

A LADY WITH MONEY.

Oh, it is funny, how Mrs. Honey, With all her money, still knows no joy; With all her treasure, and all her leisure, She hunts for pleasure, but Fate is coy. With dollars piling, she's ever craving, And even raving, she longs for peace; Her joys are bubbles, her discords doubles, And all her troubles they e'er increase.

Though highly scented, she's discontented, And high demented, and always cross; She's always scowling, and ever growling, And even howling;—too bad, of course; But what are sables, and laden tables, And jeweled cables, and boundless wealth.

To sad conditions, had dispositions, And old physicians, and wretched health? Her head is aching, her heart is breaking, All drugs she's taking, but no avail; For all her lotions, and all her potions, And patent notions, they can't fail.

Her heart needs lightness, her mind needs brightness, Her ways politeness, I have to tell, For incidentally, all's mental, Were she more gentle—she would be well.

—The Angel, in Town Topics.

HIGHER AND HIGHER

(A Short Story)

It was 10 o'clock on a midsummer day, and the sunlight cast great golden splashes on the disturbed, fouled dust of the arena. The tiers of seats, too, rising up and up, looked woefully deserted and bare, and the canvas sides and roof, as they flapped and belled in the wind, stood out hideously black and soiled in the searching light.

Lubin and Babette were dressed as angels or fairies and were waiting with childish impatience to rehearse their ascending feat. They wore little wings to their backs, and Lubin carried a quiver of arrows slung on his shoulders, such as Cupid wears. A couple of workmen adjusted the wires that should convey them through the great slit in the roof, down which at night the limelight was to penetrate, and the ringmaster rubbed his hands in a satisfied way and condescended to laugh with his subordinates, because he knew perfectly well that he had an excellent effect in preparation that should delight and astonish his patrons.

Lubin was a stout boy of nine. His heart beat high at the thought of his ascent, and, though probably entertaining some misgivings, he assumed a stolid front and smiled bravely, tapping his little pink legs in the most casual manner with his gilt bow.

Babette was only six. She had golden hair dressed like the halos one sees around the heads of saints, and her eyes were humid and timid as a doe's, and her limbs slender and fragile, and easily bruised or broken. She had no mother to stand by and comfort her; but Lubin, who had vowed his love for her, placed one arm around her waist and said:

"See, Babette, we shall rise up toward the sky, like angels in the pictures; and the people will clap their hands and shout! And they will throw us sweetmeats, and the ringmaster will take you in his arms afterward and kiss you, and not use the whip, for you and I will bring him much money by our flying."

"Yes, Lubin," answered Babette, shivering, "but it is a long way up to the roof, and the wires may break."

"Not a bit of it," retorted Lubin stoutly. "See, I will go up first, and then you will feel sure."

The wires were held in readiness. "Now, then, youngsters," said the ringmaster, "up you go! Ha, ha, ha! This shall be a surprise!" Lubin stepped boldly forward, and the hooks on the wires were fastened to a belt concealed in the folds of his trunks. Then the men above pulled, and he sailed gracefully upward; his little pink legs posed elegantly, his arms held forward, and his wings fluttering as if he really flew, so naturally and prettily that the manager and those below cried out, "Fine! This is indeed fairy-like!"

When he was within three feet of the roof, the ringmaster clapped his hands, and down he came, and, being unfastened, was sent off to dress himself, with a pat on his head and a penny.

"Now, Babette," said they, "you come and try."

Babette was nervous, but fearing the whip more than the fall, submitted quietly enough. Up, up, up, until she passed through the slit in the roof and was basking in the real sunshine outside.

"Excellent, excellent!" shouted the manager. When Babette descended she was rewarded with two pats on the head and two pennies. She rushed to tell the news to Lubin. "I can fly higher than you, Lubin," she said exultantly. "I went right through the slit in the roof, and Monsieur Claude gave me two pennies, and I am not a bit afraid." And she clapped her hands and danced around her child lover in great glee.

"Bravo, Babette!" cried Lubin proudly. "I told you there was nothing to fear."

"Ah! Lubin," she laughed, "I can fly higher than you—I can fly much higher than you."

Then she kissed him, and he kissed her, not in the least envious, and they went out and shared their three pennies in chocolates.

Night came, and the circus was full. The two children eagerly and joyfully looked forward to the limelight ascent that was to conclude the fairy ballet. They danced in the chor-

us, and then as a hundred other children were whirling round them, they took their places in the centre of the arena, while the lines were dropped from the slit in the roof, through which the limelight flashed. The band played something dreamy, the crowds of fairies parted, and Lubin commenced to ascend amidst the plaudits of the audience.

How handsome he looked with his smiling face and gracefully posed limbs! The people were delighted. Babette was delighted. She called out in spite of herself: "Oh, Lubin, I can fly higher than that!" Then he disappeared through the slit in the roof and already her little legs were ten feet from the ground.

Up, up, up she went. The crowd cheered, and she smiled and bowed and waved her baby arms, while her heart seemed too big for her body to hold it.

"I'm coming, Lubin," she shouted, as she neared the slit in the roof, and saw the face of her little sweetheart looking down and smiling and proud of her. "But I flew higher than you this morning, dear, and—"

Snap! The wires had broken. Crash! A little bundle of quivering humanity and bloodstained gauze lay throbbing in the dust of the arena.

The ringmaster and his attendants crowded around her. He tried to lift her, but she screamed out, and somebody said, "Let her be! Let her be! You can't mend her!"

Then the pale-faced public went away. Lubin was by her side, crying over his little sweetheart. He laid his hand near her; he would not touch her for fear of causing her pain. She turned her eyes toward him.

"I didn't fly so high as you tonight, dear Lubin," she whispered, "but I'll try and do better next time." Then she fell asleep.—Miriam Hughes, in Spokane Spokesman.

SHOOS BEARS WITH LANTERNS.

Wily West Virginian Protects Sheep by Hanging Out Lights.

In the Williams River country of West Virginia the bears are greatly on the increase. There is a blue grass settlement about the extreme head of the river, says Recreation, which has all but been driven out of the sheep business by bears.

On the Black Mountain run one man claimed to have identified the signs of 117 bears in one day's hunt. That seems a good many bears, but I have hunted and fished so long and told about my adventures at so many camps that I cannot consistently deny anything.

Nevertheless, every now and then a hunter runs upon a bear and kills it. Premeditated killing of bears is rarely known, as this wisest of the forest animals knows well how to avoid men. A rabbit is courageous compared to a black bear. This shows the superior intelligence of Bruin.

A t twenty years ago an unarmed fisherman killed a bear with a large stone at the Red Hole. He was resting at the top of a precipitous bank of Mauch Chunk shale when a bear, chased by dogs, came into the river and passed at the foot of the bank. The man cast a large stone down upon it and stunned it so that he was able to kill it. It was a two-year-old. The occurrence is well authenticated.

The sheep killers are generally the biggest bears of them all and are very wise. They never enter a field without first making a complete circuit to see if a man has crossed the fence. If he has they withdraw. One sheep raiser found that hanging a half dozen lighted lanterns about his farm caused the bears to leave his flock severely alone.

New Source of Starch. In a bulletin of the Jamaica Department of Agriculture H. H. Cousins, the Government chemist, states that the high percentage of starch in the cassava makes the latter more valuable than the potato as a source of this substance. The cassava is also not subject to the fungoid diseases prevalent in the German potato fields, from which a large proportion of the starch now sold in Great Britain is derived. The cassava season is unrestricted, and this gives a further important advantage over the one-crop-a-year potato. Mr. Cousins apparently believes that the manufacture of starch from the cassava can be done so cheaply that the German potato starch will be driven from the English market.—Argus.

Fountain Pens. Ten years ago or such a matter a first-class fountain pen cost from \$6 to \$7.70. I do not care to say how many billion vests and shirts were spoiled by their use; but I do care to say that just about nearly everybody who despised a fountain pen before is using one. It shows us to be a wonderfully progressive nation of inventors that a fountain pen, the nib of fourteen carat gold, can be given as a cromo with one year's subscription to a \$1.50 magazine. And the blamed thing will write!—New York Press.

This Beats Solomon's Widows. They say there is nothing new. How is this: A man from the country approached a Globe reporter to-day, and said: "I wish you would say a woman in our neighborhood is grieving so much over her husband, who died last April, that the neighbors are tired of it."—Aitchison Globe.

A man of eighty, elected by a judge for Frutigen, Switzerland, is to go through a university course in order to enable him to pass the examinations required by law.

Official--Reynoldsville.

(NO. 110.)

AN ORDINANCE establishing the grade of the side or footwalk on both sides of Jackson street, from east side of First street, where the same crosses said Jackson street on the west to where said Jackson street crosses the R. & F. C. R. R. on the east. Also fixing the material for the construction of said side or foot walks when laid, relaid or repaired, and fixing the width of same.

Sec. 1. Be it ordained and enacted by the town council of the borough of Reynoldsville, and it is hereby ordained and enacted by authority of the same, that the grade for the side or footwalks on the north and south sides of Jackson street, from the east side of First street where the same crosses Jackson street on the west to where said Jackson street crosses the R. & F. C. R. R. on the east, be, and the same is hereby established as follows:

NORTH SIDEWALK GRADE.

Beginning at the northeast corner of First and Jackson streets (at an elevation of 88.25 feet, same being reduced from base mark top of step First National Bank), thence along Jackson street 351 feet to east side of Second street, level, thence from east side of Second street 309 feet, at a rising grade of 66-100 per cent, thence to west side of Pine Alley, 85 feet, at a rising grade of 2 per cent, thence 63 feet at a rising grade of 6.35-100 per cent, thence 50 feet at a rising grade of 6 per cent, thence 50 feet at a falling grade of 40-100 per cent, thence 58 feet to west side of Fourth street at a falling grade of 3.35-100 per cent, thence across Fourth street, 40 feet, at a rising grade of 82-100 per cent, thence from east side of Fourth street to centre of Swamp Alley 308 feet, at a rising grade of .06-100 per cent, thence 310 feet to west side of Fifth street, at a falling grade of 62-100 per cent, thence across Fifth street 50 feet, level, thence from east side of Fifth street, 670 feet, to east side of Sixth street, at a rising grade of 25-100 per cent, thence from east side of Sixth street, 312 feet to west side of Seventh street at a rising grade of 1.84-100 per cent, thence across Seventh street 40 feet, at a rising grade of 1.60-100 per cent, thence from east side of Seventh street, 161 feet, at a rising grade of 1.91-100 per cent, thence to west side of Eighth street, 352 feet, at a rising grade of 1.86-100 per cent, thence across Eighth street 50 feet, level, thence from east side of Eighth street to east side of Bradford street 370 feet, at a falling grade of 47-100 per cent, thence to west side of Tenth street, 683.5 feet at a falling grade of 1.65-100 per cent, thence across Tenth street 33 feet, at a falling grade of 1.42-100 per cent, thence from east side of Tenth street, 240 feet, level, thence 133 feet, at a falling grade of 7.57-100 per cent, thence 75 feet level.

SOUTH SIDEWALK GRADE.

Beginning at the south-east corner of First and Jackson streets, at same elevation as north side walk, and continuing along south side at same grade and distances as for north side walk to first station west from Fourth street, thence to west side of Fourth street 58 feet at a falling grade of 3.65-100 per cent, thence across Fourth street, 40 feet at a rising grade of 22-100 per cent, thence from east side of Fourth street, 177 feet at a rising grade of 96-100 per cent, thence 66 feet at a rising grade of 63-100 per cent, thence 68 feet to center of Swamp Alley at a falling grade of 52-100 per cent, thence to center of Fifth street 335 feet, at a falling grade of 1.42-100 per cent, thence to Sixth street, 649 feet, at a rising grade of 28-100 per cent, thence to west side of Seventh street 343 feet, at a rising grade of 1.72-100 per cent, thence across Seventh street 40 feet at a rising grade of 1.38-100 per cent, thence from east side of Seventh street to west side of Eighth street, 513 feet, at a rising grade of 1.56-100 per cent, thence across Eighth street 50 feet level, thence to east side of Bradford street 378.5 feet at a falling grade of 39-100 per cent, thence 187 feet at a falling grade of 86-100 per cent, thence 394 feet at a falling grade of 1.70-100 per cent, thence to west side of Tenth street, 102.5 feet at a falling grade of 3.02-100 per cent, thence across Tenth street 33 feet, at a falling grade of 2.42-100 per cent, thence 206 feet at a falling grade of 1.50-100 per cent, thence 173 feet at a falling grade of 2.93-100 per cent, to R. & F. C. R. R.

Sec. 2. The width of the grade for said side or foot walks is to begin at property line and be five feet wide, and to be in conformity with the grade as established in section 1 of this ordinance, by John C. Hirst.

Sec. 3. That whenever hereafter any sidewalk shall be laid, relaid or repaired on the north or south sides of Jackson street described in section 1 of this ordinance, the same shall be constructed only of brick, concrete or sawed flag stone.

Sec. 4. That so much of any ordinance that may conflict with or be supplied by the foregoing, be, and the same is hereby repealed.

Ordained and enacted into a law in council this 3rd day of July, A. D. 1906. J. B. NEALE, President of Council.

Attest: L. J. McENTIRE, Clerk of Council.

July 20th, 1906, the above ordinance examined and approved. L. L. GOURLEY, Chief Burgess.

(NO. 111.)

AN ORDINANCE establishing the grade of the side or footwalks on both sides of Tenth street, from the north end of the Tenth street bridge to the south side of Grant street, where said Grant street crosses said Tenth street on the south. Also fixing the material to be used in the construction of said side or footwalks when laid, relaid or repaired.

Sec. 1. Be it ordained and enacted by the town council of the borough of Reynoldsville, and it is hereby ordained and enacted by authority of the same, that the grade for the side or foot walks, on the east and west sides of Tenth street, from the north end of the Tenth street bridge to the south side of Grant street, where said Grant street crosses said Tenth street on the south, be and the same is hereby established as follows:

EAST SIDEWALK GRADE.

Beginning at the north end of Tenth street bridge, at an elevation of 89.70 feet; thence along Tenth street to south

side of Worth street, 100 feet at a falling grade of 1.34-100 per cent; thence to north side of Worth street, 50 feet, at a rising grade of 1 per cent; thence to north side of Deltz alley at a rising grade of 1.6-100; thence continuing along Tenth street 100 feet at a rising grade of 4.21-100 per cent; thence to south side of Jackson street, 50 feet, at a rising grade of 5.41-100 per cent; thence across Jackson street 50 feet, at a rising grade of 6.12-100 per cent; thence continuing same line 100 feet at a rising grade of 5.49-100 per cent; thence 50 feet at a rising grade of 8.92-100 per cent; thence 50 feet, at a rising grade of 11.54-100 per cent; thence to south side of Main street, 100 feet at a rising grade of 12.61-100 per cent; thence across Main street, 60 feet, at a rising grade of 7.52-100 per cent; thence on same line, 100 feet, at a rising grade of 10.1-100 per cent; thence 100 feet, at a rising grade of 10.84-100 per cent; thence to south side of Grant street, 120 feet, at a rising grade of 15.8-100 per cent; making a total distance of 1,200 feet; with a total rise of 86.5-100 feet; and an average grade of 7.17-100 per cent.

WEST SIDEWALK GRADE.

Beginning at the north end of Tenth street bridge, at an elevation of 89.19-100 feet; thence along Tenth street to south side of Worth street, 100 feet, at a falling grade of 1.34-100 per cent; thence to north side of Worth street, 50 feet, at a rising grade of 1 per cent; thence to north side of Deltz alley at a rising grade of 1.6-100 per cent; thence continuing along Tenth street, 100 feet, at a rising grade of 4.21-100 per cent; thence to south side of Jackson street, 50 feet, at a rising grade of 5.41-100 per cent; thence across Jackson street, 50 feet, at a rising grade of 6.12-100 per cent; thence continuing same line, 100 feet, at a rising grade of 5.49-100 per cent; thence 50 feet, at a rising grade of 8.92-100 per cent; thence 50 feet, at a rising grade of 11.54-100 per cent; thence to south side of Main street, 100 feet, at a rising grade of 12.61-100 per cent; thence across Main street, 60 feet, at a rising grade of 7.52-100 per cent; thence on same line, 100 feet, at a rising grade of 10.1-100 per cent; thence 100 feet, at a rising grade of 10.84-100 per cent; thence to south side of Grant street, 120 feet, at a rising grade of 15.8-100 per cent. Making a total distance of 1200 feet; with a total rise of 86.5-100 feet; and an average grade of 7.17-100 per cent, as shown by grade map of John C. Hirst, which is made a part hereof.

Sec. 2. The width of the grade for said side or footwalks is to be the same as heretofore established by ordinance for the width of side or footwalks on said part of Tenth street, viz: (four feet wide) and in conformity with the grade as established in section 1 of this ordinance by John C. Hirst.

Sec. 3. That whenever hereafter any sidewalk shall be laid, relaid or repaired on the east and west sides of Tenth street described in section 1 of this ordinance, the same shall be constructed only of brick, concrete or sawed flag stone.

Sec. 4. That so much of any ordinance that may conflict with or be supplied by the foregoing, be, and the same is hereby repealed.

Ordained and enacted into a law in council this 3rd day of July, A. D. 1906. J. B. NEALE, President of Council.

Attest: L. J. McENTIRE, Clerk of Council.

July 20th, 1906, the above ordinance examined and approved. L. L. GOURLEY, Chief Burgess.

(NO. 112.)

AN ORDINANCE establishing the grade of the side or footwalks on both sides of Worth street from Tenth street on the west, to the borough line on the east. Also fixing the materials to be used in the construction of said side or footwalks when laid, relaid or repaired, and fixing the width thereof.

Sec. 1. Be it ordained and enacted by the town council of the borough of Reynoldsville, and it is hereby ordained and enacted by authority of the same, that the grade for the side or footwalks on the north and south sides of Worth street from Tenth street, where the same crosses Worth street on the west, to the borough line on the east, be, and the same is hereby established as follows:

NORTH SIDE OR FOOTWALK GRADE. Beginning at north-east corner of Tenth and Worth streets, at an elevation of 88.35-100 feet, same being elevation of Tenth street sidewalk at that point; thence east along Worth street, 330 feet to Soldier Run, at a rising grade of 22 per cent; thence across Soldier Run, 60 feet, at a rising grade of 3.08-100 per cent; thence 340 feet to centre of alley, at a rising grade of 4.20-100 per cent; thence to west side of Eleventh street, 100 feet, at a rising grade of 2.84-100; thence across Eleventh street, 40 feet, level; thence from east side Eleventh street, 141 feet, at a rising grade of 62-100 per cent; thence to west side of Thirteenth street, 596 feet, at a falling grade of 1.25-100 per cent; thence to west side of Fourteenth street, 351 feet, at a rising grade of 55-100 per cent; thence to centre of Fifteenth street, 319 feet, at a rising grade of 1.03-100 per cent; thence to borough line, 460 feet, at a rising grade of 7.2-100 per cent.

SOUTH SIDE OR FOOTWALK GRADE. Beginning at the south-east corner of Tenth and Worth streets, at an elevation of 87.85-100 feet, same being elevation of Tenth street sidewalk at that point; thence east along Worth street, 297 feet, to Soldier Run, at a rising grade of 42-100 per cent; thence across Soldier Run, 60 feet, at a rising grade of 3.08-100 per cent; thence to centre of alley, 340 feet, at a rising grade of 4.79-100 per cent; thence to west side of Eleventh street, 100 feet at a rising grade of 2.84-100 per cent; thence across Eleventh street, 40 feet, level; thence from east side Eleventh street, 141 feet, at a rising grade of 62-100 per cent; thence to west side of Thirteenth street, 596 feet, at a falling grade of 1.25-100 per cent; thence to west side of Fourteenth street, 351 feet, at a rising grade of 55-100 per cent; thence to centre of Fifteenth street, 319 feet, at a rising grade of 1.03-100 per cent; thence to borough line, 460 feet, at a rising grade of 5.0-100 per cent, as shown by grade map of John C. Hirst, which is made part hereof.

Sec. 2. The width for the grade for

said side of foot walks is to begin at property line and be five feet (5 ft.) wide and in conformity with the grade as established in Section 1 of this ordinance, by John C. Hirst.

Sec. 3. That whenever hereafter any sidewalk shall be laid, relaid or repaired on the north and south sides of Worth street described in section 1 of this ordinance, the same shall be constructed of brick, concrete or sawed flag stone.

Sec. 4. That so much of any ordinance that may conflict with or be supplied by the foregoing, be, and the same is hereby repealed.

Ordained and enacted into a law in council this 3rd day of July, A. D. 1906. J. B. NEALE, President of Council.

Attest: L. J. McENTIRE, Clerk of Council.

July 20th, 1906, the above ordinance examined and approved. L. L. GOURLEY, Chief Burgess.

(NO. 113.)

AN ORDINANCE establishing the grade of the side or footwalks on the east side of First street from Main street to Grant street. Also fixing the materials to be used in the construction of said side or foot walks when laid, relaid or relaid.

Section 1. Be it ordained and enacted by the town council of the borough of Reynoldsville, and it is hereby ordained and enacted by authority of the same, that the grade for the side or foot walks on the east side of First street from the north side of Main street, where said street crosses said First street on the south, to the south side of Grant street where the same crosses said First street on the north, be, and the same is hereby established as follows:

EAST SIDE OR FOOT WALK GRADE. Beginning at stone curb, (elevation 20.25 feet) at northeast corner Main and First streets; thence along First street 100 feet, at a rising grade of 5-10 per cent; thence 164 feet, to southeast corner of Grant and First streets (elevation 95.00 feet) at a rising grade of 1.67 per cent, as shown by grade map of John C. Hirst, which is made a part hereof.

Section 2. The width for the grade for said side or foot walks is to begin at property line and be five feet (5 feet) wide and in conformity with the grade as established in section 1 of this ordinance, by John C. Hirst.

Section 3. That whenever hereafter any sidewalk shall be laid, relaid or repaired on the east side of First street, described in section 1 of this ordinance, the same shall be constructed only of brick, concrete or sawed flag stone.

Section 4. That so much of any ordinance that may conflict with or be supplied by the foregoing, be, and the same is hereby repealed.

Ordained and enacted into a law in council this 3rd day of July, A. D. 1906. J. B. NEALE, President of Council.

Attest: L. J. McENTIRE, Clerk of Council.

July 20th, 1906, the above ordinance examined and approved. L. L. GOURLEY, Chief Burgess.

HOUSEHOLD HINTS.

Always slice your onions and cucumbers two or three hours before you put them into a salad and let them lie in cold water.

Turpentine will remove tar from any kind of fabric.

Always wash the dishcloth thoroughly and hang in the sunshine to dry after each using.

Handkerchiefs will have a faint scent of violets if a small piece oforris root is put in the water in which they are boiled.

When roasting or baking meat in the oven place the dripping pan on a dish of water to prevent the gray burning or holling away.

Chocolate and cocoa stains can be removed by washing the fabric with soap in tepid water.

If clothes are hung on the line neatly and smoothly much labor will be saved when the time for ironing comes.

A tablespoonful of paraffin added to each three gallons of water when boiling white clothes will help to remove the stains.

Have handy a stone or steel for sharpening knives and keep the knives in good condition. Good tools make rapid work.

If eggs are to be boiled hard, have the water boiling when the eggs are put in it. This will prevent the yolks turning dark.

Add a pinch of salt to cream before whipping and whip it in a pitcher, as it will whip more quickly than in a bowl.

People with poor digestion should drink no water with meals, but take a glassful half an hour before, and drink plentifully an hour or so after each meal.

A child's school lunch basket can be kept sweet and clean by dipping it first into hot salt water, then into cold water about once a month. Dry quickly by the fire or in the sunshine.

A little milk added to the water in which silver is washed will help to keep it bright.

Hold a piece of white cloth back of the eye of a needle and see how quickly the thread will go through.

PENNSYLVANIA RAILROAD.

SCHEDULE IN EFFECT MAY 27, 1906.

TRAINS LEAVE REYNOLDSVILLE: For New Bethlehem, Red Bank, and principal intermediate stations, Oil City and Pittsburg, 6:30, 8:30 a. m., 1:29, 5:07, 7:58 (New Bethlehem only) p. m. week-days. Sundays 6:30 a. m., 4:20 p. m. For DuBois, Driftwood, and principal intermediate stations, Harrisburg, Philadelphia Baltimore and Washington, 6:29 a. m., 12:22, 6:25 p. m. week-days. Sundays 12:50 p. m. For DuBois only 11:45 a. m. week-days; 5:15 p. m. daily. J. B. WOOD, Passenger Traffic Mgr. W. W. ATTERBURY, Gen. Manager. Geo. W. BOYD, General Passenger Agent.

BUSINESS CARDERS.
