

Hon. W. H. Kelbaugh.

*A Cold at Any Time of the Year, Especially in Hot Weather, is Very Depressing to the System. Pe-ru-na is an Unequalled Tonic For Such Cases. Read What People Say About It.*

Hon. W. H. Kelbaugh, Ex-Member W. Va. Legislature, 204 9th street, N. E., Washington, D. C., writes:

"You can use my name and word at all times for Pe-ru-na as a medicine and tonic unequalled. I have tried it for a stubborn cold and badly run down system. I tried all sorts of other medicines and paid several expensive doctor bills. Pe-ru-na cured me, strengthened me more than ever, and saved me money."

Mrs. Clara Litterst, Seaford, Ind., says: "Last fall I took a severe cold. I took Pe-ru-na, began to improve and kept on so that I was able to do my work."

**Kinds of West.**

The numerous kinds of West of which the effete East solemnly discourses are enough to bewilder a Philadelphia lawyer. It will assure you that besides "the Middle West," a phrase it employs continually and with evident pleasure, there are an eastern West, a northern West and a southern West! Yet there is only one East, and hardly enough of that to swear by.—The Californian.

**To Wash Glassware.**

Much of the imitation cut glassware may be made to look almost like the genuine article if washed in the following manner: Make a strong suds of Ivory Soap and immerse the piece of glassware in it. Rub vigorously with a soft brush, dip up and down in the suds and do not dry but let drain. This will give a beautiful sparkle. —Eleanor R. Parker.

**Should Have Paid Up.**

It wasn't a Missouri editor, but a printer's devil who was going through his first experience on "making up" forms. The paper was late and the boy got the galley mixed. The first part of the obituary notice of an impecunious citizen had been dumped in the forms, and the next handful of type came off a galley describing a recent fire. It read like this: "The pall bearers lowered the body to the grave and as it was consigned to the flames there were few, if any regrets, for the old wreck had been an eyesore to the town for years. Of course there was individual loss, but that was fully covered by insurance." The widow thinks the editor wrote the obituary that way because the lamented partner of her joys and sorrows owed him five years' subscription.—Antwerp Bee.

**Some Dark Statistics.**

The number of homicides and deaths by violence in the United States in 1905 was 9,212, as against 8,482 in 1904. Suicides, 9,082, as against 9,240 in 1904. Killed on steam railroads, in 1905, 3,342; injured, 15,904. Killed on electric and elevated railroads, 404; injured, 2,622. These statistics, collected by the Chicago Tribune, are unofficial, but perhaps they are none the less trustworthy on that account. We murder and manslaughter nine times as many as the Germans; four times as many as the English, Scotch and Welsh. America seems to be a little careless, to put it mildly.—Everybody's Magazine.

**"NO TROUBLE"**

To Change From Coffee to Postum.

"Postum has done a world of good for me," writes an ill. man.

"I've had indigestion nearly all my life, but never dreamed coffee was the cause of my trouble until last spring I got so bad I was in misery all the time.

"A coffee drinker for 30 years, it irritated my stomach and nerves, yet I was just crazy for it. After drinking it with my meals, I would leave the table, go out and lose my meal and the coffee, too. Then I'd be as hungry as ever.

"A friend advised me to quit coffee and use Postum—said it cured him. Since taking his advice I retain my food and get all the good out of it, and don't have those awful hungry spells.

"I changed from coffee to Postum without any trouble whatever, felt better from the first day I drank it. I am well now and give the credit to Postum." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

# Timely Fashion Hints

New York City.—Waists that close in the back yet give a chemisette effect are among the novelties of the season and are exceedingly desirable from every point of view. This one is among the best and includes trimming of lace over the shoulders that is very generally becoming. In the illustration the material is white

**Cluny Lace Popular.**

There is no diminution in the popularity of Cluny lace; in fact, some authorities claim that it is still gaining ground, so no one will make a mistake by buying the real Cluny, expensive though it is, for trimming a handsome costume.

**Lace and Chiffon Waist.**

A baby Irish lace waist made over accordion-pleated chiffon, with yoke of German Val. lace about one inch wide, the edge of the lace overlapping the under one. The effect was very good. The sleeves were above the elbow and had a wide band of liberty satin around the arm.

**Homemade Waists.**

The girl who is skillful and ambitious but doesn't feel that she can pay two dollars a yard for one of the stylish all-over embroideries, can evolve a very handsome waist, yes, a stunning one, from a fifty-cent batiste by embroidering it with large coin spots which are first well padded. Place the dots far apart.

**Child's Coat.**

The little coat made of lingeer material is one of the latest whims of fashion and is exceedingly attractive for the wee tots. This one is especially designed for the flouncing in which it is shown, but could be made from any plain material if the straight edges are appropriately trimmed, although the flouncing has certain advantages, notable among which is the fact that it reduces the labor of making to the minimum. For the very thin coats batiste is well liked and is always extremely dainty, but there are also slightly heavier flouncings which can be utilized for the everyday coats, while still plainer garments can be made of the flouncing that is finished with hemstitching only or of pique scalloped at the edges.

The coat is made with a plain body portion to which the full skirt is attached. The cape is separate and

linen batiste, with the chemisette of tucking, trimming of lace and of banding, but there are a great many thin silks that are in vogue, and these as well as fashionable fabrics are in every way appropriate for the design, which, indeed, is one of those useful ones that can be made available for everything seasonable.

The waist is made with a lining, that is used or omitted as the material renders desirable, and consists of front and back. The backs are tucked for their entire length, the front to yoke depth only, and the chemisette is arranged under the waist, the whole closing together at the back. The trimming portions are cut in one piece each and arranged over the shoulders on indicated lines. The sleeves are the favorite puffs

finished will roll-over cuffs and can be cut off at the elbows or extended to the wrists, as liked.

The quantity of material required for the medium size is three and one-half yards twenty-one, two and three-fourth yards twenty-seven or one and seven-eighth yards forty-four inches wide, with three-eighth yard of tucking for the chemisette, two and one-fourth yards of lace four and one-half inches wide and three and one-half yards of banding to make as illustrated.

**No Gloves For Tennis.**

One doesn't of course expect a girl to wear gloves with her short sleeves when she is playing tennis or golf, but you do rather look for them when she comes down town. It is already a common sight to see arms burned, to the elbow swinging along boldly. Perhaps they are bony, scrawny arms, too, but the wearer cares only for her comfort—and a comfortable fashion it certainly is.

**Serge in Colors.**

White serge is daily increasing in favor. Every suit that appears is almost sure to sell the material for another suit. Pure, clear white is as charming as it can be, but there is something especially soft and attractive about the creamy tint of the serges. Black velvet always adds a bright touch to them in the form of collar, cuffs, etc., but blue and green and even red are becoming if in harmony with the complexion of the wearer.

consists of the yoke and frills and the neck is finished with a turn-over collar. The sleeves are full with roll-over cuffs.

The quantity of material required for the medium size (two years) is four and one-half yards of embroidery sixteen inches deep, with seven-

eighth yard of plain material; or, five and one-eighth yards of material twenty-one, four and one-fourth yards twenty-seven or two and one-quarter yards forty-four inches wide.

**Parasols With Monogram.**

A very neat parasol to carry with one's white linen shopping or business suit is of plain white linen with a large monogram on one panel.

# SCIENCE

Alcohol may be produced from waste molasses in Cuba at a cost of 10 cents per gallon, and the residue used as a fertilizer.

The resources of this country, developed with scientific and intensive culture, would be sufficient for the population of both Europe and America.

In a new British microscope any part of the spectrum can be used for illuminating the object. It promises valuable results and proves that different rays show minute details differently, certain diatoms, for instance, being visible under green, but not to be seen with the yellow.

It is reported that an engineering firm at Pittsburg has patented a new type of universal plate mill. The mill will be driven by an electric motor of 6000 to 8000 horse-power capacity, this, it is said, being the first time that a mill of this character and size has been electrically driven.

Dr. Charcot is supported by Sir Clement Markham and Capt. Scott in the belief that the South Pole where the ice is tolerably level and constant—not ever changing, as that in the north—may be reached by a motor sledge of special construction.

From observations on Mount Blanc and recent discoveries in physics, A. Hausky has concluded that the solar corona, zodiacal light and aurora borealis are all electrical phenomena and are due to negatively charged particles detached from the sun and repelled by the pressure of light with a velocity of several thousand miles a second.

Contaminated air is drawn from a room through a stove or flue by reason of the lower atmospheric pressure. To detect when the ventilation is not properly continuing, an Italian, Signor Bertini, has devised an instrument called the noseroscope, which rings an alarm bell when the diminished pressure appears. This gives due notice that foul air must be collecting in the room.

A great improvement has been recently made in the machinery for making seamless hosery. Under the old system, the rib or upper portion of the hosery was made on one machine, the circular leg work on another, and finished on a third, but by the new machine the work is performed from start to finish in one operation. The new machine begins on the rib work, and automatically changes to the circular leg portion, then it makes the heel, foot, and toe, and starts on another piece without any intermission.

**COLOR IN MEN'S CLOTHES.**

Some of the Rainbow Effects to be Seen in London.

The drab dulness which has so long reigned over men's dress is showing signs of giving place to the opposite extreme, and men are beginning to vie with women in the brilliancy of their garments.

The favorite color of the moment would seem to be green. A distinguished Academician has been seen wearing a lounge jacket of that color edged with brown. Again, Mr. Martin Harvey has adopted it, and so have other actors, but they have so far eschewed the bright green which the more advanced young man has adopted. Suits of vivid blue have also been observed of late.

There is apparently no limit to individual taste in dress, though it would be rather difficult to outdo a gentleman who was seen a few days ago in the Bayswater road. He was wearing a pair of white flannel trousers, a violet shirt, a flaming scarlet tie, a bright blue jacket, a parti-colored waistcoat, a pair of yellow boots, and a black silk hat. He was not a Christy Minstrel, but a more or less ordinary citizen.

As for the men's shops, their windows are a riot of color. Here one may see waistcoats with crossbars of vivid green and no less vivid white on a gray ground and caps with colossal checks. The ties form not a feast but an orgy of color. Some of them are "shot" until one thinks of Nero's famous mullet of vermillion dying in an ecstasy of azure. The crudity of color, however, is by no means accompanied by crudity of price.

Some of the latest designs in shirts literally blaze. Some of the more modest are light green, with a subtle bilious tinge worked in, and ornamented with dots, while a light purple material also dotted, thrusts itself forward to suggest the background of an early Jan Van Beers. The chic thing is evidently to make the handkerchief match the shirt. Until this year men were generally content to use a white handkerchief with perhaps a border of color. Now the handkerchief is all border, and if there is any suggestion of white at all it is a stripe in the edge as an apology for what used to be.

All this flamboyance is not merely outward. All the colors of the rainbow may be found in what our American cousins call the underwear department. If a man so please he may change the color of his undergarments every day of the week and sleep in pajamas of similar tints. Or he may array himself to resemble a Neapolitan ice, a subtle suggestion perhaps for keeping cool at night during the dog days.—London Tribune.

Recently the postage on domestic letters in France was reduced from 3 cents to 2. Postal cards, however, will cost 2 cents.

**A Claim to Gratitude.**

Industry has its noble and altruistic side, as well as education. Some generous men endow libraries and colleges. Others build hospitals and homes for the indigent. Such men command the gratitude and affection of their fellows. But would not even deeper gratitude be felt by all right thinking people for a great packer who should conceive it to be his mission to create and maintain an absolutely ideal establishment, one that should meet with every hygienic and moral requirement and that could not fall to serve for all present and future competitors as the model, the standard, the embodiment of the highest principles to be realized in that industry.—Chicago Record-Herald.

FITS, St. Vitus' Dance, Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. 23 trial bottle and treatise free. Dr. H. R. Kline, M.D., 301 Arch St., Philadelphia.

The growth of girls is greatest in their fifteenth year; of boys in their seventeenth.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

**Colored Eyeglasses.**  
Eyeglasses slightly tinged with an orange yellow are said by a French expert, Dr. Motals, to be peculiarly agreeable and soothing to feeble or oversensitive eyes. Patients who cannot use blue or smoked glasses see well with these.

**SCRATCHED TILL BLOOD RAN.**

Scabs on Face and Head—Threw Off Little Watery Substance—Complete Cure by Cuticura Remedies.

"I will be glad to give anybody suffering from eczema any information regarding Cuticura Remedies. When my little girl was about a year and a half old there developed small pimples on her face, which went into a scale which threw off a little watery substance. Her head was also affected with it. She used to scratch until it bled, making very bad sores. We tried two or three salves, including borax. They did not do any good, so I got some Cuticura Soap first, and then used the Cuticura Soap, Ointment and Pills. They completely cured her, and we have had no more bother with it. Wm. F. Knox, 1216 So. 35th St., Philadelphia, Pa., June 10, 1905."

**Oyster Planting in Pacific.**

The native oyster found on our Pacific coast is extremely small—about one-fourth the size of an Atlantic oyster. Many carloads of Eastern oysters have been shipped and planted in Puget Sound and along the California coast. Some of the beds are just commencing to produce, one of them affording 700 sacks per day the past winter. The tongers, who gather the oysters, earn from \$6 to \$12 per day.

**DAZED WITH PAIN.**

The Sufferings of a Citizen of Olympia, Wash.

L. S. Gorham, of 516 East 4th St., Olympia, Wash., says: "Six years ago I got wet and took cold, and was soon fat in bed, suffering tortures with my back. Every movement caused an agonizing pain, and the persistency of it exhausted me, so that for a time I was dazed and stupid. On the advice of a friend I began using Doan's Kidney Pills, and soon noticed a change for the better. The kidney secretions had been disordered and irregular, and contained a heavy sediment, but in a week's time the urine was clear and natural again and the passages regular. Gradually the aching and soreness left my back and then the lameness. I used six boxes to make sure of a cure, and the trouble has never returned."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

**Grease Eradicator for Clothing.**  
Mix together two ounces oleate of ammonia and two ounces ammonia water; shake well and add one ounce ether and five ounces benzine. Shake well again, and then add one ounce chloroform. Shake again, let stand a few minutes, then shake at frequent intervals until the preparation is of the consistency of cream.

**WINTER FERTILIZER LIME.**

WALTON QUARRIES, Harrisburg, Pa.

**PATENTS**

Book free. Highest refs. Long experience. Fitzgerald & Co., Dept. 54, Washington, D. C.

**Chickens Earn Money!**

If You Know How to Handle Them Properly.

Whether you raise Chickens for fun or profit, you want to do it intelligently and get the best results. The way to do this is to profit by the experience of others. We offer a book telling all you need to know on the subject—a book written by a man who made his living for 25 years in raising Poultry, and in that time necessarily had to experiment and spent much money to learn the best way to conduct the business—for the small sum of 25 cents in postage stamps.

It tells you how to Detect and Cure Disease, how to Feed for Eggs, and also for Market, which Fowls to Save for Breeding Purposes and indeed about everything you must know on the subject to make a success.

SENT POSTPAID ON RECEIPT OF 25 CENTS IN STAMPS.

# ITS MERIT IS PROVED

**RECORD OF A GREAT MEDICINE**

**A Prominent Cincinnati Woman Tells How Lydia E. Pinkham's Vegetable Compound Completely Cured Her.**

Mrs. Sara Wilson

The following letter is only one of many thousands which are on file in the Pinkham office, and go to prove beyond question that Lydia E. Pinkham's Vegetable Compound must be a remedy of great merit, otherwise it could not produce such marvelous results among sick and ailing women.

Dear Mrs. Pinkham—  
"About nine months ago I was a great sufferer with female trouble, which caused me severe pain, extreme nervousness and frequent headaches, from which the doctor failed to relieve me. I tried Lydia E. Pinkham's Vegetable Compound, and within a short time felt better, and after taking five bottles of it I was entirely cured. I therefore heartily recommend your Compound as a splendid female tonic. It makes the monthly periods regular and without pain; and what a blessing it is to find such a remedy after so many doctors fail to help you. I am pleased to recommend it to all suffering women." Mrs. Sara Wilson, 31 East 54 Street, Cincinnati, Ohio.

If you have suppressed or painful periods, weakness of the stomach, indigestion, bloating, pelvic catarrh, nervous prostration, dizziness, faintness, "don't-care" and "want-to-be-left-alone" feeling, excitability, backache or the blues, these are sure indications of female weakness, or some derangement of the organs. In such cases there is one tried and true remedy—Lydia E. Pinkham's Vegetable Compound.

**Libby's Food Products**

enable you to make good meals out of "hurry" meals.

Libby's Food Products are ready to serve when you get them, yet are cooked as carefully and as well as you could do it in your own kitchen.

On Tongue, Dried Beef, Boned Chicken, Dressed Ham, Veal Loaf—these are but a few of the many kinds your dealer keeps.

Try for luncheon or supper tomorrow, some sliced Chicken Loaf.

Booklet, "How to Make Good Things to Eat," free if you write.

Libby, McNeill & Libby, Chicago.

**Chicken Loaf**

**YOU CANNOT CURE**

all inflamed, ulcerated and catarrhal conditions of the mucous membrane such as nasal catarrh, uterine catarrh caused by feminine ill, sore throat, sore mouth or inflamed eyes by simply dosing the stomach.

**Paxtine Toilet Antiseptic**  
which destroys the disease germs, checks discharges, stops pain, and heals the inflammation and soreness. Paxtine represents the most successful local treatment with effecting by local treatment with Paxtine.
