### FACTS ABOUT MEXICO.

There are ten volcanoes in Mexico Mexico has a coast line of over 6,000 miles.

Mexico has vast deposits of onyx and

Mexico has fifty-nine lakes and great lagoons.

The area of Mexico is about 750,000 square miles. Cotton factories in Mexico employ

over 25,000 people. The "valley" of Mexico is 7,500 feet above the sea level.

Mexico is about ten times larger than Great Britain.

The traveler in Mexico is seldom out of sight of mountains.

The rainy season generally lasts from May to September. There are probably 300,000 men em-

ployed in the mines of Mexico. Mexico is the richest mineral country in the world, not excepting Peru. The largest state is Chihunhua, with

an area of nearly 90,000 square miles. Quantities of sulphur are mined in the craters of several extinct volcanoes.-Modern Mexico.

Taught Him How to Die. It was after seeing Henry Irving act as Becket that a young Japanese studying theology in this country said to a friend who took him; "I thank you very much for making me remain. You know, I may have to suffer some day for holding to what I believe to be the truth, and I have often thought that I would never be able to play my part in the right way. From now on I shall never be troubled with such a thought, for when the time comes I shall remember that Henry Irving has taught me how to die. Yes, I should like to die like Becket." Thus did Becket in the flesh and Tennyson, the dramatist, and Irving, the actor, nerve the potential Christian martyr that may be .-Boston Transcript.

Social Opinion.

Social opinion is like a sharp knife. There are foolish people who regard it only with terror and dare not touch or meddle with it; there are more foolish people who, in rashness or defiance, seize it by the blade and get cut and mangled for their pains, and there are wise people who grasp it discreetly and holdly by the handle and use it to carve out their own purposes.-Mrs.

Assistant Master's Lot Is Hard.

If you take a scholar and a gentleman and make him do the work of a nursemaid for the wages of a brick layer's laborer, coupled with the treatment of a dog, you then get that finished product of civilization, the assistant master at an English private school.—Barry Pain in Tatler.

An Improbable Story. "The editor looks downcast. What's the matter with him?"

"He received a letter yesterday informing him of a big legacy, and in the rush he replied, 'Declined with

THE FATE OF NATIONS.

The Power and the Tragle Ending of Henrietta Stuart and Mme. de Pompadour-Louisa of Prussia, Who Wen Silesia From Napoleon.

women who have influenced history. been lighted up by some fair face that

Antony was not the last politician whose course was influenced by beauty. Think of the beautiful Louisa of Prussia jesting with Napoleon for a kingdom. "I knew that I was to see the most beautiful queen in existence." said Napoleon to Talleyrand after a banquet given in her honor, "but I have found the most beautiful queen and at the same time the most interesting woman in the world." And Louisa had won from him the restoration

It is said, indeed, that she laughingly offered him a rose in exchange for the fortress of Magdeburg, but Napoleon was one of the iron men of the world He kept the flower-and Magdeburg.

A book of "Beautiful Women," by Hallett Hyatt, has pictures of some of the most beautiful women that have ever lived, and Mrs. Stenart Erskine has gathered their romantic stories.

Farren, the actress, who began life by playing childish parts in a strolling company and advanced to fame in London as Miss Hardeastle in "She Stoops to Conquer." She became a favorite in Derby, when she "lived happily ever after," taking her place at court and in society. No barrier's are insurmount able to the career of beauty.

Here is the picture of "Madame," the beautiful Henrietta Stuart, youngest daughter of Charles L. who married the Duke of Orleans. The features seem hard and the expression some what cold and stately. She would appear a woman more of brain than tenderness. In reality she had a sparkling wit, with that wonderful gift of personal magnetism-"All men loved and most women adored her," wrote a gal-

tinual round of pleasure, and the days were passed in ballets and theatricals. In the morning madame would drive out with her ladles, to be escorted on their return by King Louis XIV. and his court on horseback. After supper they would all drive out, accompanied by Lulli's violins, to watch the moonlight on the water and talk the moonshine of lovers.

Five years later madame was the king's trusty adviser and the only medium of communication between him and her brother, Charles II. It was in the spring of 1670 that she brought about that secret treaty of Dover that made Charles a Roman Catholic and plunged England into war with Holland.

power. The sequel was ghastly and dramatic. A few weeks later she was at St. Cloud in the flush of high spirits at her success. A glass of iced chicory water was brought at her request, and she drank it off quickly. Five minutes was no more. All the power of her fascination and beauty was ended by a secret poison.

As the pages are turned the portrait of a lady in a brocaded dress appears, a face with a very deep forehead and expressionless lips. This is the famous Mme, de Pompadour. Her birth was very humble indeed, but she came in the way of Louis XV., who gave her unlimited influence till she became a recognized power in Europe. many years she conducted the foreign policy of France, interviewing ambassadors and treating with kings. Rebuffed by Frederick the Great, this amazing woman made overtures to Maria Theresa of Austria to divide his king lom between them, and, sitting in her summer house, she gayly arranged with a couple of diplomats the repartition of Europe.

gave to her personal likes and dislikes, it is not improbable that she would have accomplished some of the less wild of her schemes. Her dramatic end has often been told. In the midst of a discussion on affairs of state, as chair, the cure who was with her rose to go. She detained him. "One moment, M. le Cure," she said, "we will take our departure together." And a few minutes later the beautiful diplomatist was dead.

The portrait of the unlucky Marie Antoinette, frank, queenly, superb, of whom Burke rapturously wrote, "Glittering like the morning star, full of life and splendor and joy," is here too. Re-call her life at the Petit Trianon, that miniature palace with the Corinthian pillars, where she wandered about unattended and no one rose at her approach. It is always grimly pathetic that the one French queen who a little fulfilled the part that we have been taught to expect from a queen should have been sacrificed to the mad rage of the revolution.

Angelica Kauffman was the child of a Tyrolese peasant, who made her way by the force of her artistic gifts as well as her beauty. She was one of the original members of the Royal academy. Like many a beautiful woman who never becomes famous, she was married secretly to an adventurer who passed himself off as Count Frederick de Horn. Too late she discovered that he had been a footman to that person and no more, and for some ten years she was blackmailed by this adven-
