milk flow will

diminish rapidly and she will simply become a beef cow, or a cow that either will not come in heat, or if she does will not get in calf. As you are milking her right along you have little to fear from milk fever (parturient apoplexy).—C. D. Smead, V. S., replying to above letter in Tribune Farmer.

Care of Stock.
According to the winter care given them will the pigs, colts and calves be worth the raising or not. According to the care received they will be worth much or little in the spring. How often we see runty, stunted calves and colts starting out in a barn and best years of their lives in a barn lot or barren pasture! Some are sure to die before spring and those that live through the winter will not be worth half what they should have been; and no amount of care and feed can ever make up to them for these first starved years. If your colts and calves are round and plump in the fall it will cost you far less to winter them through and they will be one-fourth larger and much more valuable in the spring than if you let them be thin in the winter in flesh and with coats that stand the wrong way. If the colt, calf, pig or lamb is worth raising at all, it is worth raising well. Some people have the mistaken notion that even if farm animals are stunted the first year or two, they will likely "come out and make a fair sized animal in time." Young stock should be thrifty; they should be kept growing. Care should be taken that their growth is never checked at any time. To do this they should have plenty of feed, of the proper kind and of the right amount. Give them sufficient for their needs but not enough to be left over and wasted, and see that each animal gets the feed intended for it. They should be fed and yarded by themselves where you can give them a little extra care and supervision. Clean up the lots and put things in order. It is not too late to attend to these things, go out now and see what needs doing most. See about shelter, bedding, manure, racks and feed boxes. Don't forget the wind breaks. Few farms have a wind break of any sort and poor neglected stock stands shivering in the wind on almost every farm; not only cold, but hungry as well.—Epitomist.

Crop Rotation.
The State Experiment Station, located at the University of Illinois, is conducting a series of investigations in regard to the comparative value of different crop rotations. Three different systems are being investigated. First, the continuous cropping with corn; second, a two-year rotation with corn and oats; and, third, a three-year rotation with corn, oats and clover. The results of the experiments show that the largest crop of corn can be raised in the three-year rotation, and that when limestone and steamed bonemeal are applied, the yield is greatly increased.
Where these systems have been followed for a number of years the latest yields obtained (1904) were 40 bushels per acre with the continuous corn system; 49 bushels of corn after oats in the two-year rotation, and 75 bushels of corn after clover in the three-year rotation.

On other fields, on the same kind of soil, where these three systems have been followed for twenty-eight years, the largest corn yields were 22 bushels per acre where corn has been grown continuously, 36 bushels of corn after oats in the two-year rotation; and 59 bushels of corn after clover in the three-year rotation.
The yields of the fields thus cropped for twenty-eight years have fallen below the yields of the fields cropped for only ten years, as follows: Eighteen bushels decrease (40 to 22) where corn is grown continuously; 13 bushels decrease (49 to 36) where corn follows oats in the two-year rotation; and 16 bushels (75 to 59) where corn follows clover in the three year rotation.

Where ground limestone and steamed bonemeal are being applied in the three year rotation, the yield for 1904 being 96 bushels of corn per acre.
To see one field of corn which yields only 22 bushels and another which yields 96, growing side by side, on the same kind of soil, and from the same kind of seed, and both receiving the same kind of cultivation is an object lesson not soon to be forgotten.

Its Season Never Ends.
"The hardest thing to get in a country hotel," said the traveling man, "is decent fruit. Meat and vegetables are generally pretty good, but at the best hotels in the small towns it is practically impossible to get good melons, peaches or grapes."
"The other morning I was in the leading hotel of a flourishing up-state town. The breakfast bill of fare read as usual, 'fruit in season.' The season of cantaloupes and other good things was at its height, but what do you suppose they had? Prunes! Oh, let it be largely wheat middlings and wheat bran, with some oats added. Corn in a cow with an inherent tendency to lay on flesh is not called for. Should she go beyond a certain limit in laying on flesh her milk flow will

Sixty percent of the matches made in Japan are sold in China.

PEARLS OF THOUGHT.

Love leads to likeness.
Modesty is the mark of might.
Richest joys are often nearest.
There can be no truth without liberty.

Intolerance has been the curse of every age and state.—S. Davies.
It is not necessary to tell all we know, but it is necessary to know all we tell.—Schiller.

A noble heart, like the sun, showeth its greatest contentment in its lowest estate.—Sir Philip Sidney.

I do love my country's good with a respect more tender, more holy and profound than mine own life.—Shakespeare.

Genius can not escape the taint of its time more than a child the influence of its begetting.—Ouida (Louise de la Ramée).

There is no happiness in life and there is no misery like that growing out of the dispositions which consecrate or desecrate a home.—E. H. Chapin.

NATIONAL HYMNS.

One Melody Served Five People at One Time.
The report that Switzerland has decided to change her national anthem, owing to the identity of its melody with that of the national anthems of Prussia and of Great Britain, reminds me that, although the words of the French national anthem, "La Marseillaise," are by Rouget de l'Isle, very few people are aware that the melody is German, and that, as shown by the late Castle Blaze, the most prominent musical critic of the nineteenth century, the air was borrowed by Rouget de l'Isle from a collection of German religious melodies. The Austrian national hymn was composed toward the latter end of the eighteenth century by Francis Joseph Haydn, though whether on his own initiative or by imperial order is quite certain. These national anthems, contrary to general belief, are a relatively modern institution, for until the eighteenth century no country possessed a national anthem of any kind. One of the first nations to adopt a national anthem was Great Britain, and considerable pains were taken to emphasize the fact that it was King George I., and not the Jacobite Pretender, who was meant. A preposterous attempt has been made to prove that the melody of "God Save the King" was a composition of Lord Halifax's illegitimate son, Henry Carey, but the air is a very much older one, of a religious order, and was adopted almost immediately afterwards by Prussia and by Russia. Switzerland and America following suit later.

At the end of the eighteenth century there were at least five countries—Great Britain, Prussia, the United States, Russia and Switzerland—using identically the same melody for their national anthem. Emperor Nicholas I., at the time of the Crimean war, decided to cast aside a national anthem borrowed and imported from the enemy, and to substitute for it a genuine national anthem of native composition. The present national anthem of Russia is probably the only one that was ever adopted as a result of an open competition—like the legendary tournaments of the lords of the Court of Thuringia, of the master-singers of Nuremberg, and of the violin-makers of Cremona. The musical committee of selection rejected all the anthems sent in but two, the respective merits of which were left for the emperor to determine. One was by Glinka, the renowned composer of "Life for the Czar." The other was by Lyoff. Glinka's hymn was thoroughly Russian in character, and in the form of a march. Lyoff's was more solemn, but much less original. He knew, however, that a high military style of instrumentation would appeal to the imperial ear, and his drums and trumpets decided Nicholas against all claims to recognition on the part of the more artistic Glinka. Nicholas, however, cannot be said to have made a bad choice. Both works were good, and if he preferred the more demonstrative of the two, it was probably because he knew so well the tastes of his people.—Paris Correspondence in London Globe.

Whole or Half Truths.
"Some folks ought to take their conscience out once in a while for exercise."
"Oodily isn't always the surplus of genius."
"Civilization's Trinity: Godliness, Cleanliness, Progressiveness."
"Fashion's the devil's first-assistant."

"The fellow who objects to discipline needs it the most."
"The optimist has an easy time of it, he smiles while others work."
"You can inherit ability, but you've got to hustle for experience."
"The rock of success isn't located in a field of roses."
"Better be single in peace than married in war."
"The lazy churchman is always conservative."
"Silence isn't always golden. The talker with something to say is worth a dozen keep-sills."—Nathaniel C. Fowler in "Gumption."

"What makes it fly so?" asked a little Boston maiden as her mother brushed her hair. "It is the electricity. Don't you know that there is electricity in your hair?" replied the mother. "Well, mamma, aren't we wonderfully made? Here I am, with electricity in my hair and grandma has gas in her stomach!"—Lippincott's.

Deadly Trades.

"Tobacco workers are prone to leadly nervous diseases. I have never yet seen a tobacco worker who is not a nervous crank; who is not off in his head," complained the owner of a large Bowers cigar factory. "I don't know why it is; I used to be a worker myself, and I have never recovered from the effects of the trade. Half the time my men are away sick or dying, they are always ill-tempered and flighty, and a public agitation makes idiots of them. I don't know the reason, as I said." He was advised to consult a physician and find out.

The forman in a stone-cutting yard, when questioned, was better informed as to the evils of his trade. "See those dust clouds all over the yard," he said. "Consumption there! and quick at that."—Technical World Magazine.

Epitome of Whole World.
With the United States sending macaroni wheat to Europe, and wines to France, the proverb about sending coals to Newcastle seems to be practically realized. It is not surprising, however, that this country thus competes, in various markets of the world, in products hitherto confined to exclusive and remote localities, for the extent and variety of the American domain are such as make it a practical epitome of the whole world. There is scarcely a soil or a climate, apart from arctic and tropic extremes, that is not found here—hot or cold, wet or dry, constant or variable.—New York Tribune.

STOPS BELCHING BY ABSORPTION—NO DRUGS—A NEW METHOD.
A Box of Waters Euc—Have You Acute Indigestion, Stomach Trouble, Irregular Heart, Dizzy Spells, Short Breath, Gas on the Stomach?
Bitter Taste—Bad Breath—Impaired Appetite—A feeling of fullness, weight and pain over the stomach and heart, sometimes nausea and vomiting, also fever and sick headache?
What causes it? Any one or all of these: Excessive eating and drinking—abuse of spirits—anxiety and depression—mental effort—mental worry and physical fatigue—bad air—insufficient food—sedentary habits—absence of teeth—boiling of food.
If you suffer from this slow death and miserable existence, let us send you a sample box of Moll's Anti-Belch Waters absolutely free. No drugs. Drugs injure the stomach.

It stops belching and cures a diseased stomach by absorbing the foul odors from undigested food and by imparting activity to the lining of the stomach, enabling it to thoroughly mix the food with the gastric juices, which promotes digestion and cures the disease.
SPECIAL OFFER.—The regular price of Moll's Anti-Belch Waters is 50c. a box, but to introduce it to thousands of sufferers we will send two (2) boxes upon receipt of 75c. and this advertisement, or we will send you a sample free for this coupon.

THIS OFFER MAY NOT APPEAR AGAIN.

1000 FREE COUPON. 128
Send this coupon with your name and address and name of a druggist who does not sell it for a free sample box of Moll's Anti-Belch Waters to:
MOLL'S GRAPE TONIC CO., 328 Third Ave., Rock Island, Ill.
Give Full Address and Write Plainly.
Sold by all druggists, 50c. per box, or sent by mail.

All He Saw.
A man had been sent by the home agents to take an inventory of the drawing room furniture. He was so long about his task that at last the mistress of the house went to see what was taking place. She found the man slumbering sweetly on the sofa with an empty bottle beside him. It was evident, however, that he had made a pathetic, though solitary, attempt to do his work, for in the inventory book was written, "One revolving carpet."—The Tatler.

UNSIGHTLY BALD SPOT
Caused by Sores on Neck—Mercurial Tching For Two Years Made Him Wild—Another Cure by Cuticura.
"For two years my neck was covered with sores, the humor spreading to my hair, which fell out, leaving an unsightly bald spot, and the soreness, inflammation and mercurial itching made me wild. Friends advised Cuticura Soap and Ointment, and after a few applications the torment subsided, to my great joy. The sores soon disappeared, and my hair grew again, as thick and healthy as ever. I shall always recommend Cuticura." (Signed) H. J. Spalding, 104 W. 194th St., N. Y. City."

Dancing in Miles.
A young man fond of dancing recently took a pedometer with him to a ball, and found that in the course of the evening he had covered 13 1/2 miles. The average length of a waltz has half a mile, of a polka three-quarters of a mile, of a gallop or schottische a mile, and of a lancers a quarter of a mile. A girl usually dances more than a man, and is calculated to cover more than 16 miles in a single evening.

To Cure a Cold in One Day.
Take Laxative Bromo Quinine Tablets, Druggists refund money if it fails to cure. E. W. Grove's signature on each box. 25c.

Jacob Steiner, of Brooklyn, has a collection of rare pistols.
Chrysanthemums, it is said, were cultivated in China before the eleventh century.

First Woman Engineer.

The first European woman to adopt engineering as a profession is Cecile Buttler, a Swiss, 24 years old, who recently passed her examinations with honor at the University of Lausanne.

First Woman Engineer.
A modern woman's mite is reported at a church at Blackpool, England.
Just think what an outrage it is to be robbed of all the benefits of the services by continuous coughing throughout the congregation, when Anti-Grinone is guaranteed to cure. Sold everywhere. 25 cts. E. W. Diermer, M. D., manufacturer, Springfield, Mo.

Guaranteed Cure For Piles.
Hemorrhoids, Blind, Bleeding, Protruding Piles, Druggists are authorized to refund money if Pile Ointment fails to cure in 6 to 14 days. 50c.

An attempt is being made in England to popularize the dogfish.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c. a bottle.

A new type of ballet is being served to the French infantry.

Piso's Cure cannot be too highly spoken of for coughs, etc.—J. W. O'Leary, 923 Third Avenue, N., Minneapolis, Minn., Jan. 6, 1903.

The London Zoo has just received its first humming bird.

The Language of Monkeys.
Prof. Garner is not the first man to study the speech of the monkeys. This honor belongs to Sir Richard Burton, the famous Orientalist and the translator of the "Thousand Nights and a Night."

Lady Burton tells in her biography of her distinguished husband that Sir Richard believed firmly in monkey speech, that he had forty apes continually with him for several years, and that he had written down a monkey vocabulary of sixty words. This vocabulary, unfortunately was lost. Prof. Garner can make a strange monkey drink by saying a certain word, and with another word he can frighten it, etc. But Sir Richard Burton could do all these things, too. His vocabulary, furthermore, was larger than Mr. Garner's. Ernest Haeckel, the great German scientist, is in hearty sympathy with the study of the monkey language. He says he believes firmly that such a language exists.—Philadelphia Bulletin.

The New Drydock in the Orient.
What will probably be the largest drydock in the Orient for several years has just been completed at Nagasaki. It can accommodate steamers as the Minnesota and the Dakota, having a length of 722 feet and a depth of water on the sill at high tide amounting to 34 feet. Its chief patrons, no doubt, will be the Japanese, who will now be encouraged to build bigger vessels than they possess at present. The floating drydock which has to be towed from the United States to Manila is considerably less capacious, though able to handle any warship already in the service or likely to be constructed within the next decade.

Gossip.
Gossip is a humming bird with eagle wings and a voice like a foghorn. It can be heard from Dan to Beersheba, and has caused more trouble than all the ticks, fleas, mosquitoes, coyotes, grasshoppers, chinch bugs, rattlesnakes, sharks, sore throats, cyclones, earthquakes, bilzards, small-pox, yellow fever, gout and indigestion that this great United States has known or will know when the universe shuts up shop and begins the final invoice. In other words it has got war and hell both backed up in the corner yelling for ice water.—Guernsey (Wyo.) Gazette.

Dynamite for Power.
Noting the rapid change in motive power, Sir Alfred Hickman states that in his own works 24 valuable steam engines have been replaced within a few years by electric motors driven by gas engines. This is estimated to have brought a saving in fuel alone of \$37,500. If the future motors are to be driven by explosion, he suggests the use of powder or dynamite, and predicts fame and fortune to the man harnessing dynamite for power.

To Cure a Cold in One Day.
Take Laxative Bromo Quinine Tablets, Druggists refund money if it fails to cure. E. W. Grove's signature on each box. 25c.

Jacob Steiner, of Brooklyn, has a collection of rare pistols.
Chrysanthemums, it is said, were cultivated in China before the eleventh century.

Prince a Good Hunter.

The Prince of Wales made a good impression on the Indian rajahs by his gun shooting. He killed his first tiger the other day, near Jaipur, on the run with a long shot.

CRISIS OF GIRLHOOD

A TIME OF PAIN AND PERIL
Miss Emma Cole Says that Lydia E. Pinkham's Vegetable Compound has Saved Her Life and Made Her Well

How many lives of beautiful young girls have been sacrificed just as they were ripening into womanhood! How many irregularities or displacements have been developed at this important period, resulting in years of suffering!

Girls' modesty and oversensitiveness often puzzle their mothers and baffle physicians, because they withhold their confidence at this critical period.
A mother should come to her child's aid and remember that Lydia E. Pinkham's Vegetable Compound will at this time prepare the system for the coming change and start the menstrual period in a young girl's life without pain or irregularities.
Miss Emma Cole of Tullahoma, Tenn., writes:
Dear Mrs. Pinkham—
"I want to tell you that I am enjoying better health than I have for years, and I owe it to Lydia E. Pinkham's Vegetable Compound."
"When fourteen years of age I suffered almost constant pain, and for two or three years I had soreness and pain in my side, headaches and was dizzy and nervous, and doctors all failed to help me."
"Lydia E. Pinkham's Vegetable Compound was recommended, and after taking it my health began to improve rapidly, and I think it saved my life. I sincerely hope my experience will be a help to other girls who are passing from girlhood to womanhood, for I know your Compound will do as much for them."
"If you know of any young girl who is sick and needs motherly advice ask her to write Mrs. Pinkham, Lynn, Mass., and she will receive free advice which will put her on the right road to a strong, healthy and happy womanhood."
