## REMEMBRANCE.

- wind-awept moor, and fair pale akles, theep on the hills' soft breast. thatch roofed house beyond the trees, dome that my heart loved best.
- "Tis baif a century ago!
  Would gold such peace could bay.
  The little lad upon the moor,
  The lark that sang on high.

## The Pulchritudonium.

suppose you do not know what pulchritudenium is. Nor did I until quite recently; but I am better informed now, and, indeed, am quite an authority on the instrument-or implement? It was Delia's inquisitive mind that effected my instruction. Delia reads the newspapers, after a fashion -I should say, after the fashions. And the part of the paper on which her attention and interest are concentrated contains suitable advertisements to catch the unwary eye, Here it was that she came upon this pulchritudonfum. The pulchritudonium beautifies you; it renders you (according to advertisement) proof against increasing years. It keeps the figure fine and the complexion fresh; and it only needs using for ten minutes every day. Also it only costs-but that is of no consequence, save that it started the pulchritudonium between Delia and my-

"I suppose you couldn't let me have a small sum on my week's check?" inquired Delia affably.

I said I thought it might be managed, and thinking a certain interestedness might be expected of me, asked

"Oh, I don't know," said Delia cas-"I thought perhaps 1 might mally. buy-Edward, how do you pronounce pulchritudonium?" She spelled it out from her paper with pains, but I had forgotten what the first part was before we reached the end. However, at last we got at it.

"It seems a wonderful thing," she remarked, in a disinterested tone of

"What, may I ask, is this wonderful thing?" I inquired, seeing that I was expected to do so.

At that, Delia, having achieved her introduction, began to talk glibly and with enthusiasm.

"You see, dear, it's on scientific principles, just discovered, and it develops you all over just properly, and no more. It gets rid of all superfluous fat, you know and makes you a perfect figure, besides sending blood through the body and maintaining a perfect complexion by means of circulation. Oh, here it is. This is what it says." She had been hastily turning over the paper in search of the advertisement, and she now began to read impressively. "Beauty and symmetry are dependent upon the proper adjustment of the internal and external forces in an organism. If this adjustment be obtained, beauty naturally follows. In the case of the human being, nature has so arranged It that a nice balance between the muscles, nerves and ligaments' "-De-Ha stumbled over that-" 'of the body secures the desired effect. This is obtained by suitable exercise, and this

need despair of acquiring grace and lissomeness if she will systemmatically use the pulchritudonium." Della ceased, and looked at me eagerly. Perhaps it was not a case for frankness, but I distrusted that show

of false science. "I do not think it would be any use

at all." I said.

Delia put down the paper suddenly, and rose. "I see," she said coldly. "You don't mind my growing fat. You would like me to grow stout and lose my figure.

I explained that I was only questioning the adequacy of the pulchritudon-1um to permit such a thing; at which she relaxed.

"But ever so many people have used 1t, and testify to its advantages," she protested. "There's a whole list of

There always will be geese for quacks," I said, adding "I mean ducks,

haven't the faintest idea what you iean," said Delia loftily, "and I that that cynical way you've got s simply beastly. I suppose you it's becoming, but it isn't. It's vulgar."

'All right," said I, cheerfully. "If you think the pulch?what's-it's-name will make you more becoming, by all

eans have it." Now I had conceded the point, and Delia had got what she wanted; and she ought to have been satisfied. But she was not. She did not even thank

"You used to admire me once," she said, after a pause.

"I know I did, my dear," I lightly. "Why shouldn't 1?"

"Of course," she said rather warmly, "if you think I'm not becoming, and that I'm getting too stout, please say so at once, and let me know. I always like to know the truth, however

unpleasant. "Great Scot!" I protested at this remarkable instance of feminine perversity. "You wanted the thing for that very reason, and I said you could have

"I didn't like your tone," said Della, face to face with her own inconsistency, and somewhat primly she left | Congress at Rome next April.

the room, still without a word

However, she bought the pulchritudonlum, and it began at once to figure in our lives. It was for use before breakfast, and it had to be nailed to a wall. Delia had it nailed to ber bedroom door, where she was using it, it resisted the efforts of any of her family to enter. It consisted of cords and pieces of wood to hold by, and when Delia was at work in her airy morning costume she looked like a dangerous Amazon. She stood upright with a set expression on her face, then suddenly plunged out at you with ferocity, stopped, made a sally in another direction, recovered herself, and then dived for her toes. It was an interesting but alarming performance.

The first time she went through it in strict privacy, but after one or two trials she got confidence, and invited me to witness it. It was unfortunate that the nails should have given on that particular occasion, because it was, as I have said, interesting, and I should like to have seen more of it. But Delia was so strenuous and flerce that they did give, and she went into the cold tub which she had already used some time before.

As I picked her out I comforted her with the thought that it was a good thing she had not been fully dressed, but she was very cross, and seemed to think it was my fault.

"You ought to have tested them," she told me, as she wrung out her garments: and when I asked if she were going to resume she called me horrid, and told me to go.

Nothing daunted, Della went on with her exercises next morning, (the nails having been replaced), but I was not admitted. From time to time all that week I heard the door of her room going, as it creaked and rattled and groaned behind her exertions. Once in passing on the landing I gathered that our rather deaf cook, mistaking the groaning, no doubt for a permissable answer to her knock, had opened the door and caused a mishap. I heard Delia's voice crossly. "The door-my leg," and on that cook's "Yes'm, the leg has just come.

On another occasion the shrill screams of our pug summoned me in hot haste and some anxiety to the up per regions, when I found he had been indistrectly curious enough to venture too close to his mistress in the abandon of her exercitations. The result was a severe blow on what

ought to have been his nose. But the work was kept up with ruthless conscientiousness, and at the end of a fortnight I was once more called in; not this time to watch, but to report on results. It was at once obvious to me that reports were ex pected to be favorable,

"Do you know, Edward, that my waist is distinctly smaller?" I was told triumphantly. "My dress is quite

I did not see the object of having a loose dress, but I didn't dare to say 80. "Feel my muscles," she urged, I felt her beautifully rounded arm, but frankly I did not feel for muscles. Don't you think they've improved?' she asked, observing them critically.

"Much," said I, in a cowardly man-

ner. She cast a glance of suspicion at me, but my face was very serious. "Much!" she repeated coldly, "I sup-

pose you thought me skinny before." "Oh, dear no," said I hastily, "I thought you were perfection."

She looked mollified "Then I could not have improved much," she re marked.

"Well, a little is a lot in the case of beauty," I explained.

She was still contemplating herself is the purpose for which the pulchriin the glass. "I can distinctly see tudonium was designed. No woman signs of Improvement," she said, "You see, as they say in the advertisement, it fills you out where you ought to be filled, and it takes you down where you oughtn't to be filled out."

"Yes, it's a wonderful thing," agreed. "Where do you think it's affected me

most?" she inquired. "Well, from the necessarily limited nature of my inspection, I am hardly in a position to judge." I said hesitatingly. "But I should hazard a guess that your complexion had improved

"I always had a good complexion, as you ought to know," she remarked de-

"I know," I explained with acidity. "But it's the exercise that gives you color, perhaps."

Delia was silent, thoughtfully. "Do you mean I'm getting blowzy?" she asked anxiously. "I should just hate

to be like a bouncing milkmaid." "There is no danger of that," I assured her; but I left her peering into

the glass. The next morning Delia sought me in my study with a determined expression on her face. "Edward," said she, "I want your honest opinion. "Is the pulchritudonium making my nose red?

I was tired of the pulchritudonium but I was very gentle.

"Well-er-no," I said hesitatingly Delia's chin stiffened. "Please don't stammer like that," she said sharply "I want a plain answer."

"No," I said firmly. She looked at me. "I think I'll give it up,' she said next, rather

abruptly. "Do," said I, eagerly, "Frankly, I don't think it has improved you, be-

it couldn't improve you. A charming smile started on Delia's face. "I'm so glad," she said eagerly. "I'll give it up. I never did believe in it. Besides, I never needed it, did it?"-H. B. Mariott Watson in the

Whole Foot Nothing But Proud Flesh Had to Use Crutches - "Cuticura Remedies Best on Earth."

"In the year 1899 the side of my right foot was cut off from the little toe down to the heel, and the physician who had side of my foot, but with no success. At last my whole foot and way up above my calf was nothing but proud flesh. I suf-fered untold agonies for four years, and tried different physicians and all kinds of ointments. I could walk only with crutches. In two weeks afterwards I saw a change in my limb. Then I began using Cuticura Soap and Cintment often during the day, and kept it up for seven months, when my limb was healed up just the same as if I never had trouble. It is eight months now since I stopped using Cuticura Remedies, the best on God's earth. I am working at the present day, after five years of suffering. The cost of Cuticura Ointment and Soap was only \$6, but the doctors' bills were more like \$600. John M. Lloyd, 718 S. Arch Ave., Al hance, Ohio, June 27, 1905."

\$100 Reward, \$100.

The readers of this paper will be pleased to earn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a con-stitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken intertreatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying
the foundation of the disease, and giving the
patient strength by building up the constitution and assisting nature in doing its work.
The proprietors have so much faith in its
curative powers that they offer One Hundred
Dollars for any case that it fails to cure. Send
for list of testimonials. Address

A world's famine in iron within the

next century is the prediction of

United States Consul General Mason

of Paris, in a report in which he dis-

cusses the subject exhaustively. Mr.

Mason says it is well known that the

high-class ores of the lake district of

America will, at the present rate of

consumption, become exhausted with-

in less than fifty years. The Mesaba

deposits, with the present annual out-

put of 12,000,000 tons, or thereabouts,

will not outlast twenty-five years. It

requires only a simple calculation to

demonstrate that a continued yearly

consumption of 35,000,000 tons of ore

by the iron and steel industries of

the United States, will, within the

lifetime of persons now living, eat

away entirely the 1,100,000,000 tons

which, according to the report of

Swedish experts, constitute this coun-

try's entire workable supply as at

present known. Mr. Mason holds that

there is but one remedy, and that is

for American iron masters to secure

by all practical means the largest

possible supply of ore from other
