

"My endorsement of Pe-ru-na is Based On Its Merits.

--- Ed. Crumbo.

E D. CRUMBO, ex-Mayor of New Albany, Ind., writes from all E. Oak "My endorsement of Peruna is based

on its merits. "If a man is sick he looks anxiously for something which will cure him, and Peruna will do the work.

"I know that it will cure catarrh of the head or stomach, indigestion, headache and any weary or sick teel-

ing.
"It is bound to help anyone, if used according to directions.

"I also know dozens of men who speak in the highest terms of Peruna and have yet to hear of any one being disappointed in it."

Mr. Crumbo, in a later letter, dated Aug. 25, 1904, says:

"My health is good, at present, but if a should have to take any more medicine a will fall back on Peruna."

Had a Few Lives Left.

being missing for two weeks a cat belonging to a family in Wilt-shire, England, was found clinging to the side of a well 35 feet from the surface and just above the water. She was apparently none the worse for her experience when she was brought to the top.

## DISFIGURED WITH ECZEMA.

Brushed Scales From Face Like Powde -Under Physicans Grew Worse-Cuticara Works Wonders.

suffered with eczema six months. I had tried three doctors, but did not get any better. It was on my body and on my feet so thick that I could hardly put a pin on me without touching eczema. My face was covered, my eyebrows came out, and then it got in my eye. I then went to another doctor. He asked me what I was taking for it, and I told him Cuticura. said that was a very good thing, but that be thought that my face would be marked for life. But Cuticura did its work, and face is now just as clear as it ever was. I told all my friends about my remarkable cure. I feel so thankful I want everybody far and wide to know what Cuticura can do. It is a sure cure for eczema. Mrs. Emma White, 641 Cherrier Place, Camden, N. J., April 25, 1905."

Mark's Books Barred.

Mark Twain's "Huckleberry Finn" and "Tom Sawyer" have been barred mixed with a thin slop; they will in from children considered under the this way gradually learn to be selfage of discretion by an order issued dependent."-Weekly Witness. by the Brooklyn public libraries.

HAVE YOU A BABY? If so, you ought to have a PHOENIX WALKING CHAIR

"From the cradle to the baby chair"

(PATENTED) OUR PHOENIX Walking Chair holds the child securely, preventing those painful falls and bumps which are so frequent when baby learns to walk.

"BETTER THAN A NURSE."
The chair is provided with a removable, sanitary cloth seat, which improves the weight of the child i prevents bow-legs and spinal ubles; it also has a table attachment in its toys, etc., with-

"As indispensable as a cradle."

It is so constructed that it prevents soiled clothes, sickness from rafts and floor germs, and is ecommended by physicians and indorsed by both mother and baby. Combines pleasure and utility. To baby should be without one.

Call at your furniture dealer id ask to see one.

MANUFACTURED ONLY BY PHOENIX CHAIR CO. n only be had of your furni

For San Jose Scale.

Many fruit growers know the San Jose scale from sad experience, These and any others whose plants are affected with this nest; should prepare at once to spray them with the limesulphur preparation. If this work is postponed it may not be done at all. The formula recommended for use in this state is as follows:

Lime (unslacked), 20 pounds; sulphur (flour or flowers), 30 pounds; salt, 10 pounds; water, 100 gallons .-Indianapolis News.

Loquid Manure.

When a farmer makes up his mind to post himself upon the value of manures, about the first thing he finds out is that the liquid nortion of the manure is the most valuable. Upon finding this out the first thing to do is to devise some ways or means in which this liquid manure can be saved and kept so that the greatest percentage of its high value may be made use of. Any plan that will acomplish this is good, and he quicker a man adopts it, or puts it into operation, just so much sooner will he find his land greatly improved in value.-Weekly Witness,

Fruit by Weight.

Hereafter bananas are to be sold wholesale by weight and all quotations will be given by the hundred pounds and the quality will be given by grades: Firsts, seconds, thirds, etc.

This is the only fair war to sell all products. Even small fruits could be put up in boxes holding approximately a given weight and quotations would then mean something. Whereas as asis now the case, boxes of all kinds vary so much that quotations by the case or box gives no definite idea of the market. Then, too, laws could be made regulating these weights, the same as in the case of other commodities - National Fruit Grocer.

The Pig's Early Life.

At one of the Canadian institutes a peaker, who had as his topic "Swine Breeding and Feeding," said, among other things, that "when pigs are farrowed a common weight is three pounds (although we quite frequently have them weigh four); a litter of ten pigs will then weigh thirty pounds. and when they are four weeks old, it they have been well nursed, they will weigh eighteen pounds each, making a gain of 150 pounds in 28 days, or the sow producing an average of five and a half pounds per day. So that you see the sow should be a milker and be fed with an eye to milk production. The young pigs will sometimes commence to eat at two weeks old, but usually about four. If you have only a limited supply of milk to feed them, it is a good plan to set a shallow trough where the sow can't get at it, and the young pigs can, and feed them milk, or they will do very well on scalded shorts

Practical Poultry Points.

If you should meet with the misfor tune of having the combs frozen, use upon the frostbitten part the following preparation: Sweet oil, one teaspoonful; turpentine, one teaspoon

It is very necessary that the hens should be supplied with grit, as this is really their teeth. Throw, gravet, oyster shells and old broken white lishes where they can get it Pure water should be available at

all times; cold water in summer and warm water in winter. Do not neglect this. A large percentage of the egg is composed of liquid.

Give a supply of green food dailyabbage, pulped turnips, apples, beets and lettuce. Table scraps of all kinds can be used to advantage when they are not too saity. Avoid using pepper or peppers except on a very

Egg breaking is sometimes caused by the lack of oyster shell.

If you have not used this you do not know its value. The last egg of summer is good, but the first egg of winter sounds more to the point. At ter the moulting season feed for egg production.-Farmers' Home Journal.

Latest Egg-Laying Contest.

The latest egg-laying contest is periment station. The leading breeds a male and six pullets. The methods were those ordinarily employed, the results such as might be obtained by an experienced poultryman; The usual mixtures of grain and soft feed were given, also vegetable food, oyster shells, grit and meat meal, but no fresh meat, pepper, patent foods or other stimulants.

During the twelve months of the contest the pen of White Leghorns laid 885 eggs; the Rose Comb White Leghorns laid \$28, laying, however, a larger proportion of their eggs in the winter than the single comb pen. The American Reds laid 820 eggs and Ledger.

showed the best winter egg record. The White Wyandottes laid 779, the Buff Wyandottes 764, Barred Plymuth Rocks 619, Light Brahmas 539 The Plymouth Rocks were not fairly represented, the females being yearlings, while those of the other breeds were pullets. The Brahmas were, as usual, slow in developing, but continned to lay well except in the spring. Probably for a longer time their relative showing would have been better.-Indianapolis News.

Unthrifty Calves.

A reader, Frederickton, Ohio: Please advise me what to do for my calves. I do not consider them sick, but they are not doing well. When I bought them last Octover they were very thin in flesh and had been running on very short pasture. From October till December they had fair pasture, and since then have been fed clover and timothy hay, mixed, once a day, and nice, bright corn fodder once a day, also one and a half pecks of nubbins, given at two feeds each day. They are salted once a week, have access to good water and are warmly housed at night. They haveaccess to a wheat straw stack, but I never see them eating it. Their droppings seem normal, but they are thriving. The backbone of one of them is almost sharp enough to hurt the hand when rubbing it. The hide is not tight to the backbone, as I have noticed would sometimes be the case when cattle were not doing well. They are last April and May calves. I have bran and oats. Would they be a better feed for them than the cern? If so, how much should I

Your feed under ordinary conditions would keep them thriving fairly well, yet, with the exception of the clover they get in the hay, none of your foods are suitable for the best growing of calves. Yes, I would, by all means, change the corn nubbin feeding to cats and bran, and also get some linseed oil meal. These calves were thin, as you say, in October, hence were not in condition to start in on foods that were not exactly balanced, like corn fodder and corn pubbins, which are never very good cast foods. The quantity of the grain you should feed depends largely upon the calf. I think a very good rule would be to mix oats and wheat bran equally by measure, then to every nundred nounds of the mixture add ten pounds of the linseed oil meat, Start in with this on a pint to each calf twice a day. When they eat it well increase until you are feeding two quarts twice a day to each calr. This, of course, should be varied as the individuality of the calf would seem to require. If one is dainty, care should be used in not overfeed ing it, yet with this class of grain food there is little danger of one's feeding too much after they get used to it. You will get value received in growth, provided they are not scrub bred calves. In short, good feed to good, well bred calves means value received; good food to scrubs means a tight sourceze to get the money back .- C. D. Smead, in the Tribone Farmer

An Observant Horse.

Another champion of the reasoning power of animals has come forward with a special instance. A retired farmer living in Kansas City says that he once had a farm horse that undoubtedly possessed reasoning faculties. "This horse," he says, "was once injured by barbed wire, and he had a wholesome dread of barbwire ever after. He could not be induced to step across a wire lying on the ground. One day, when this horse was grazing in the pasture. I started with another team to water them at a pond. To reach this pond I went through a gate into a field, going out on the other side by crossing the fence wires lowered to the ground and fastened. The horse in the pasture, seeing that I was driving the team to water, folfused to do it and went back and giving it to his son.-Toronto Globe. around the field. The next day he followed the team again going to water, having forgotten about the wires either direction the cogitative horse it. suddenly remembered that those wires tion they were the day before. Toss- out o' patience with her.' that just concluded at the Kansas ex- ing up his head with a disgruntled snort, he turned and trudged back sifter and ironing boards, I s'pose, were represented each with a pen of around the field. That was a case of reason. From cold facts and proposition retained in his memory and not and he might as well start now."-Kansas City Times.

Reassuring.

this morning? Patient-It's exceedingly painful, doctor. I'm afraid I'm going to have

trouble with it.

PEARLS OF THOUGHT.

No one who does not enjoy work can truly enjoy anything else.-President Raymond.

In proportion as nations get more corrupt, more disgrace will attach to poverty, and more respect to wealth .-

Remember that whatever knowledge you do not solidly lay the foundation of before you are eighteen you will ever be master of while you breathe. -Lord Chesterfield.

In a state of sensitiveness to every touch of the Spirit, we never think of getting anything. We are only conscious of becoming something, our beings are exalted, our natures are enlarged.

Here is my work to do, to worry over. . . . "My work," I say. But, If I can know that is not my work, but God's, should I not cast away my restlessness, even while I worked on more faithfully and untiringly than ever?-Phillips Brooks:

Yes, things are hard sometimes. And we must live on and bear God's will. Because he makes a plan for us, and there will be always some thing coming, we cannot tell, day by day, what may be, only be never forgets us or leaves anything out.-Mrs. A. D. T. Whitney.

TEACHING THE DEAF.

Modern Method by Which the Hearing is Cultivated.

I placed her (the deaf pupil's) chair two feet from mine, drilled on A. B. C, etc. In one year's time (including three months' vacation with no drill) her father stated that her hearing had improved 100 percent during the year. She could then hear exceeding

We also used the plano as a means On March 30, 1905, I found that she could hear "C" above the staff. That is the twenty-second note from the right limit of a piano at eight and onequarter octaves. On this day I began using the instrument to which she refers for about fifteen minutes, then tried the same "C" without the instrument and all the notes until the next higher "C" was reached. She could hear perfectly even that. From day to day we worked on tones until we were five or six notes from the highest.

Here we remained for over a week My pupil declared she could hear the thumping of the note, but not any tone. I had my doubts of her own self-confidence, so one day I started with two notes higher than she had ever heard and descended to the troublesome note. All were heard perfectly. It was a matter of what she had expected to hear. I had usually started drill four or five notes lower than her limit and worked up to the new tones, but on this occasion I reversed the operation, and she, be lieving all would go on as usual, was expecting to hear whatever note I first struck. She now hears every note on the keyboard, even the highest and the others indefinitely beyond. She can enjoy a musical play fully as well as most normal people (of course she does not hear the words; do you?) She hears whistling three feet away which was previously out of the ques tion, no matter how near she was to the sound, and she is constantly improving in hearing, even when not be ing drilled .- Mrs. J. Scott Anderson before the Convention of Instructors of the Deaf.

Lock of Hair in Dickens' Watch.

Mr. E. S. Williamson of the Crown Lands Department, president of the Dickens Fellowship, has discovered another interesting relic of the great author, and one which curiously enough he has been carrying around for a few years without knowing it. He has been the possessor since 1901 of the first gold watch carried by Dickens, which was brought to this country by Francis Jeffrey Dickens, the third son of the author, who came to Canada shortly after his father's death and became inspector in the Northwest mounted police. His father gave him the watch as a keepsake. Recently Mr. Williamson sent the timepiece to a local jeweller to be cleaned and the latter discovered in the back case a secret recess. In this was a lock of dark hair, a man's evidently, tied with thread. Whose is it? That is the question Mr. Williamson and others interested would like to solve.

Mr. Williamson thinks it may have lowed until he came to the place been cut from the novelist's own head where I crossed the wires. He re- and placed in his watch when he was

Beyond the Limit.

"I don't mind folks borrowing," that lay in the way. While down in a said Miss Hodges, plaintively, to an hellow out of sight of the fence in old friend who was paying her a vis-"but I've got an awful trying woman for a neighbor just now. She were probably lying in the same post- borows such queer things I'm most

"Shears and brooms and the floursaid the guest, who had known life in a country town.

"Mercy me, I don't count such idea being to bring out comparative excited by any new perceptions, he things!" said Miss Hodges, "Nor my reflectively reasoned out that he'd best umbrella nor my carving knife. have to make a detour sooner or later, I can make shift to get on without 'em for a while any time. But when she come over to borrow my diary the other day, so's she could keep account of the weather and her hens' Doctor-Well, how does the eye feel eggs, and so on till her husband came back from California, she having given him hers to put down his expenses and sights in, so's she could copy her record in from my Doctor-Oh, don't worry; it will book in the right place-I declare I come out all right.—Philadelphia called it the cap-sheaf!"—Youth's Companion.

When We Begin to Grow Old.

Dr. Osler's jocose remark about the comparative uselessness of man for the activities of this life after the age of 60, has brought out a rival in the person of Prof. Minot, of Har-Prof. Minot declares old age begins at 25. A man of 30, he says, is not nearly as likely to have an original idea as one of 20. The Har-vard professor, like Dr. Osler, must be speaking in a Pickwickian sense. If he was in earnest he certainly would have placed the beginning of old age at birth, for there is where it really begins.-Pittsburgh Gazette.

FITS permanently cured. No fits or nervous-ness after first day's use of Dr. Kline's Great Nerve Restorer, #2 trialbottleandtreatisefres Dr. E. H. KLINE, Ltd., 361 Arch St., Phila, Pa.

Costly Eggs.

Eggs of the aptornis, a recently extinct wingless bird, bring very high prices, fine colored specimens fetching as much as \$750 to \$1,000 aplece. The apteryx, or New Zealand kiwi, is a bird which, though still living, is becoming scarcer from day to day, and its final extinction is only a question of years. These kiwi breed very slowly, only one or two very large eggs being laid during the season, and as yet there is no record of the successful raising of young in

BOX OF WAFERS FREE-NO DRUGS -CURES BY ABSORPTION.

Cures Belching of Gas-Bad Breath and Bloating-Sour Ernetations-

Take r. Mull's Wafer any time of the day or night, and note the immediate good effect on your stomach. It absorbs the gas, disinfects the stomach, kills the poison germs and cures the disease. Catarrh of the head and throat, unwholesome food and overeating make had stomachs. Scarcely any stomach is entirely free from taint of some kind. Mull's Anti-Belch Wafers will make your stomach healthy by absorbing foul gases which arise from the undigested food and by re-enforcing the lining of the stomach, enabling it to thoroughly mix the food with the gastric juices. This cures stomach trouble, promotes digestion, sweetens the breath, stops belching and fermentation. Heart action becomes strong and regular through this process. Take a Mull's Wafer any time of the day

weetens the creath, stops became and fermentation. Heart action becomes strong and regular through this process.

Discard drugs, as you know from experience they do not cure stomach trouble. Try a common-sense (Nature's) method that does cure. A soothing, healing sensation results instantly.

We know Mull's Anti-Belch Wafers will do this and we want you to know it. This

do this, and we want you to know it. This offer may not appear again.

GOOD FOR 25e.

Send this coupon with your name and address and your druggist's name and 10c. in stamps or silver, and we will supply you a sample free if you have never used Mull's Anti-Belch Wafers, and will also send you a certificate good for 25c. toward the purchase of more Belch Wafers. You will find them invaluable for stomach trouble; cures by absorption. Address MULL'S GRAFE TONIC Co., 328 3d Ave., Rock Island, Ill.

Give Full Address and Write Plainly.

All druggists, 50c. per box, or by mail apon receipt of price. Stamps accepted.

The Highest Bridge.

The highest railroad bridge in the world will be built across the top of the famous Royal Gorge near Canyon City, Cole., and the construction will begin March 1. It will be 200 feet above the present banging bridge of the Denver & Rio Grande Railroad, and from it the great stream will look like a thread of silver. oridge will be for the extension of the electric railway system from Canyon City to Florence and the top of Royal Gorge, and the cost of the bridge will be about \$100,000.

England's Oldest Peer. The only living peer who was a member of the house of lords at the time of Queen Victoria's accession is Lord Nelson. He succeeded to the earldom in 1835. Lord Nelson is not direct descendant of the hero of Tarfalgar, but is only collaterally descended from Horatio Nelson's sister Mrs. Bolton. He enjoys a good estate and a pension of £5,000 granted to the first Lord Nelson and his Chinese Cavalry.

In describing the Chinese cavalry,

a correspondent asserts that horses in finer condition do not exist in any army in the world. He says that the Chinese is a born horseman, who has nothing to learn from Europe or America in the handling of horses, though he is ignorant of veterinary

Three States Beat Germany. Germany's present railway mileage is reported at 24,183. The mileage in

the United States is nearing the 220, 000 mark. In three states, Illinois Texas and Pennsylvania, the railway mileage is about equal to that in Germany. The lead would be greatly increased by including the tion lines.-St. Louis Globe-Demo-

## Women in Our Hospitals

Appalling Increases in the Number of Operations Performed Each Year-How Women May Avoid Them.

Going through the hospitals in our large cities one is surprised to find such a large proportion of the patients lying on those snow-white beds women and girls, who are either awaiting or recovering from serious operations. Why should this be the case? Sim-

or recovering from serious operations.

Why should this be the case? Simply because they have neglected themselves. Female troubles are certainly on the increase among the women of this country—they creep upon them unawares, but every one of those patients in the hospital beds had plenty of warning in that bearing-down feeling, pain at leftor right of the abdomen.

Chicago, Ind., writes:

Dear Mrs. Pinkham:—

"I have been a great sufferer with irregular periods and female trouble, and about three months ago the doctor, after using the X-Ray on me, said I had an abcess and would have to have an operation. My mother wanted me to try Lydia E. Pinkham:—Vegetable Compound as a last resort, and it not only saved me from an operation but made me entirely well." of warning in that bearing down feel-ing, pain at leftor right of the abdomen, nervous exhaustion, pain in the small of the back, dizziness, flatulency, disof the back, dizziness, flatulency, displacements of the organs or irregularities. All of these symptoms are indications of an unhealthy condition of the female organs, and if not heeded the penalty has to be paid by a dangerous operation. When these symptoms manifest themselves, do not drag along until you are obliged to go to the hospital and submit to an operation—but remember that Lydia E. Pinkham's Vegetable Compound has saved thousands of women from surgical operations.

When women are troubled with irregular suppressed or painful periods, weakness, displacement or ulceration of the organs, that bearing-down feeling, inflammation, backache, bloating

Street, Chattanooga, Tenn, writes:

"Three years ago life looked dark to ma. I had ulceration and inflammation of the female organs and was in a serious condition. "My health was completely broken down and the doctor told me that if I was not operated upon I would die within six months. I told him I would have no operation but would try Lydia E. Pinkham's Vegetable Compound. He tried to influence me against it but I sent for the medicine that same day and began to use it faithfully. Within five days I felt relief but was not entirely cured until I used it for some time.

"Your medicine is certainly fine. I have induced several friends and neighbors to take it and I know more than a dozen who had female troubles and who to-day are as well and strong as I am from using your Vegetable Compound."

Lydia E. Pinkham:—

"Three years ago life looked dark to ma. Three years ago life looked dark to ma.

regular, suppressed or painful periods, weakness, displacement or ulceration of the organs, that bearing down feel-ing, inflammation, backache, bloating (or flatulency), general debility, indigestion, and nervous prostration, or are beset with such symptoms as dizziness, lassitude, excitability, irritability, nervousness, sleeplessness, melancholy, Lydia E. Pinkham, invites all sick wo-"all-gone" and "want-to-be-left-men to write her for advice. Her advice there is one tried and true remedy.

The following letters cannot fail to bring hope to despairing women.

Miss Ruby Mushrush, of East

Street, Chattanooga, Tenn., writes :

Lydia E. Pinkham's Vegetable Compound at once removes such troubles.
Refuse to buy any other medicine, for
you need the best,
Mrs. Pinkham, daughter in-law of

feelings, they should remember and medicine have restored thousands to health. Address, Lynn, Mass. Lydia E. Pinkham's Vegetable Compound Succeeds Where Others Fall.
