

NEW IDEAS in TOILETTES

New York City.—Unquestionably the Eton is the favorite coat of the season. Here is one that is jaunty in the extreme and that is combined with a shapely and well fitting skirt. In the illustration it is made of chiffon voile with the collar and cuffs

of silk and trimming of banding and little frills of Valenciennes lace, but its usefulness is almost without limit. It can be made from any reasonable suiting, linen or silk, as well as wool, while again it makes a most satisfactory separate wrap of taffeta, pongee and the like. The collar and cuffs can be of lace, of the material trimmed, of silk, or indeed, can be treated in almost any way that fancy may dictate.

The Eton is made with fronts, side-fronts and back. Both the fronts and back are laid in pleats that extend

Separate Coat Effect.

The jaunty little separate coat of color adds a pretty and fashionable touch to the white lingerie gown. The color should be repeated in the hat.

Embroidery For Coats.

Bands of embroidery upon coats and gowns of lace seem like an instance of carrying coats to Newcastle, but such is the furor for embroidery that even this extreme of elaboration is not considered excessive.

Princess Robe Style.

One of the newest of princess robes is arranged at the girdle in alternate plain and shirred sections. Quite a high degree of skill is required to carry out this idea successfully, but the result is delightful.

Breakfast Jacket.

The becoming breakfast jacket always finds a place and this one has much to commend it. The backs are sufficiently fitted to do away with any disagreeable sense of a negligee, and the fronts are loose enough to mean perfect comfort and relaxation. There is a becoming big collar at the neck, and the sleeves can be either in the fashionable three-quarter or full length as may be liked. In this instance the material is a pretty batiste trimmed with embroidered banding and little frills of white linen lawn, but there are so many appropriate ones that the list is almost too long to be given in full. Many washable materials, lawn and similar fabrics, are well liked, while China and India silks are exceedingly fashionable for garments of the sort, and albatross, henrietta and velveting all are correct.

The jacket is made with fronts, backs and side-backs, and is closed by means of buttons and buttonholes worked in the hem. The fronts are gathered at their upper edges and are

for full length, and the outermost pleats at the fronts serve effectually to conceal the seams joining them to the side-fronts. There is a flat collar at the neck, and the sleeves are moderately full, finished with shaped cuffs. The girdle is cut in five portions, the many seams allowing perfect fit.

The quantity of material required for the medium size is four and one-fourth yards twenty-one, three and one-half yards twenty-seven or two yards forty-four inches wide, with one-fourth yard of silk for the collar and twelve and one-half yards of braid to trim as illustrated.

Linen Embroidery.

A linen parasol to match, ornamented with an embroidered monogram in white, and embroidered linen shoes of the same color are desirable accessories with such a frock, says the Philadelphia Telegraph. Linen shoes embroidered in self color are for sale in a majority of the linen shades or can be made to order. Another experimental fancy in footwear, though not so well calculated to win favor, is the shoe of white canvas or linen striped in pin stripes of color and tied with ribbons matching the stripe.

Monogram on the Pocket.

The worked monogram on the pocket of the flannel outing coat is a new touch adopted by the modish young man.

Handmade Laces.

Handmade laces of various kinds are seen combined in curious but artistic effect with embroidery and other kinds of laces.

Arm Garter Substitute.

A substitute for the arm garter is an elastic band sewed to the upper edge of the long glove and finished with frills of lace.

The Clean Chewing Tobacco

Choose the chew that's *made* clean—then *kept* clean from dirt and dust in a waxed wrapper inside a sealed bag that fits flat in your pocket.

Not a scrap of scrap in

SCRAPNO

The Clean Chewing Tobacco

Made entirely of clean, long leaf—soft to bite, easy to chew and always fresh.

A chew for *you*. Three times the usual five cents' worth!

FEMINE NEWS NOTES.

Hottentot women cut off a finger joint when they remarry.

A Russian woman may not enter a university unless she is married.

The favorite hobby of Dr. Elizabeth Garrett Anderson, England's most famous woman physician is gardening.

Miss Maud Wetmore and Miss Margaret Busk won the lawn tennis trophies offered in women's handicap doubles at Newport.

Of the 158,000 women who were employed in agriculture in England, 100,000 farmed their own land and 6700 were engaged as gardeners, florists and seedsmen.

Mrs. Stanford White received \$149,000, payment of the insurance on her husband's life. Sixty-five thousand dollars more insurance that he carried goes to others.

It begins to look as if a representative team of English women would visit this country next year to play in an international lawn tennis tournament for a challenge cup.

Mrs. Eugene Nichols, of East Hampton, Conn., stepped on a big rattlesnake in the yard of her home. The rattler tried to strike her, but Mrs. Nichols killed it with a stone.

The Empress Charlotte, widow of the Emperor Maximilian of Mexico, who was shot as a usurper in 1867, fell while walking at the castle of Bouchout, and dislocated her elbow.

That Mrs. Harry K. Thaw had begun preparations for a divorce suit long before the shooting of White, and that those preparations have been kept up since, was asserted in Pittsburg.

Gabriele Reuter, the distinguished German authoress, was born in 1859, at Alexandria, Egypt, the eldest child of a German merchant, and passed much of her early life in that southern country.

The modern magician comes from the laboratory. He speaks in the name of science, for there is a science of the immaterial—a science of witchcraft—a science which has its professors and learned societies, its journals and magazines. The very ghosts that haunt the societies for psychical research have taken on a scientific air; they walk no more in windy corridors, clanking spectral chains; in a practical, modern way they exhibit themselves to scientific congresses, declares Everybody's Magazine. World over, psychic phenomena are being studied by trained scientists. Dismissing theories, they give themselves to the observation of scientifically established facts. Their labors range from the transmission of psychic forces, to the time-old mysteries of enchantment and apparitions.

Every man is more closely related to his Father above than to his parents here.

PROMINENT PEOPLE.

President Roosevelt will review the Atlantic fleet on September 3 at Oyster Bay.

The death is announced of Jacob Ellachar, chief rabbi of Palestine, at the age of ninety-two.

Brigadier-General Picquart has been assigned to the staff of the Military Governor of Paris.

Representative Towne, of New York, the former Senator from Minnesota, has the best voice in the House.

King Edward of England has a peculiar habit of passing his finger backward and forward under his chin when in meditation.

Bishop Warren A. Chandler, of Atlanta, is about to start for the Orient, to be present at the Methodist conferences in China, Korea and Japan.

Thomas A. Edison has acquired the farm at Milan, Erie County, Ohio, on which he was born and reared, and is going to transform it into a fine country home.

James P. Tallafarro, of Florida, is the only United States Senator from the South who is rated as a millionaire. He made his money in lumber and banking.

Dr. James W. C. Ely, dean of the medical profession in Providence, R. I., has completed sixty years in the practice of medicine. His fellow-practitioners will commemorate that occasion.

President Roosevelt decided to take a hand in the New York State campaign, to make a speech for the organization in Pennsylvania and to run the Congressional campaign in the close States.

Lieutenant-General Baron Kodama, who died in Tokio recently, was considered by many military writers the brain of the Japanese army in the war with Russia, as he was its chief organizer. He was born in 1855.

LENTIL CUTLETS.

Soak one cupful dried lentils all night with a cupful dried lima beans. In the morning drain, add two quarts of water, a stalk of celery and half an onion sliced. Cook until soft, remove the seasonings and rub through a puree sieve. Add one cupful stale bread crumbs, one beaten egg, the juice of a half lemon and seasonings to taste. Melt a heaping tablespoonful of butter in a small saucepan, add to it a tablespoonful flour and pour on, when blended, a third of a cup of milk. Let the mixture cook until thick and smooth then add to the lentil mixture and set aside to cool. Shape into small cutlets, dip in beaten egg, then in fine cracker crumbs and fry a golden brown. Serve with a tomato sauce.

Few men care whether one hand is posted on the good deeds of the other so long as the reporters know all about it.

THE NATIONAL GAME.

Harry Lumley is Brooklyn's only 300 batsman.

George Stone, of St. Louis, leads the American League batsmen.

Hal Chase and Laport use short, heavy bats up to regulation diameter.

Doc White has done the most effective slab duty for the Chicago American team.

Tannehill is the only one of the Boston pitchers who has landed more games than he lost.

Cy Seymour is now using a bat once used by Anson and presented to him by that veteran.

The Buffalo Club has traded catcher Woods to Toronto for pitcher Currie and outfielder White.

Police Prosecutor Austin, of Toledo, said recently: "The police court docket is always small following a Sunday ball game."

With his pitchers coming right Clark Griffith says he does not see how he can be beaten for the American League pennant.

Pitcher Skillen, of Dartmouth, is said to have pledged himself to the Boston American Club if he decides to play professional ball.

Falkenberg's height is six feet five and one-half inches, which enables him to pitch the longest drop ball of any pitcher in the country.

The Providence Club has secured first baseman Lachance from the Montreal Club; and a New England third baseman named Thornell.

Morgan, who is playing third base for the Boston Americans, graduated in law at Georgetown just three days before he donned a Boston uniform.

Deahon, of Cornell, is the only college pitcher who uses the "split ball." In size and general conformation the little Nicaraguan is not unlike Elmer Stricklett, of the Brooklyn.

There can be no excuse for the woman who spends on needless dress the dollar that should be laid up for a rainy day, or who by extravagance drives her husband into bankruptcy or despair; but the number of such women is comparatively very small, says the New York Herald. Taking a broad view of the matter, we must look at results. The naval armaments, costing vast sums become obsolete in a few years, and the money spent on excessive indulgence in drink produces only red noses, incompetent men, while that devoted to dress gives us the tastefully dressed, lovely American woman—a thing of beauty and a joy forever.

Princess Fehim was Margaret Morgan, an American circus rider. Prince Fehim saw her ride, fell in love with her, and married her. He was banished by the Sultan and the Princess was expelled from Turkey.
