

"VARNISH DEEP" CLOTHES

There are two grades of clothing, CLOTH-CRAFT and others, some merely made to sell. CLOTHCRAFT is made to wear.

Good clothes on the surface is not enough, so good looking furniture for instance is only "varnish deep," you don't know how soon it will go to pieces; Surface Clothes cover a multitude of the tailor's sins—and the worst of it is, you've lost on the transaction more than you thought you saved.

Back of CLOTHCRAFT garments stands a glorious record, a name that means much to both the maker and the wearer, it means much to us as well, because you will NOT be a one-time customer. It's the coming back again and again that pays you to sell CLOTHCRAFT CLOTHES—pays you to wear them too.

All that brains, shears and needle can accomplish in skilled hands, are made manifest in this splendid make of splendid clothing, that standard by which so many of the "best" makes are measured. "Be sure you're safe." If oleomargarine is just as good as butter, why buy butter? "Just as good as CLOTHCRAFT" is the best argument in the world for you to buy CLOTHCRAFT.

FREE ANTITOXIN HEADS OFF DEATH

In Last Four Months Every Diphtheria Patient Treated Promptly and According to Health Commissioner's Instructions Has Recovered.

URGES EARLY DOSAGE
Dr. Dixon Scores a Notable Life-Saving Triumph Among the Poor of Pennsylvania—Hopes For Still Better Record.

The Health Commissioner, Samuel G. Dixon, a couple of months ago announced that use of free antitoxin among diphtheria victims who were too poor to pay for the serum had reduced the death rate to 8.5 per cent. This was a splendid result and showed the great benefits of the State paying for antitoxin for those who might otherwise not be able to procure it and in consequence probably die.

Now Health Commissioner Dixon announces that according to the records compiled in his office he finds that during the four months of November and December, 1905, and January and February, 1906, there has not been a single death from diphtheria where the free use of antitoxin provided by the State has been used within 24 hours after the onset of the disease and in doses recommended in circulars sent out by the Commissioner.

Dr. Dixon attached great importance to this fact, and hopes that the same results will be secured in a far larger number of cases by physicians throughout the State using free antitoxin more promptly.

This prompt use of antitoxin has been urged by Health Commissioner Dixon from the start of the free distribution. He has urged it in his correspondence with fellow-medical men and the local Boards of Health throughout the State, and especially in the circular which is contained in every package of the State's free antitoxin.

"The early use of antitoxin is essential," says Health Commissioner Dixon in this circular, and he endeavors to impress it upon the people by heavily underscoring the words of advice.

In this circular also Dr. Dixon has given general directions for the administration of antitoxin in both curative and immunizing doses that have been found exceedingly helpful to physicians in Pennsylvania. Never less than 3000 units, says Dr. Dixon, should be used for a curative dose; in advanced cases he says to increase the initial curative dose from 3000 to 6000 units.

If improvement is not manifested within six hours following the initial dose, give 6000 units, and if no benefit is to be observed within the following eight to 12 hours, repeat the same until a change for the better can be noticed.

All cases showing croupy symptoms should receive large and often-repeated doses.

THE ENTERPRISE SILK COMPANY.

A SILLY TOY.

The Way the Toothbrush Was at First Regarded.

Colonial clinics and letters make it plain that our unfortunate ancestors suffered much from jumping tooth-brushes, swelled faces and the early loss or forcible extraction of teeth which at a later period might have been saved to render their owners many years of further service. No wonder, since the care of the teeth was little understood, and that little often but negligently practiced.

Toothpicks were known; the toothbrush was not, although rough substitutes were employed, made of flattened sticks, split and pointed at one end to a stiff, fibrous fringe. Toothbrushes when first introduced were regarded as by no means important accessories to the toilet, but rather as minor luxuries and suitable for women only.

The diary of a London merchant trading to the colonies has this entry:

"Bought a Toothbrush for my wife, which, used together with suite water, very strong, and a wash of Herbs, she is told will keep her Teeth from falling out or getting hollow. The suite and Herbs may well prove strengthening to her Gums, which are tender, but for the brush it seems but a silly Toy, hardly like to wear the worth of its price and scarce clean-ly save when new. But she must have it, being a new thing late from France."

In the famous collection of the letters of the Verney family, as well, the toothbrush is referred to as "an elegant trifle, now used by the ladies of Paris."

But when Sally Annis, a colonial belle, wrote of it to her sister she had, like the London merchant's wife, good hopes of its proving of more than trifling value. Her seafaring father had just brought her one, along with other gifts.

"Besides these, and ye small comb, he brt me a new mouth-brush made of ivory," she wrote, "the back parts I layed very pretty with silver; and ye bristles long and stiffe and sett very firme; web he is assured will help me of my Tooth Akes; web, you will guess dear Judy I do pray it may."—*Youth's Companion.*

FOR THE HOUSEWIFE.

Melted butter will not make a good cake.
Eggs should be white, dry and close grained.
The colder eggs are the quicker they will froth.

To make good pastry the ingredients must be ice cold.
Nutmegs should be grated at the blossom end first.
A brush dipped in salt water should be used in cleaning bamboo furniture.

Good macaroni is of a yellowish tint, does not break readily in cooking and swells to two or three times its bulk.
A simple and very efficient disinfectant to pour down a sink is a small quantity of charcoal mixed with water.

Warm bread and cake should be cut with a knife the blade of which has been heated by standing it in boiling water.

Mica Mining.
Mica mining is one of the greatest industries in North Carolina. Mica is found in all sorts of blocks of various thicknesses and shapes and can be split and resplit almost ad infinitum or until it becomes the thin, flexible wafer of commerce. The material is by nature imbedded or scattered through the felspar in masses large or small, close together or far apart, and is blasted from the rocks by means of dynamite, the purer veins being found between walls of slate. From the mines it is taken to the shops, where it is split into thin sheets, trimmed into regular forms and made ready for the market, the price varying with the size and color of the sheets. The average size is about 4 by 6, though rare sheets of 24 by 18 inches are sometimes found.

Napoleon's Bad Handwriting.
M. Honssaye attributes the middle over orders at Waterloo to Napoleon's execrable handwriting. This was the opinion of the writing master of Alexandre Dumas: "The emperor never lost a battle except by his bad writing. His officers could never make out what he meant. Remember this, Alexandre, and make your down strokes heavy and your up strokes light." Grouchy declares that during the battle of Waterloo he could not make out whether Napoleon wrote "bataille gagnes" or "bataille engagee," and he conjecturally read "bataille gained."—*Andrew Lang in London Post.*

The Freaks of Fate.
Here is a unique memorial notice from a Georgia exchange: "Once he was nearly swallowed by an earthquake and shortly afterward was blown nearly a quarter of a mile by a hurricane, but he triumphed over all these afflictions, only to be kicked out of life by a mule that had a mortgage on it and was blind in one eye."—*Atlanta Constitution.*

Other Objections.
"Gladly would I die for you!"
Her look of hauteur was maintained despite this plea.
"You are in error," she replied coldly, "if you think the color of your hair constitutes my chief objection to you."
The good night was brief and soon—*Philadelphia Ledger.*

A Big Difference.
She—How much do you earn a year?
He—About \$2,000.
"But we can't live on that!"
"You asked me how much I earned. I make about \$20,000."—*Life.*

INDIGESTION'S RECORD

"The best remedy I can prescribe for your indigestion, madam, is Green's August Flower. I know of several other physicians who prescribe it regularly."

Indigestion is making an awful record as a cause of sudden death. It is beating heart-failure in its ghastly harvest. You read in the papers daily of apparently healthy and even robust men being suddenly attacked with acute indigestion after enjoying a hearty meal, and of their dying in many cases before a physician could be called in.

This should be a warning to you who suffer with regular or periodical attacks of indigestion. If these unfortunate victims of acute indigestion had taken a small dose of Green's August Flower before or after their meals they would not have fallen a prey to such sudden seizures. August Flower prevents indigestion by creating good digestion. It also regulates the liver, purifies the blood and tones up the entire system in a natural way.

Two sizes, 25c and 75c. All druggists.

\$30,000.00 STEEL PLANT GOLD BONDS

First Mortgage. Six Per Cent Bonds. Payable in Gold.
Dated Dec. 1, 1905. Interest payable June 1, Dec. 1.
FIRST NATIONAL BANK, Reynoldsville, Pa. PEOPLES NATIONAL BANK, Reynoldsville, Pa.
AND
C. F. DICKINSON, Westinghouse Building, Pittsburg, Pa.

We own and offer (in amounts to suit purchasers) the best industrial security ever offered to the investors of this community.

The controlling interest in Reynoldsville's new "STEEL PLANT" has recently been purchased by Pittsburg people who are old in the successful management of large iron and steel properties.

Necessary additions are being made to the equipment, and new and heavy machinery is being added. Upon completion of these improvements a full line of Alligator Shears, Cold Saws, Rolling-Mill and Contractors' Machinery will be extensively manufactured at the Company's works, and sold from their Pittsburg offices.

The assets of the Company as re-equipped will stand at \$120,000.00 in round figures, against which the \$30,000.00 of First Mortgage bonds are the first and prior lien.

The Company has issued \$30,000.00 six per cent First Mortgage Gold Bonds in denomination of \$100.00, \$200.00, \$500.00 and \$1,000.00 each and we, the undersigned, have purchased a very large proportion of the entire issue.

The semi-annual interest, at the rate of six per centum, is payable on June 1st and December 1st of each year, at The Peoples National Bank, Reynoldsville, Pa.

These bonds are a first and prior lien on all of the real estate, buildings, machinery, equipments, franchises, property and revenues of the American Production Company, and a special condition in the mortgage provides that bonds to the amount of \$2,500.00 shall be retired every year, after the first two years.

LEGALITY
These bonds have been issued under the supervision and advice of the following attorneys, viz: Messrs. Charles Corbett, of Brookville, Pa., Weil & Thorp, of Pittsburg, Pa., and G. M. McDonald, of Reynoldsville, Pa.; any of whom can vouch for the binding validity of these securities.

The undersigned being personally acquainted with the "STEEL PLANT" property, consider these bonds as the best of the kind ever offered in this community, and recommend them as a safe investment.

Prompt subscriptions for bonds in amounts from \$100.00 up will be received by the undersigned at the price of par and accrued interest. Allotments will be made as subscriptions are received, the right being reserved to cease the allotment at any time.
